Frequently Asked Questions (FAQs)

What's New

- Country information has been updated as of 18 December 2008.

- In the People category, two new fields provide information on education in terms of opportunity and resources. "School Life Expectancy" is an estimate of the total number of years of schooling (primary to tertiary) that a child can expect to receive,

assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. "Education expenditures" provides an estimate of the public expenditure on education as a percent of Gross Domestic Product (GDP).

- In order to help policymakers understand the nature and global dimensions of the current financial crisis, The World Factbook has added five new fields to the Economy category. "Central bank discount rate" provides the annualized interest rate a country's central bank charges commercial, depository banks for loans to meet temporary shortages of funds. "Commercial bank prime lending rate" provides a simple average of annualized interest rates commercial banks charge on new loans, denominated in the national currency, to their most credit-worthy customers. "Stock of money" also known as "M1," comprises the total quantity of currency in circulation (notes and coins) plus demand deposits denominated in the national currency, held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy. "Stock of quasi money" comprises the total quantity of time and savings deposits denominated in the national currency, held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy. When added together with "M1" the total money supply is known as "M2." "Stock of domestic credit" is the total quantity of credit, denominated in the domestic currency, provided by banks to nonbanking institutions.

- In the Geography category, two new fields focus on the increasingly vital resource of water: "Total renewable water resources" and "Freshwater withdrawal."

- Revision of some individual country maps, first introduced in the 2001 edition, is continued in this edition. Several regional maps have also been updated to reflect boundary changes and place name spelling changes.

Rank Orders

[Transcriber's note: To search on a rank order in this file, prefix the rank's name with "@", e.g. "@Population". "Population" will find all occurrences; prefixing it with "@" will find the correct location.]

Rank Order pages are presorted lists of data from selected Factbook data fields. Rank Order pages are generally given in descending order - highest to lowest - such as Population and Area. The two exceptions are Unemployment Rate and Inflation Rate, which are in ascending - lowest to highest - order. Rank Order pages are available for the following 55 fields in six of the nine Factbook categories.

Factbook fields with Rank Order pages are easily identified with a small bar chart icon to the right of the data field title.

Not all Rank Order pages include the same number of entries because information for a particular field is not available for all countries. In addition, not all data fields are suitable for displaying as Rank Order pages, such as those containing textual information. Textual information is more readily viewed by clicking on the Field Listing icon next to the Data field title. The other icon next to the data field title provides the definition of the field.

All of the 'Rank Order' pages can be downloaded as tab-delimited data files and can be opened in other applications such as spreadsheets and databases. To save a Rank Order page in a spreadsheet, first click on the 'Download Datafile' choice above the Rank Order page you selected; then, at the top of your browser window, click on 'File' and 'Save As'. After saving the file, open the spreadsheet, find the saved file, and 'Open' it.

Additional Rank Order pages being considered for future updates of the Factbook Web site include:

Median	age
Literacy	
Population below the poverty line

Notes and Definitions

In addition to the regular information updates, The World Factbook 2008 features several new additions. In the Geography category, two new fields focus on the increasingly vital resource of water: "Total renewable water resources" and "Freshwater withdrawal."

In the Economy category, the Factbook has added three fields: "Stock of direct foreign investment - at home", "Stock of direct foreign investment - abroad", and "Market value of publicly traded shares." Additionally, the data for GDP at purchasing power parity (PPP) has been rebased using new PPP conversion rates, benchmarked to the year 2005, which were released on 17 December 2007 by the International Comparison Program (ICP). The 2005 PPP data replace previous estimates, many from studies dating to 1993 or earlier. The preliminary ICP report provides estimates of internationally comparable price levels and the relative purchasing power of currencies for 146 countries. The 2005 benchmark revises downward the size of the world economy in PPP terms from the previous estimates, and changes the relative sizes of many of the world's economies.

Concise descriptions of the major religions mentioned in the Factbook have been added to the Notes and Definitions. France's redesignation of some of its overseas possessions caused the five former Indian Ocean island possessions making up Iles Eparses to be incorporated into the French Southern and Antarctic Lands, while two new Caribbean entities, St. Barthelémy and St. Martin, were created.

Revision of some individual country maps, first introduced in the 2001 edition, is continued in this edition. The revised maps include elevation extremes and a partial

geographic grid. Several regional maps have also been updated to reflect boundary changes and place name spelling changes.

Abbreviations: This information is included in Appendix A: Abbreviations, which includes all abbreviations and acronyms used in the Factbook, with their expansions.

Acronyms: An acronym is an abbreviation coined from the initial letter of each successive word in a term or phrase. In general, an acronym made up solely from the first letter of the major words in the expanded form is rendered in all capital letters (NATO from North Atlantic Treaty Organization; an exception would be ASEAN for Association of Southeast Asian Nations). In general, an acronym made up of more than the first letter of the major words in the expanded form is rendered with only an initial capital letter (Comsat from Communications Satellite Corporation; an exception would be NAM from Nonaligned Movement). Hybrid forms are sometimes used to distinguish between initially identical terms (ICC for International Chamber of Commerce and ICCt for International Criminal Court).

Administrative divisions: This entry generally gives the numbers, designatory terms, and first-order administrative divisions as approved by the US Board on Geographic Names (BGN). Changes that have been reported but not yet acted on by the BGN are noted.

Age structure: This entry provides the distribution of the population according to age. Information is included by sex and age group (0-14 years, 15-64 years, 65 years and over). The age structure of a population affects a nation's key socioeconomic issues. Countries with young populations (high percentage under age 15) need to invest more in schools, while countries with older populations (high percentage ages 65 and over) need to invest more in the health sector. The age structure can also be used to help predict potential political issues. For example, the rapid growth of a young adult population unable to find employment can lead to unrest.

Agriculture - products: This entry is an ordered listing of major crops and products starting with the most important.

Airports: This entry gives the total number of airports or airfields recognizable from the air. The runway(s) may be paved (concrete or asphalt surfaces) or unpaved (grass, earth, sand, or gravel surfaces) but may include closed or abandoned installations. Airports or airfields that are no longer recognizable (overgrown, no facilities, etc.) are not included. Note that not all airports have accommodations for refueling, maintenance, or air traffic control.

Airports - with paved runways: This entry gives the total number of airports with paved runways (concrete or asphalt surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups - (1) over 3,047 m, (2) 2,438 to 3,047 m, (3) 1,524 to 2,437 m, (4) 914 to 1,523 m, and (5) under 914 m. Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control.

Airports - with unpaved runways: This entry gives the total number of airports with unpaved runways (grass, dirt, sand, or gravel surfaces) by length. For airports with more than one runway, only the longest runway is included according to the following five groups - (1) over 3,047 m, (2) 2,438 to 3,047 m, (3) 1,524 to 2,437 m, (4) 914 to 1,523 m, and (5) under 914 m. Only airports with usable runways are included in this listing. Not all airports have facilities for refueling, maintenance, or air traffic control.

Appendixes: This section includes Factbook-related material by topic.

Area: This entry includes three subfields. Total area is the sum of all land and water areas delimited by international boundaries and/or coastlines. Land area is the aggregate of all surfaces delimited by international boundaries and/or coastlines, excluding inland water bodies (lakes, reservoirs, rivers). Water area is the sum of the surfaces of all inland water bodies, such as lakes, reservoirs, or rivers, as delimited by international boundaries and/or coastlines.

Area - comparative: This entry provides an area comparison based on total area equivalents. Most entities are compared with the entire US or one of the 50 states based on area measurements (1990 revised) provided by the US Bureau of the Census. The smaller entities are compared with Washington, DC (178 sq km, 69 sq mi) or The Mall in Washington, DC (0.59 sq km, 0.23 sq mi, 146 acres).

Background: This entry usually highlights major historic events and current issues and may include a statement about one or two key future trends.

Birth rate: This entry gives the average annual number of births during a year per 1,000 persons in the population at midyear; also known as crude birth rate. The birth rate is usually the dominant factor in determining the rate of population growth. It depends on both the level of fertility and the age structure of the population.

Budget: This entry includes revenues, expenditures, and capital expenditures. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Capital: This entry gives the name of the seat of government, its geographic coordinates, the time difference relative to Coordinated Universal Time (UTC) and the time observed in Washington, DC, and, if applicable, information on daylight saving time (DST). Where appropriate, a special note has been added to highlight those countries that have multiple time zones.

Central bank discount rate: This entry provides the annualized interest rate a country's central bank charges commercial, depository banks for loans to meet temporary shortages of funds.

Climate: This entry includes a brief description of typical weather regimes throughout the year.

Coastline: This entry gives the total length of the boundary between the land area (including islands) and the sea.

Commercial bank prime lending rate: This entry provides a simple average of annualized interest rates commercial banks charge on new loans, denominated in the national currency, to their most credit- worthy customers.

Communications: This category deals with the means of exchanging information and includes the telephone, radio, television, and Internet host entries.

Communications - note: This entry includes miscellaneous communications information of significance not included elsewhere.

Constitution: This entry includes the dates of adoption, revisions, and major amendments.

Coordinated Universal Time (UTC): UTC is the international atomic time scale that serves as the basis of timekeeping for most of the world. The hours, minutes, and seconds expressed by UTC represent the time of day at the Prime Meridian (0 deg. longitude) located near Greenwich, England as reckoned from midnight. UTC is calculated by the Bureau International des Poids et Mesures (BIPM) in Sevres, France. The BIPM averages data collected from more than 200 atomic time and frequency standards located at about 50 laboratories worldwide. UTC is the basis for all civil time with the Earth divided into time zones expressed as positive or negative differences from UTC. UTC is also referred to as "Zulu time." See the Standard Time Zones of the World map included with the Reference Maps.

Country data codes: see Data codes.

Country map: Most versions of the Factbook provide a country map in color. The maps were produced from the best information available at the time of preparation. Names and/or boundaries may have changed subsequently.

Country name: This entry includes all forms of the country's name approved by the US Board on Geographic Names (Italy is used as an example): conventional long form (Italian Republic), conventional short form (Italy), local long form (Repubblica Italiana), local short form (Italia), former (Kingdom of Italy), as well as the abbreviation. Also see the Terminology note.

Crude oil: See entry for oil.

Current account balance: This entry records a country's net trade in goods and services, plus net earnings from rents, interest, profits, and dividends, and net transfer payments (such as pension funds and worker remittances) to and from the rest of the world during the period specified. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Data codes: This information is presented in Appendix D: Cross-Reference List of Country Data Codes and Appendix E: Cross-Reference List of Hydrographic Data Codes.

Date of information: In general, information available as of 1 January 2007 was used in the preparation of this edition.

Daylight Saving Time (DST): This entry is included for those entities that have adopted a policy of adjusting the official local time forward, usually one hour, from Standard Time during summer months. Such policies are most common in mid-latitude regions.

Death rate: This entry gives the average annual number of deaths during a year per 1,000 population at midyear; also known as crude death rate. The death rate, while only a rough indicator of the mortality situation in a country, accurately indicates the current mortality impact on population growth. This indicator is significantly affected by age distribution, and most countries will eventually show a rise in the overall death rate, in spite of continued decline in mortality at all ages, as declining fertility results in an aging population.

Debt - external: This entry gives the total public and private debt owed to nonresidents repayable in foreign currency, goods, or services. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Dependency status: This entry describes the formal relationship between a particular nonindependent entity and an independent state.

Dependent areas: This entry contains an alphabetical listing of all nonindependent entities associated in some way with a particular independent state.

Diplomatic representation: The US Government has diplomatic relations with 189 independent states, including 187 of the 192 UN members (excluded UN members are Bhutan, Cuba, Iran, North Korea, and the US itself). In addition, the US has diplomatic relations with 2 independent states that are not in the UN, the Holy See and Kosovo, as well as with the EU.

Diplomatic representation from the US: This entry includes the chief of mission, embassy address, mailing address, telephone number, FAX number, branch office locations, consulate general locations, and consulate locations.

Diplomatic representation in the US: This entry includes the chief of mission, chancery, telephone, FAX, consulate general locations, and consulate locations.

Disputes - international: This entry includes a wide variety of situations that range from traditional bilateral boundary disputes to unilateral claims of one sort or another. Information regarding disputes over international terrestrial and maritime boundaries has been reviewed by the US Department of State. References to other situations involving borders or frontiers may also be included, such as resource disputes, geopolitical questions, or irredentist issues; however, inclusion does not necessarily constitute official acceptance or recognition by the US Government.

Distribution of family income - Gini index: This index measures the degree of inequality in the distribution of family income in a country. The index is calculated from the Lorenz curve, in which cumulative family income is plotted against the number of families arranged from the poorest to the richest. The index is the ratio of (a) the area between a country's Lorenz curve and the 45 degree helping line to (b) the entire triangular area under the 45 degree line. The more nearly equal a country's income distribution, the closer its Lorenz curve to the 45 degree line and the lower its Gini index, e.g., a Scandinavian country with an index of 25. The more unequal a country's income distribution, the farther its Lorenz curve from the 45 degree line and the higher

its Gini index, e.g., a Sub-Saharan country with an index of 50. If income were distributed with perfect equality, the Lorenz curve would coincide with the 45 degree line and the index would be zero; if income were distributed with perfect inequality, the Lorenz curve would coincide with the horizontal axis and the right vertical axis and the index would be 100.

Economy: This category includes the entries dealing with the size, development, and management of productive resources, i.e., land, labor, and capital.

Economy - overview: This entry briefly describes the type of economy, including the degree of market orientation, the level of economic development, the most important natural resources, and the unique areas of specialization. It also characterizes major economic events and policy changes in the most recent 12 months and may include a statement about one or two key future macroeconomic trends.

Education expenditures: This entry provides the public expenditure on education as a percent of GDP

Electricity - consumption: This entry consists of total electricity generated annually plus imports and minus exports, expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

Electricity - exports: This entry is the total exported electricity in kilowatt-hours.

Electricity - imports: This entry is the total imported electricity in kilowatt-hours.

Electricity - production: This entry is the annual electricity generated expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

Elevation extremes: This entry includes both the highest point and the lowest point.

Entities: Some of the independent states, dependencies, areas of special sovereignty, and governments included in this publication are not independent, and others are not officially recognized by the US Government. "Independent state" refers to a people politically organized into a sovereign state with a definite territory. "Dependencies" and "areas of special sovereignty" refer to a broad category of political entities that are associated in some way with an independent state. "Country" names used in the table of contents or for page headings are usually the short-form names as approved by the

US Board on Geographic Names and may include independent states, dependencies, and areas of special sovereignty, or other geographic entities. There are a total of 266 separate geographic entities in The World Factbook that may be categorized as follows:

INDEPENDENT STATES

194 Afghanistan, Albania, Algeria, Andorra, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Brunei, Bulgaria, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Canada, Cape Verde, Central African Republic, Chad, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, Fiji, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Holy See, Honduras, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kazakhstan, Kenya, Kiribati, North Korea, South Korea, Kosovo, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, San Marino, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, Somalia, South Africa, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Tajikistan, Tanzania, Thailand, Timor-Leste, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Tuvalu, Uganda, Ukraine, UAE, UK, US, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia, Zimbabwe

Environment - current issues: This entry lists the most pressing and important environmental problems. The following terms and abbreviations are used throughout the entry:

Acidification - the lowering of soil and water pH due to acid precipitation and deposition usually through precipitation; this process disrupts ecosystem nutrient flows and may kill freshwater fish and plants dependent on more neutral or alkaline conditions (see acid rain).

Acid rain - characterized as containing harmful levels of sulfur dioxide or nitrogen oxide; acid rain is damaging and potentially deadly to the earth's fragile ecosystems; acidity is measured using the pH scale where 7 is neutral, values greater than 7 are considered alkaline, and values below 5.6 are considered acid precipitation; note - a pH of 2.4 (the acidity of vinegar) has been measured in rainfall in New England.

Aerosol - a collection of airborne particles dispersed in a gas, smoke, or fog.

Afforestation - converting a bare or agricultural space by planting trees and plants; reforestation involves replanting trees on areas that have been cut or destroyed by fire.

Asbestos - a naturally occurring soft fibrous mineral commonly used in fireproofing materials and considered to be highly carcinogenic in particulate form.

Biodiversity - also biological diversity; the relative number of species, diverse in form and function, at the genetic, organism, community, and ecosystem level; loss of biodiversity reduces an ecosystem's ability to recover from natural or man-induced disruption.

Bio-indicators - a plant or animal species whose presence, abundance, and health reveal the general condition of its habitat.

Biomass - the total weight or volume of living matter in a given area or volume.

Carbon cycle - the term used to describe the exchange of carbon (in various forms, e.g., as carbon dioxide) between the atmosphere, ocean, terrestrial biosphere, and geological deposits.

Catchments - assemblages used to capture and retain rainwater and runoff; an important water management technique in areas with limited freshwater resources, such as Gibraltar.

DDT (dichloro-diphenyl-trichloro-ethane) - a colorless, odorless insecticide that has toxic effects on most animals; the use of DDT was banned in the US in 1972.

Defoliants - chemicals which cause plants to lose their leaves artificially; often used in agricultural practices for weed control, and may have detrimental impacts on human and ecosystem health.

Deforestation - the destruction of vast areas of forest (e.g., unsustainable forestry practices, agricultural and range land clearing, and the over exploitation of wood products for use as fuel) without planting new growth.

Desertification - the spread of desert-like conditions in arid or semi- arid areas, due to overgrazing, loss of agriculturally productive soils, or climate change.

Dredging - the practice of deepening an existing waterway; also, a technique used for collecting bottom-dwelling marine organisms (e.g., shellfish) or harvesting coral, often causing significant destruction of reef and ocean-floor ecosystems.

Drift-net fishing - done with a net, miles in extent, that is generally anchored to a boat and left to float with the tide; often results in an over harvesting and waste of large populations of non-commercial marine species (by-catch) by its effect of "sweeping the ocean clean."

Ecosystems - ecological units comprised of complex communities of organisms and their specific environments.

Effluents - waste materials, such as smoke, sewage, or industrial waste which are released into the environment, subsequently polluting it.

Endangered species - a species that is threatened with extinction either by direct hunting or habitat destruction.

Freshwater - water with very low soluble mineral content; sources include lakes, streams, rivers, glaciers, and underground aquifers.

Greenhouse gas - a gas that "traps" infrared radiation in the lower atmosphere causing surface warming; water vapor, carbon dioxide, nitrous oxide, methane, hydrofluorocarbons, and ozone are the primary greenhouse gases in the Earth's atmosphere.

Groundwater - water sources found below the surface of the earth often in naturally occurring reservoirs in permeable rock strata; the source for wells and natural springs.

Highlands Water Project - a series of dams constructed jointly by Lesotho and South Africa to redirect Lesotho's abundant water supply into a rapidly growing area in South Africa; while it is the largest infrastructure project in southern Africa, it is also the most costly and controversial; objections to the project include claims that it forces people from their homes, submerges farmlands, and squanders economic resources.

Inuit Circumpolar Conference (ICC) - represents the 145,000 Inuits of Russia, Alaska, Canada, and Greenland in international environmental issues; a General Assembly convenes every three years to determine the focus of the ICC; the most current concerns are long-range transport of pollutants, sustainable development, and climate change.

Metallurgical plants - industries which specialize in the science, technology, and processing of metals; these plants produce highly concentrated and toxic wastes which can contribute to pollution of ground water and air when not properly disposed.

Noxious substances - injurious, very harmful to living beings.

Overgrazing - the grazing of animals on plant material faster than it can naturally regrow leading to the permanent loss of plant cover, a common effect of too many animals grazing limited range land.

Ozone shield - a layer of the atmosphere composed of ozone gas (O₃) that resides approximately 25 miles above the Earth's surface and absorbs solar ultraviolet radiation that can be harmful to living organisms.

Poaching - the illegal killing of animals or fish, a great concern with respect to endangered or threatened species.

Pollution - the contamination of a healthy environment by man-made waste.

Potable water - water that is drinkable, safe to be consumed.

Salination - the process through which fresh (drinkable) water becomes salt (undrinkable) water; hence, desalination is the reverse process; also involves the accumulation of salts in topsoil caused by evaporation of excessive irrigation water, a process that can eventually render soil incapable of supporting crops.

Siltation - occurs when water channels and reservoirs become clogged with silt and mud, a side effect of deforestation and soil erosion.

Slash-and-burn agriculture - a rotating cultivation technique in which trees are cut down and burned in order to clear land for temporary agriculture; the land is used until its productivity declines at which point a new plot is selected and the process repeats; this practice is sustainable while population levels are low and time is permitted for regrowth of natural vegetation; conversely, where these conditions do not exist, the practice can have disastrous consequences for the environment.

Soil degradation - damage to the land's productive capacity because of poor agricultural practices such as the excessive use of pesticides or fertilizers, soil compaction from heavy equipment, or erosion of topsoil, eventually resulting in reduced ability to produce agricultural products.

Soil erosion - the removal of soil by the action of water or wind, compounded by poor agricultural practices, deforestation, overgrazing, and desertification.

Ultraviolet (UV) radiation - a portion of the electromagnetic energy emitted by the sun and naturally filtered in the upper atmosphere by the ozone layer; UV radiation can be harmful to living organisms and has been linked to increasing rates of skin cancer in humans.

Waterborne diseases - those in which bacteria survive in, and are transmitted through, water; always a serious threat in areas with an untreated water supply.

Environment - international agreements: This entry separates country participation in international environmental agreements into two levels - party to and signed, but not ratified. Agreements are listed in alphabetical order by the abbreviated form of the full name.

Environmental agreements: This information is presented in Appendix C: Selected International Environmental Agreements, which includes the name, abbreviation, date opened for signature, date entered into force, objective, and parties by category.

Ethnic groups: This entry provides an ordered listing of ethnic groups starting with the largest and normally includes the percent of total population.

Exchange rates: This entry provides the official value of a country's monetary unit at a given date or over a given period of time, as expressed in units of local currency per US dollar and as determined by international market forces or official fiat. The

International Organization for Standardization (ISO) 4217 alphabetic currency code for the national medium of exchange is presented in parenthesis.

Executive branch: This entry includes several subfields. Chief of state includes the name and title of the titular leader of the country who represents the state at official and ceremonial functions but may not be involved with the day-to-day activities of the government. Head of government includes the name and title of the top administrative leader who is designated to manage the day-to-day activities of the government. For example, in the UK, the monarch is the chief of state, and the prime minister is the head of government. In the US, the president is both the chief of state and the head of government. Cabinet includes the official name for this body of high-ranking advisers and the method for selection of members. Elections include the nature of election process or accession to power, date of the last election, and date of the next election. Election results includes the percent of vote for each candidate in the last election.

Exports: This entry provides the total US dollar amount of merchandise exports on an f.o.b. (free on board) basis. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Exports - commodities: This entry provides a listing of the highest- valued exported products; it sometimes includes the percent of total dollar value.

Exports - partners: This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Flag description: This entry provides a written flag description produced from actual flags or the best information available at the time the entry was written. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

Flag graphic: Most versions of the Factbook include a color flag at the beginning of the country profile. The flag graphics were produced from actual flags or the best information available at the time of preparation. The flags of independent states are used by their dependencies unless there is an officially recognized local flag. Some disputed and other areas do not have flags.

Freshwater withdrawal (domestic/industrial/agricultural): This entry provides the annual quantity of water in cubic kilometers removed from available sources for use in any purpose. Water drawn-off is not necessarily entirely consumed and some portion may be returned for further use downstream. Domestic sector use refers to water

supplied by public distribution systems. Note that some of this total may be used for small industrial and/or limited agricultural purposes. Industrial sector use is the quantity of water used by self-supplied industries not connected to a public distribution system. Agricultural sector use includes water used for irrigation and livestock watering, and does not account for agriculture directly dependent on rainfall. Included are figures for total annual water withdrawal and per capita water withdrawal.

GDP (official exchange rate): This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at official exchange rates (OER) is the home-currency-denominated annual GDP figure divided by the bilateral average US exchange rate with that country in that year. The measure is simple to compute and gives a precise measure of the value of output. Many economists prefer this measure when gauging the economic power an economy maintains vis-à-vis its neighbors, judging that an exchange rate captures the purchasing power a nation enjoys in the international marketplace. Official exchange rates, however, can be artificially fixed and/or subject to manipulation - resulting in claims of the country having an under- or over-valued currency - and are not necessarily the equivalent of a market-determined exchange rate. Moreover, even if the official exchange rate is market-determined, market exchange rates are frequently established by a relatively small set of goods and services (the ones the country trades) and may not capture the value of the larger set of goods the country produces. Furthermore, OER-converted GDP is not well suited to comparing domestic GDP over time, since appreciation/depreciation from one year to the next will make the OER GDP value rise/fall regardless of whether home- currency-denominated GDP changed.

GDP (purchasing power parity): This entry gives the gross domestic product (GDP) or value of all final goods and services produced within a nation in a given year. A nation's GDP at purchasing power parity (PPP) exchange rates is the sum value of all goods and services produced in the country valued at prices prevailing in the United States. This is the measure most economists prefer when looking at per- capita welfare and when comparing living conditions or use of resources across countries. The measure is difficult to compute, as a US dollar value has to be assigned to all goods and services in the country regardless of whether these goods and services have a direct equivalent in the United States (for example, the value of an ox-cart or non-US military equipment); as a result, PPP estimates for some countries are based on a small and sometimes different set of goods and services. In addition, many countries do not formally participate in the World Bank's PPP project that calculates these measures, so the resulting GDP estimates for these countries may lack precision. For many developing countries, PPP-based GDP measures are multiples of the official exchange

rate (OER) measure. The difference between the OER- and PPP- denominated GDP values for most of the wealthy industrialized countries are generally much smaller.

GDP - composition by sector: This entry gives the percentage contribution of agriculture, industry, and services to total GDP. The distribution will total less than 100 percent if the data are incomplete.

GDP - per capita (PPP): This entry shows GDP on a purchasing power parity basis divided by population as of 1 July for the same year.

GDP - real growth rate: This entry gives GDP growth on an annual basis adjusted for inflation and expressed as a percent.

GDP methodology: In the Economy category, GDP dollar estimates for countries are reported both on an official exchange rate (OER) and a purchasing power parity (PPP) basis. Both measures contain information that is useful to the reader. The PPP method involves the use of standardized international dollar price weights, which are applied to the quantities of final goods and services produced in a given economy. The data derived from the PPP method probably provide the best available starting point for comparisons of economic strength and well-being between countries. In contrast, the currency exchange rate method involves a variety of international and domestic financial forces that may not capture the value of domestic output. Whereas PPP estimates for OECD countries are quite reliable, PPP estimates for developing countries are often rough approximations. In developing countries with weak currencies, the exchange rate estimate of GDP in dollars is typically one-fourth to one-half the PPP estimate. Most of the GDP estimates for developing countries are based on extrapolation of PPP numbers published by the UN International Comparison Program (UNICP) and by Professors Robert Summers and Alan Heston of the University of Pennsylvania and their colleagues. GDP derived using the OER method should be used for the purpose of calculating the share of items such as exports, imports, military expenditures, external debt, or the current account balance, because the dollar values presented in the Factbook for these items have been converted at official exchange rates, not at PPP. One should use the OER GDP figure to calculate the proportion of, say, Chinese defense expenditures in GDP, because that share will be the same as one calculated in local currency units. Comparison of OER GDP with PPP GDP may also indicate whether a currency is over- or under-valued. If OER GDP is smaller than PPP GDP, the official exchange rate may be undervalued, and vice versa. However, there is no strong historical evidence that market exchange rates move in the direction implied by the PPP rate, at least not in the short- or medium-term. Note: the numbers for GDP

and other economic data should not be chained together from successive volumes of the Factbook because of changes in the US dollar measuring rod, revisions of data by statistical agencies, use of new or different sources of information, and changes in national statistical methods and practices.

GNP: Gross national product (GNP) is the value of all final goods and services produced within a nation in a given year, plus income earned by its citizens abroad, minus income earned by foreigners from domestic production. The Factbook, following current practice, uses GDP rather than GNP to measure national production. However, the user must realize that in certain countries net remittances from citizens working abroad may be important to national well-being.

GWP: This entry gives the gross world product (GWP) or aggregate value of all final goods and services produced worldwide in a given year.

Geographic coordinates: This entry includes rounded latitude and longitude figures for the purpose of finding the approximate geographic center of an entity and is based on the locations provided in the Geographic Names Server (GNS), maintained by the National Geospatial- Intelligence Agency on behalf of the US Board on Geographic Names.

Geographic names: This information is presented in Appendix F: Cross- Reference List of Geographic Names. It includes a listing of various alternate names, former names, local names, and regional names referenced to one or more related Factbook entries. Spellings are normally, but not always, those approved by the US Board on Geographic Names (BGN). Alternate names and additional information are included in parentheses.

Geography: This category includes the entries dealing with the natural environment and the effects of human activity.

Geography - note: This entry includes miscellaneous geographic information of significance not included elsewhere.

Gini index: See entry for Distribution of family income - Gini index

Government: This category includes the entries dealing with the system for the adoption and administration of public policy.

Government - note: This entry includes miscellaneous government information of significance not included elsewhere.

Government type: This entry gives the basic form of government. Definitions of the major governmental terms are as follows. (Note that for some countries more than one definition applies.):

Absolute monarchy - a form of government where the monarch rules unhindered, i.e., without any laws, constitution, or legally organized opposition.

Anarchy - a condition of lawlessness or political disorder brought about by the absence of governmental authority.

Authoritarian - a form of government in which state authority is imposed onto many aspects of citizens' lives.

Commonwealth - a nation, state, or other political entity founded on law and united by a compact of the people for the common good.

Communist - a system of government in which the state plans and controls the economy and a single - often authoritarian - party holds power; state controls are imposed with the elimination of private ownership of property or capital while claiming to make progress toward a higher social order in which all goods are equally shared by the people (i.e., a classless society).

Confederacy (Confederation) - a union by compact or treaty between states, provinces, or territories, that creates a central government with limited powers; the constituent entities retain supreme authority over all matters except those delegated to the central government.

Constitutional - a government by or operating under an authoritative document (constitution) that sets forth the system of fundamental laws and principles that determines the nature, functions, and limits of that government.

Constitutional democracy - a form of government in which the sovereign power of the people is spelled out in a governing constitution.

Constitutional monarchy - a system of government in which a monarch is guided by a constitution whereby his/her rights, duties, and responsibilities are spelled out in written law or by custom.

Democracy - a form of government in which the supreme power is retained by the people, but which is usually exercised indirectly through a system of representation and delegated authority periodically renewed.

Democratic republic - a state in which the supreme power rests in the body of citizens entitled to vote for officers and representatives responsible to them.

Dictatorship - a form of government in which a ruler or small clique wield absolute power (not restricted by a constitution or laws).

Ecclesiastical - a government administrated by a church.

Emirate - similar to a monarchy or sultanate, but a government in which the supreme power is in the hands of an emir (the ruler of a Muslim state); the emir may be an absolute overlord or a sovereign with constitutionally limited authority.

Federal (Federation) - a form of government in which sovereign power is formally divided - usually by means of a constitution - between a central authority and a number of constituent regions (states, colonies, or provinces) so that each region retains some management of its internal affairs; differs from a confederacy in that the central government exerts influence directly upon both individuals as well as upon the regional units.

Federal republic - a state in which the powers of the central government are restricted and in which the component parts (states, colonies, or provinces) retain a degree of self-government; ultimate sovereign power rests with the voters who chose their governmental representatives.

Islamic republic - a particular form of government adopted by some Muslim states; although such a state is, in theory, a theocracy, it remains a republic, but its laws are required to be compatible with the laws of Islam.

Maoism - the theory and practice of Marxism-Leninism developed in China by Mao Zedong (Mao Tse-tung), which states that a continuous revolution is necessary if the leaders of a communist state are to keep in touch with the people.

Marxism - the political, economic, and social principles espoused by 19th century economist Karl Marx; he viewed the struggle of workers as a progression of historical forces that would proceed from a class struggle of the proletariat (workers) exploited by capitalists (business owners), to a socialist "dictatorship of the proletariat," to, finally, a classless society - Communism.

Marxism-Leninism - an expanded form of communism developed by Lenin from doctrines of Karl Marx; Lenin saw imperialism as the final stage of capitalism and shifted the focus of workers' struggle from developed to underdeveloped countries.

Monarchy - a government in which the supreme power is lodged in the hands of a monarch who reigns over a state or territory, usually for life and by hereditary right; the monarch may be either a sole absolute ruler or a sovereign - such as a king, queen, or prince - with constitutionally limited authority.

Oligarchy - a government in which control is exercised by a small group of individuals whose authority generally is based on wealth or power.

Parliamentary democracy - a political system in which the legislature (parliament) selects the government - a prime minister, premier, or chancellor along with the cabinet ministers - according to party strength as expressed in elections; by this system, the government acquires a dual responsibility: to the people as well as to the parliament.

Parliamentary government (Cabinet-Parliamentary government) - a government in which members of an executive branch (the cabinet and its leader - a prime minister, premier, or chancellor) are nominated to their positions by a legislature or parliament, and are directly responsible to it; this type of government can be dissolved at will by the parliament (legislature) by means of a no confidence vote or the leader of the cabinet may dissolve the parliament if it can no longer function.

Parliamentary monarchy - a state headed by a monarch who is not actively involved in policy formation or implementation (i.e., the exercise of sovereign powers by a monarch in a ceremonial capacity); true governmental leadership is carried out by a cabinet and its head - a prime minister, premier, or chancellor - who are drawn from a legislature (parliament).

Presidential - a system of government where the executive branch exists separately from a legislature (to which it is generally not accountable).

Republic - a representative democracy in which the people's elected deputies (representatives), not the people themselves, vote on legislation.

Socialism - a government in which the means of planning, producing, and distributing goods is controlled by a central government that theoretically seeks a more just and equitable distribution of property and labor; in actuality, most socialist governments have ended up being no more than dictatorships over workers by a ruling elite.

Sultanate - similar to a monarchy, but a government in which the supreme power is in the hands of a sultan (the head of a Muslim state); the sultan may be an absolute ruler or a sovereign with constitutionally limited authority.

Theocracy - a form of government in which a Deity is recognized as the supreme civil ruler, but the Deity's laws are interpreted by ecclesiastical authorities (bishops, mullahs, etc.); a government subject to religious authority.

Totalitarian - a government that seeks to subordinate the individual to the state by controlling not only all political and economic matters, but also the attitudes, values, and beliefs of its population.

Greenwich Mean Time (GMT): The mean solar time at the Greenwich Meridian, Greenwich, England, with the hours and days, since 1925, reckoned from midnight. GMT is now a historical term having been replaced by UTC on 1 January 1972. See Coordinated Universal Time.

Gross domestic product: see GDP

Gross national product: see GNP

Gross world product: see GWP

HIV/AIDS - adult prevalence rate: This entry gives an estimate of the percentage of adults (aged 15-49) living with HIV/AIDS. The adult prevalence rate is calculated by dividing the estimated number of adults living with HIV/AIDS at yearend by the total adult population at yearend.

HIV/AIDS - deaths: This entry gives an estimate of the number of adults and children who died of AIDS during a given calendar year.

HIV/AIDS - people living with HIV/AIDS: This entry gives an estimate of all people (adults and children) alive at yearend with HIV infection, whether or not they have developed symptoms of AIDS.

Heliports: This entry gives the total number of heliports with hard- surface runways, helipads, or landing areas that support routine sustained helicopter operations exclusively and have support facilities including one or more of the following facilities: lighting, fuel, passenger handling, or maintenance. It includes former airports used exclusively for helicopter operations but excludes heliports limited to day operations and natural clearings that could support helicopter landings and takeoffs.

Household income or consumption by percentage share: Data on household income or consumption come from household surveys, the results adjusted for household size. Nations use different standards and procedures in collecting and adjusting the data.

Surveys based on income will normally show a more unequal distribution than surveys based on consumption. The quality of surveys is improving with time, yet caution is still necessary in making inter-country comparisons.

Hydrographic data codes: see Data codes

Illicit drugs: This entry gives information on the five categories of illicit drugs - narcotics, stimulants, depressants (sedatives), hallucinogens, and cannabis. These categories include many drugs legally produced and prescribed by doctors as well as those illegally produced and sold outside of medical channels.

Cannabis (*Cannabis sativa*) is the common hemp plant, which provides hallucinogens with some sedative properties, and includes marijuana (pot, Acapulco gold, grass, reefer), tetrahydrocannabinol (THC, Marinol), hashish (hash), and hashish oil (hash oil).

Coca (mostly *Erythroxylum coca*) is a bush with leaves that contain the stimulant used to make cocaine. Coca is not to be confused with cocoa, which comes from cacao seeds and is used in making chocolate, cocoa, and cocoa butter.

Cocaine is a stimulant derived from the leaves of the coca bush.

Depressants (sedatives) are drugs that reduce tension and anxiety and include chloral hydrate, barbiturates (Amytal, Nembutal, Seconal, phenobarbital), benzodiazepines (Librium, Valium), methaqualone (Quaalude), glutethimide (Doriden), and others (Equanil, Placidyl, Valmid).

Drugs are any chemical substances that effect a physical, mental, emotional, or behavioral change in an individual.

Drug abuse is the use of any licit or illicit chemical substance that results in physical, mental, emotional, or behavioral impairment in an individual.

Hallucinogens are drugs that affect sensation, thinking, self-awareness, and emotion. Hallucinogens include LSD (acid, microdot), mescaline and peyote (mexc, buttons, cactus), amphetamine variants (PMA, STP, DOB), phencyclidine (PCP, angel dust, hog), phencyclidine analogues (PCE, PCPy, TCP), and others (psilocybin, psilocyn).

Hashish is the resinous exudate of the cannabis or hemp plant (*Cannabis sativa*).

Heroin is a semisynthetic derivative of morphine.

Mandrax is a trade name for methaqualone, a pharmaceutical depressant.

Marijuana is the dried leaf of the cannabis or hemp plant (*Cannabis sativa*).

Methaqualone is a pharmaceutical depressant, referred to as mandrax in Southwest Asia and Africa.

Narcotics are drugs that relieve pain, often induce sleep, and refer to opium, opium derivatives, and synthetic substitutes. Natural narcotics include opium (paregoric, parepectolin), morphine (MS-Contin, Roxanol), codeine (Tylenol with codeine, Empirin with codeine, Robitussin AC), and thebaine. Semisynthetic narcotics include heroin (horse, smack), and hydromorphone (Dilaudid). Synthetic narcotics include meperidine or Pethidine (Demerol, Mepergan), methadone (Dolophine, Methadose), and others (Darvon, Lomotil).

Opium is the brown, gummy exudate of the incised, unripe seedpod of the opium poppy.

Opium poppy (*Papaver somniferum*) is the source for the natural and semisynthetic narcotics.

Poppy straw is the entire cut and dried opium poppy-plant material, other than the seeds. Opium is extracted from poppy straw in commercial operations that produce the drug for medical use.

Qat (kat, khat) is a stimulant from the buds or leaves of *Catha edulis* that is chewed or drunk as tea.

Quaaludes is the North American slang term for methaqualone, a pharmaceutical depressant.

Stimulants are drugs that relieve mild depression, increase energy and activity, and include cocaine (coke, snow, crack), amphetamines (Desoxyn, Dexedrine), ephedrine, ecstasy (clarity, essence, doctor, Adam), phenmetrazine (Preludin), methylphenidate (Ritalin), and others (Cylert, Sanorex, Tenuate).

Imports: This entry provides the total US dollar amount of merchandise imports on a c.i.f. (cost, insurance, and freight) or f.o.b. (free on board) basis. These figures are calculated on an exchange rate basis, i.e., not in purchasing power parity (PPP) terms.

Imports - commodities: This entry provides a listing of the highest- valued imported products; it sometimes includes the percent of total dollar value.

Imports - partners: This entry provides a rank ordering of trading partners starting with the most important; it sometimes includes the percent of total dollar value.

Independence: For most countries, this entry gives the date that sovereignty was achieved and from which nation, empire, or trusteeship. For the other countries, the date given may not represent "independence" in the strict sense, but rather some significant nationhood event such as the traditional founding date or the date of unification, federation, confederation, establishment, fundamental change in the form of government, or state succession. Dependent areas include the notation "none" followed by the nature of their dependency status. Also see the Terminology note.

Industrial production growth rate: This entry gives the annual percentage increase in industrial production (includes manufacturing, mining, and construction).

Industries: This entry provides a rank ordering of industries starting with the largest by value of annual output.

Infant mortality rate: This entry gives the number of deaths of infants under one year old in a given year per 1,000 live births in the same year; included is the total death rate, and deaths by sex, male and female. This rate is often used as an indicator of the level of health in a country.

Inflation rate (consumer prices): This entry furnishes the annual percent change in consumer prices compared with the previous year's consumer prices.

International disputes: see Disputes - international

International organization participation: This entry lists in alphabetical order by abbreviation those international organizations in which the subject country is a member or participates in some other way.

International organizations: This information is presented in Appendix B: International Organizations and Groups which includes the name, abbreviation, date established, aim, and members by category.

Internet country code: This entry includes the two-letter codes maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and

used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

Internet hosts: This entry lists the number of Internet hosts available within a country. An Internet host is a computer connected directly to the Internet; normally an Internet Service Provider's (ISP) computer is a host. Internet users may use either a hard-wired terminal, at an institution with a mainframe computer connected directly to the Internet, or may connect remotely by way of a modem via telephone line, cable, or satellite to the Internet Service Provider's host computer. The number of hosts is one indicator of the extent of Internet connectivity.

Internet users: This entry gives the number of users within a country that access the Internet. Statistics vary from country to country and may include users who access the Internet at least several times a week to those who access it only once within a period of several months.

Introduction: This category includes one entry, Background.

Investment (gross fixed): This entry records total business spending on fixed assets, such as factories, machinery, equipment, dwellings, and inventories of raw materials, which provide the basis for future production. It is measured gross of the depreciation of the assets, i.e., it includes investment that merely replaces worn-out or scrapped capital.

Irrigated land: This entry gives the number of square kilometers of land area that is artificially supplied with water.

Judicial branch: This entry contains the name(s) of the highest court(s) and a brief description of the selection process for members.

Labor force: This entry contains the total labor force figure.

Labor force - by occupation: This entry lists the percentage distribution of the labor force by occupation. The distribution will total less than 100 percent if the data are incomplete.

Land boundaries: This entry contains the total length of all land boundaries and the individual lengths for each of the contiguous border countries. When available, official lengths published by national statistical agencies are used. Because surveying methods may differ, country border lengths reported by contiguous countries may differ.

Land use: This entry contains the percentage shares of total land area for three different types of land use: arable land - land cultivated for crops like wheat, maize, and rice that are replanted after each harvest; permanent crops - land cultivated for crops like citrus, coffee, and rubber that are not replanted after each harvest; includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber; other - any land not arable or under permanent crops; includes permanent meadows and pastures, forests and woodlands, built-on areas, roads, barren land, etc.

Languages: This entry provides a rank ordering of languages starting with the largest and sometimes includes the percent of total population speaking that language.

Legal system: This entry contains a brief description of the legal system's historical roots, role in government, and acceptance of International Court of Justice (ICJ) jurisdiction.

Legislative branch: This entry contains information on the structure (unicameral, bicameral, tricameral), formal name, number of seats, and term of office. Elections includes the nature of election process or accession to power, date of the last election, and date of the next election. Election results includes the percent of vote and/or number of seats held by each party in the last election.

Life expectancy at birth: This entry contains the average number of years to be lived by a group of people born in the same year, if mortality at each age remains constant in the future. The entry includes total population as well as the male and female components. Life expectancy at birth is also a measure of overall quality of life in a country and summarizes the mortality at all ages. It can also be thought of as indicating the potential return on investment in human capital and is necessary for the calculation of various actuarial measures.

Literacy: This entry includes a definition of literacy and Census Bureau percentages for the total population, males, and females. There are no universal definitions and standards of literacy. Unless otherwise specified, all rates are based on the most common definition - the ability to read and write at a specified age. Detailing the standards that individual countries use to assess the ability to read and write is beyond the scope of the Factbook. Information on literacy, while not a perfect measure of educational results, is probably the most easily available and valid for international comparisons. Low levels of literacy, and education in general, can impede the economic development of a country in the current rapidly changing, technology- driven world.

Location: This entry identifies the country's regional location, neighboring countries, and adjacent bodies of water.

Major infectious diseases: This entry lists major infectious diseases likely to be encountered in countries where the risk of such diseases is assessed to be very high as compared to the United States. These infectious diseases represent risks to US government personnel traveling to the specified country for a period of less than three years. The degree of risk is assessed by considering the foreign nature of these infectious diseases, their severity, and the probability of being affected by the diseases present. The diseases listed do not necessarily represent the total disease burden experienced by the local population.

The risk to an individual traveler varies considerably by the specific location, visit duration, type of activities, type of accommodations, time of year, and other factors. Consultation with a travel medicine physician is needed to evaluate individual risk and recommend appropriate preventive measures such as vaccines.

Diseases are organized into the following six exposure categories shown in *italics* and listed in typical descending order of risk. Note: The sequence of exposure categories listed in individual country entries may vary according to local conditions.

food or waterborne diseases acquired through eating or drinking on the local economy:

Hepatitis A - viral disease that interferes with the functioning of the liver; spread through consumption of food or water contaminated with fecal matter, principally in areas of poor sanitation; victims exhibit fever, jaundice, and diarrhea; 15% of victims will experience prolonged symptoms over 6-9 months; vaccine available.

Hepatitis E - water-borne viral disease that interferes with the functioning of the liver; most commonly spread through fecal contamination of drinking water; victims exhibit jaundice, fatigue, abdominal pain, and dark colored urine.

Typhoid fever - bacterial disease spread through contact with food or water contaminated by fecal matter or sewage; victims exhibit sustained high fevers; left untreated, mortality rates can reach 20%.

vectorborne diseases acquired through the bite of an infected arthropod:

Malaria - caused by single-cell parasitic protozoa Plasmodium; transmitted to humans via the bite of the female Anopheles mosquito; parasites multiply in the liver attacking

red blood cells resulting in cycles of fever, chills, and sweats accompanied by anemia; death due to damage to vital organs and interruption of blood supply to the brain; endemic in 100, mostly tropical, countries with 90% of cases and the majority of 1.5-2.5 million estimated annual deaths occurring in sub-Saharan Africa.

Dengue fever - mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments; manifests as sudden onset of fever and severe headache; occasionally produces shock and hemorrhage leading to death in 5% of cases.

Yellow fever - mosquito-borne viral disease; severity ranges from influenza-like symptoms to severe hepatitis and hemorrhagic fever; occurs only in tropical South America and sub-Saharan Africa, where most cases are reported; fatality rate is less than 20%.

Japanese Encephalitis - mosquito-borne (*Culex tritaeniorhynchus*) viral disease associated with rural areas in Asia; acute encephalitis can progress to paralysis, coma, and death; fatality rates 30%.

African Trypanosomiasis - caused by the parasitic protozoa *Trypanosoma*; transmitted to humans via the bite of bloodsucking Tsetse flies; infection leads to malaise and irregular fevers and, in advanced cases when the parasites invade the central nervous system, coma and death; endemic in 36 countries of sub-Saharan Africa; cattle and wild animals act as reservoir hosts for the parasites.

Cutaneous Leishmaniasis - caused by the parasitic protozoa *leishmania*; transmitted to humans via the bite of sandflies; results in skin lesions that may become chronic; endemic in 88 countries; 90% of cases occur in Iran, Afghanistan, Syria, Saudi Arabia, Brazil, and Peru; wild and domesticated animals as well as humans can act as reservoirs of infection.

Plague - bacterial disease transmitted by fleas normally associated with rats; person-to-person airborne transmission also possible; recent plague epidemics occurred in areas of Asia, Africa, and South America associated with rural areas or small towns and villages; manifests as fever, headache, and painfully swollen lymph nodes; disease progresses rapidly and without antibiotic treatment leads to pneumonic form with a death rate in excess of 50%.

Crimean-Congo hemorrhagic fever - tick-borne viral disease; infection may also result from exposure to infected animal blood or tissue; geographic distribution includes Africa, Asia, the Middle East, and Eastern Europe; sudden onset of fever, headache,

and muscle aches followed by hemorrhaging in the bowels, urine, nose, and gums; mortality rate is approximately 30%.

Rift Valley fever - viral disease affecting domesticated animals and humans; transmission is by mosquito and other biting insects; infection may also occur through handling of infected meat or contact with blood; geographic distribution includes eastern and southern Africa where cattle and sheep are raised; symptoms are generally mild with fever and some liver abnormalities, but the disease may progress to hemorrhagic fever, encephalitis, or ocular disease; fatality rates are low at about 1% of cases.

Chikungunya - mosquito-borne (*Aedes aegypti*) viral disease associated with urban environments, similar to Dengue Fever; characterized by sudden onset of fever, rash, and severe joint pain usually lasting 3-7 days, some cases result in persistent arthritis.

water contact diseases acquired through swimming or wading in freshwater lakes, streams, and rivers:

Leptospirosis - bacterial disease that affects animals and humans; infection occurs through contact with water, food, or soil contaminated by animal urine; symptoms include high fever, severe headache, vomiting, jaundice, and diarrhea; untreated, the disease can result in kidney damage, liver failure, meningitis, or respiratory distress; fatality rates are low but left untreated recovery can take months.

Schistosomiasis - caused by parasitic trematode flatworm *Schistosoma*; fresh water snails act as intermediate host and release larval form of parasite that penetrates the skin of people exposed to contaminated water; worms mature and reproduce in the blood vessels, liver, kidneys, and intestines releasing eggs, which become trapped in tissues triggering an immune response; may manifest as either urinary or intestinal disease resulting in decreased work or learning capacity; mortality, while generally low, may occur in advanced cases usually due to bladder cancer; endemic in 74 developing countries with 80% of infected people living in sub-Saharan Africa; humans act as the reservoir for this parasite.

aerosolized dust or soil contact disease acquired through inhalation of aerosols contaminated with rodent urine:

Lassa fever - viral disease carried by rats of the genus *Mastomys*; endemic in portions of West Africa; infection occurs through direct contact with or consumption of food

contaminated by rodent urine or fecal matter containing virus particles; fatality rate can reach 50% in epidemic outbreaks.

respiratory disease acquired through close contact with an infectious person:

Meningococcal meningitis - bacterial disease causing an inflammation of the lining of the brain and spinal cord; one of the most important bacterial pathogens is *Neisseria meningitidis* because of its potential to cause epidemics; symptoms include stiff neck, high fever, headaches, and vomiting; bacteria are transmitted from person to person by respiratory droplets and facilitated by close and prolonged contact resulting from crowded living conditions, often with a seasonal distribution; death occurs in 5-15% of cases, typically within 24-48 hours of onset of symptoms; highest burden of meningococcal disease occurs in the hyperendemic region of sub-Saharan Africa known as the "Meningitis Belt" which stretches from Senegal east to Ethiopia.

animal contact disease acquired through direct contact with local animals:

Rabies - viral disease of mammals usually transmitted through the bite of an infected animal, most commonly dogs; virus affects the central nervous system causing brain alteration and death; symptoms initially are non-specific fever and headache progressing to neurological symptoms; death occurs within days of the onset of symptoms.

Manpower available for military service: This entry gives the number of males and females falling in the military age range for a country (defined as being ages 16-49) and assumes that every individual is fit to serve.

Manpower fit for military service: This entry gives the number of males and females falling in the military age range for a country (defined as being ages 16-49) and who are not otherwise disqualified for health reasons; accounts for the health situation in the country and provides a more realistic estimate of the actual number fit to serve.

Manpower reaching militarily significant age annually: This entry gives the number of males and females entering the military manpower pool (i.e., reaching age 16) in any given year and is a measure of the availability of military-age young adults.

Map references: This entry includes the name of the Factbook reference map on which a country may be found. Note that boundary representations on these maps are not necessarily authoritative. The entry on Geographic coordinates may be helpful in finding some smaller countries.

Maritime claims: This entry includes the following claims, the definitions of which are excerpted from the United Nations Convention on the Law of the Sea (UNCLOS), which alone contains the full and definitive descriptions:

territorial sea - the sovereignty of a coastal state extends beyond its land territory and internal waters to an adjacent belt of sea, described as the territorial sea in the UNCLOS (Part II); this sovereignty extends to the air space over the territorial sea as well as its underlying seabed and subsoil; every state has the right to establish the breadth of its territorial sea up to a limit not exceeding 12 nautical miles; the normal baseline for measuring the breadth of the territorial sea is the mean low-water line along the coast as marked on large-scale charts officially recognized by the coastal state; the UNCLOS describes specific rules for archipelagic states.

contiguous zone - according to the UNCLOS (Article 33), this is a zone contiguous to a coastal state's territorial sea, over which it may exercise the control necessary to: prevent infringement of its customs, fiscal, immigration, or sanitary laws and regulations within its territory or territorial sea; punish infringement of the above laws and regulations committed within its territory or territorial sea; the contiguous zone may not extend beyond 24 nautical miles from the baselines from which the breadth of the territorial sea is measured (e.g. the US has claimed a 12-nautical mile contiguous zone in addition to its 12-nautical mile territorial sea).

exclusive economic zone (EEZ) - the UNCLOS (Part V) defines the EEZ as a zone beyond and adjacent to the territorial sea in which a coastal state has: sovereign rights for the purpose of exploring and exploiting, conserving and managing the natural resources, whether living or non-living, of the waters superjacent to the seabed and of the seabed and its subsoil, and with regard to other activities for the economic exploitation and exploration of the zone, such as the production of energy from the water, currents, and winds; jurisdiction with regard to the establishment and use of artificial islands, installations, and structures; marine scientific research; the protection and preservation of the marine environment; the outer limit of the exclusive economic zone shall not exceed 200 nautical miles from the baselines from which the breadth of the territorial sea is measured.

continental shelf - the UNCLOS (Article 76) defines the continental shelf of a coastal state as comprising the seabed and subsoil of the submarine areas that extend beyond its territorial sea throughout the natural prolongation of its land territory to the outer edge of the continental margin, or to a distance of 200 nautical miles from the baselines from which the breadth of the territorial sea is measured where the outer edge of the

continental margin does not extend up to that distance; the continental margin comprises the submerged prolongation of the landmass of the coastal state, and consists of the seabed and subsoil of the shelf, the slope and the rise; wherever the continental margin extends beyond 200 nautical miles from the baseline, coastal states may extend their claim to a distance not to exceed 350 nautical miles from the baseline or 100 nautical miles from the 2500 meter isobath; it does not include the deep ocean floor with its oceanic ridges or the subsoil thereof.

exclusive fishing zone - while this term is not used in the UNCLOS, some states (e.g., the United Kingdom) have chosen not to claim an EEZ, but rather to claim jurisdiction over the living resources off their coast; in such cases, the term exclusive fishing zone is often used; the breadth of this zone is normally the same as the EEZ or 200 nautical miles.

Market value of publicly traded shares: This entry gives the value of shares issued by publicly traded companies at a price determined in the national stock markets on the final day of the period indicated. It is simply the latest price per share multiplied by the total number of outstanding shares, cumulated over all companies listed on the particular exchange.

Median age: This entry is the age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population. Currently, the median age ranges from a low of about 15 in Uganda and Gaza Strip to 40 or more in several European countries and Japan. See the entry for "Age structure" for the importance of a young versus an older age structure and, by implication, a low versus a higher median age.

Merchant marine: Merchant marine may be defined as all ships engaged in the carriage of goods; or all commercial vessels (as opposed to all nonmilitary ships), which excludes tugs, fishing vessels, offshore oil rigs, etc. This entry contains information in four fields - total, ships by type, foreign-owned, and registered in other countries.

Total includes the number of ships (1,000 GRT or over), total DWT for those ships, and total GRT for those ships. DWT or dead weight tonnage is the total weight of cargo, plus bunkers, stores, etc., that a ship can carry when immersed to the appropriate load line. GRT or gross register tonnage is a figure obtained by measuring the entire sheltered volume of a ship available for cargo and passengers and converting it to tons

on the basis of 100 cubic feet per ton; there is no stable relationship between GRT and DWT.

Ships by type includes a listing of barge carriers, bulk cargo ships, cargo ships, chemical tankers, combination bulk carriers, combination ore/oil carriers, container ships, liquefied gas tankers, livestock carriers, multifunctional large-load carriers, petroleum tankers, passenger ships, passenger/cargo ships, railcar carriers, refrigerated cargo ships, roll-on/roll-off cargo ships, short-sea passenger ships, specialized tankers, and vehicle carriers.

Foreign-owned are ships that fly the flag of one country but belong to owners in another.

Registered in other countries are ships that belong to owners in one country but fly the flag of another.

Military: This category includes the entries dealing with a country's military structure, manpower, and expenditures.

Military - note: This entry includes miscellaneous military information of significance not included elsewhere.

Military branches: This entry lists the service branches subordinate to defense ministries or the equivalent (typically ground, naval, air, and marine forces).

Military expenditures: This entry gives spending on defense programs for the most recent year available as a percent of gross domestic product (GDP); the GDP is calculated on an exchange rate basis, i.e., not in terms of purchasing power parity (PPP).

Military service age and obligation: This entry gives the required ages for voluntary or conscript military service and the length of service obligation.

Money figures: All money figures are expressed in contemporaneous US dollars unless otherwise indicated.

National holiday: This entry gives the primary national day of celebration - usually independence day.

Nationality: This entry provides the identifying terms for citizens - noun and adjective.

Natural gas - consumption: This entry is the total natural gas consumed in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors.

Natural gas - exports: This entry is the total natural gas exported in cubic meters (cu m).

Natural gas - imports: This entry is the total natural gas imported in cubic meters (cu m).

Natural gas - production: This entry is the total natural gas produced in cubic meters (cu m). The discrepancy between the amount of natural gas produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes and other complicating factors.

Natural gas - proved reserves: This entry is the stock of proved reserves of natural gas in cubic meters (cu m). Proved reserves are those quantities of natural gas, which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

Natural hazards: This entry lists potential natural disasters.

Natural resources: This entry lists a country's mineral, petroleum, hydropower, and other resources of commercial importance.

Net migration rate: This entry includes the figure for the difference between the number of persons entering and leaving a country during the year per 1,000 persons (based on midyear population). An excess of persons entering the country is referred to as net immigration (e.g., 3.56 migrants/1,000 population); an excess of persons leaving the country as net emigration (e.g., -9.26 migrants/1,000 population). The net migration rate indicates the contribution of migration to the overall level of population change. High levels of migration can cause problems such as increasing unemployment and potential ethnic strife (if people are coming in) or a reduction in the labor force, perhaps in certain key sectors (if people are leaving).

Oil - consumption: This entry is the total oil consumed in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount

consumed and/or exported is due to the omission of stock changes, refinery gains, and other complicating factors.

Oil - exports: This entry is the total oil exported in barrels per day (bbl/day), including both crude oil and oil products.

Oil - imports: This entry is the total oil imported in barrels per day (bbl/day), including both crude oil and oil products.

Oil - production: This entry is the total oil produced in barrels per day (bbl/day). The discrepancy between the amount of oil produced and/or imported and the amount consumed and/or exported is due to the omission of stock changes, refinery gains, and other complicating factors.

Oil - proved reserves: This entry is the stock of proved reserves of crude oil in barrels (bbl). Proved reserves are those quantities of petroleum which, by analysis of geological and engineering data, can be estimated with a high degree of confidence to be commercially recoverable from a given date forward, from known reservoirs and under current economic conditions.

People: This category includes the entries dealing with the characteristics of the people and their society.

People - note: This entry includes miscellaneous demographic information of significance not included elsewhere.

Personal Names - Capitalization: The Factbook capitalizes the surname or family name of individuals for the convenience of our users who are faced with a world of different cultures and naming conventions. The need for capitalization, bold type, underlining, italics, or some other indicator of the individual's surname is apparent in the following examples: MAO Zedong, Fidel CASTRO Ruz, George W. BUSH, and TUNKU SALAHUDDIN Abdul Aziz Shah ibni Al-Marhum Sultan Hisammuddin Alam Shah. By knowing the surname, a short form without all capital letters can be used with confidence as in President Castro, Chairman Mao, President Bush, or Sultan Tunku Salahuddin. The same system of capitalization is extended to the names of leaders with surnames that are not commonly used such as Queen ELIZABETH II. For Vietnamese names, the given name is capitalized because officials are referred to by their given name rather than by their surname. For example, the president of Vietnam is Tran Duc LUONG. His surname is Tran, but he is referred to by his given name - President LUONG.

Personal Names - Spelling: The romanization of personal names in the Factbook normally follows the same transliteration system used by the US Board on Geographic Names for spelling place names. At times, however, a foreign leader expressly indicates a preference for, or the media or official documents regularly use, a romanized spelling that differs from the transliteration derived from the US Government standard. In such cases, the Factbook uses the alternative spelling.

Personal Names - Titles: The Factbook capitalizes any valid title (or short form of it) immediately preceding a person's name. A title standing alone is not capitalized. Examples: President PUTIN and President BUSH are chiefs of state. In Russia, the president is chief of state and the premier is the head of the government, while in the US, the president is both chief of state and head of government.

Petroleum: See entries under Oil.

Petroleum products: See entries under Oil.

Pipelines: This entry gives the lengths and types of pipelines for transporting products like natural gas, crude oil, or petroleum products.

Political parties and leaders: This entry includes a listing of significant political organizations and their leaders.

Political pressure groups and leaders: This entry includes a listing of a country's political, social, labor, or religious organizations that are involved in politics, or that exert political pressure, but whose leaders do not stand for legislative election. International movements or organizations are generally not listed.

Population: This entry gives an estimate from the US Bureau of the Census based on statistics from population censuses, vital statistics registration systems, or sample surveys pertaining to the recent past and on assumptions about future trends. The total population presents one overall measure of the potential impact of the country on the world and within its region. Note: Starting with the 1993 Factbook, demographic estimates for some countries (mostly African) have explicitly taken into account the effects of the growing impact of the HIV/AIDS epidemic. These countries are currently: The Bahamas, Benin, Botswana, Brazil, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Central African Republic, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Ethiopia, Gabon, Ghana, Guyana, Haiti, Honduras, Kenya, Lesotho, Malawi, Mozambique, Namibia, Nigeria, Rwanda, South Africa, Swaziland, Tanzania, Thailand, Togo, Uganda, Zambia, and Zimbabwe.

Population growth rate: The average annual percent change in the population, resulting from a surplus (or deficit) of births over deaths and the balance of migrants entering and leaving a country. The rate may be positive or negative. The growth rate is a factor in determining how great a burden would be imposed on a country by the changing needs of its people for infrastructure (e.g., schools, hospitals, housing, roads), resources (e.g., food, water, electricity), and jobs. Rapid population growth can be seen as threatening by neighboring countries.

Ports and terminals: This entry lists major ports and terminals primarily on the basis of the amount of cargo tonnage shipped through the facilities on an annual basis. In some instances, the number of containers handled or ship visits were also considered.

Public debt: This entry records the cumulative total of all government borrowings less repayments that are denominated in a country's home currency. Public debt should not be confused with external debt, which reflects the foreign currency liabilities of both the private and public sector and must be financed out of foreign exchange earnings.

Radio broadcast stations: This entry includes the total number of AM, FM, and shortwave broadcast stations.

Railways: This entry states the total route length of the railway network and of its component parts by gauge: broad, standard, narrow, and dual. Other gauges are listed under note.

Reference maps: This section includes world and regional maps.

Refugees and internally displaced persons: This entry includes those persons residing in a country as refugees or internally displaced persons (IDPs). The definition of a refugee according to a United Nations Convention is "a person who is outside his/her country of nationality or habitual residence; has a well-founded fear of persecution because of his/her race, religion, nationality, membership in a particular social group or political opinion; and is unable or unwilling to avail himself/herself of the protection of that country, or to return there, for fear of persecution." The UN established the Office of the UN High Commissioner for Refugees (UNHCR) in 1950 to handle refugee matters worldwide. The UN Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) has a different operational definition for a Palestinian refugee: "a person whose normal place of residence was Palestine during the period 1 June 1946 to 15 May 1948 and who lost both home and means of livelihood as a result of the 1948 conflict." However, UNHCR also assists some 400,000 Palestinian refugees not covered under the UNRWA definition. The term "internally displaced person" is not

specifically covered in the UN Convention; it is used to describe people who have fled their homes for reasons similar to refugees, but who remain within their own national territory and are subject to the laws of that state.

Religions: This entry is an ordered listing of religions by adherents starting with the largest group and sometimes includes the percent of total population. The core characteristics and beliefs of the world's major religions are described below.

Baha'i - Founded by Mirza Husayn-Ali (known as Baha'u'llah) in Iran in 1852, Baha'i faith emphasizes monotheism and believes in one eternal transcendent God. Its guiding focus is to encourage the unity of all peoples on the earth so that justice and peace may be achieved on earth. Baha'i revelation contends the prophets of major world religions reflect some truth or element of the divine, believes all were manifestations of God given to specific communities in specific times, and that Baha'u'llah is an additional prophet meant to call all humankind. Bahais are an open community, located worldwide, with the greatest concentration of believers in South Asia.

Buddhism - Religion or philosophy inspired by the 5th century B.C. teachings of Siddhartha Gautama (also known as Gautama Buddha "the enlightened one"). Buddhism focuses on the goal of spiritual enlightenment centered on an understanding of Gautama Buddha's Four Noble Truths on the nature of suffering, and on the Eightfold Path of spiritual and moral practice, to break the cycle of suffering of which we are a part. Buddhism ascribes to a karmic system of rebirth. Several schools and sects of Buddhism exist, differing often on the nature of the Buddha, the extent to which enlightenment can be achieved - for one or for all, and by whom - religious orders or laity.

Basic Groupings

Theravada Buddhism: The oldest Buddhist school, Theravada is practiced mostly in Sri Lanka, Cambodia, Laos, Burma, and Thailand, with minority representation elsewhere in Asia and the West. Theravadans follow the Pali Canon of Buddha's teachings, and believe that one may escape the cycle of rebirth, worldly attachment, and suffering for oneself; this process may take one or several lifetimes.

Mahayana Buddhism, including subsets Zen and Tibetan Buddhism: Forms of Mahayana Buddhism are common in East Asia and Tibet, and parts of the West. Mahayanas have additional scriptures beyond the Pali Canon and believe the Buddha is eternal and still teaching. Unlike Theravada Buddhism, Mahayana schools maintain the Buddha-nature is present in all beings and all will ultimately achieve enlightenment.

Christianity - Descending from Judaism, Christianity's central belief maintains Jesus of Nazareth is the promised messiah of the Hebrew Scriptures, and that his life, death, and resurrection are salvific for the world. Christianity is one of the three monotheistic Abrahamic faiths, along with Islam and Judaism, which traces its spiritual lineage to Abraham of the Hebrew Scriptures. Its sacred texts include the Hebrew Bible and the New Testament (or the Christian Gospels).

Basic Groupings

Catholicism (or Roman Catholicism): This is the oldest established western Christian church and the world's largest single religious body. It is supranational, and recognizes a hierarchical structure with the Pope, or Bishop of Rome, as its head, located at the Vatican. Catholics believe the Pope is the divinely ordered head of the Church from a direct spiritual legacy of Jesus' apostle Peter. Catholicism is comprised of 23 particular Churches, or Rites - one Western (Latin- Rite) and 22 Eastern. The Latin Rite is by far the largest, making up about 98% of Catholic membership. Eastern-Rite Churches, such as the Maronite Church and the Ukrainian Catholic Church, are in communion with Rome although they preserve their own worship traditions and their immediate hierarchy consists of clergy within their own rite. The Catholic Church has a comprehensive theological and moral doctrine specified for believers in its catechism, which makes it unique among most forms of Christianity.

Mormonism (including the Church of Jesus Christ of Latter-Day Saints): Originating in 1830 in the United States under Joseph Smith, Mormonism is not characterized as a form of Protestant Christianity because it claims additional revealed Christian scriptures after the Hebrew Bible and New Testament. The Book of Mormon maintains there was an appearance of Jesus in the New World following the Christian account of his resurrection, and that the Americas are uniquely blessed continents. Mormonism believes earlier Christian traditions, such as the Roman Catholic, Orthodox, and Protestant reform faiths, are apostasies and that Joseph Smith's revelation of the Book of Mormon is a restoration of true Christianity. Mormons have a hierarchical religious leadership structure, and actively proselytize their faith; they are located primarily in the Americas and in a number of other Western countries.

Orthodox Christianity: The oldest established eastern form of Christianity, the Holy Orthodox Church, has a ceremonial head in the Bishop of Constantinople (Istanbul), also known as a Patriarch, but its various regional forms (e.g., Greek Orthodox, Russian Orthodox, Serbian Orthodox, Ukrainian Orthodox) are autocephalous (independent of Constantinople's authority, and have their own Patriarchs). Orthodox churches are

highly nationalist and ethnic. The Orthodox Christian faith shares many theological tenets with the Roman Catholic Church, but diverges on some key premises and does not recognize the governing authority of the Pope.

Protestant Christianity: Protestant Christianity originated in the 16th century as an attempt to reform Roman Catholicism's practices, dogma, and theology. It encompasses several forms or denominations which are extremely varied in structure, beliefs, relationship to state, clergy, and governance. Many protestant theologies emphasize the primary role of scripture in their faith, advocating individual interpretation of Christian texts without the mediation of a final religious authority such as the Roman Pope. The oldest Protestant Christianities include Lutheranism, Calvinism (Presbyterians), and Anglican Christianity (Episcopalians), which have established liturgies, governing structure, and formal clergy. Other variants on Protestant Christianity, including Pentecostal movements and independent churches, may lack one or more of these elements, and their leadership and beliefs are individualized and dynamic.

Hinduism - Originating in the Vedic civilization of India (second and first millennium B.C.), Hinduism is an extremely diverse set of beliefs and practices with no single founder or religious authority. Hinduism has many scriptures; the Vedas, the Upanishads, and the Bhagavad-Gita are among some of the most important. Hindus may worship one or many deities, usually with prayer rituals within their own home. The most common figures of devotion are the gods Vishnu, Shiva, and a mother goddess, Devi. Most Hindus believe the soul, or atman, is eternal, and goes through a cycle of birth, death, and rebirth (samsara) determined by one's positive or negative karma, or the consequences of one's actions. The goal of religious life is to learn to act so as to finally achieve liberation (moksha) of one's soul, escaping the rebirth cycle.

Islam - The third of the monotheistic Abrahamic faiths, Islam originated with the teachings of Muhammad in the 7th century. Muslims believe Muhammad is the final of all religious prophets (beginning with Abraham) and that the Qu'ran, which is the Islamic scripture, was revealed to him by God. Islam derives from the word submission, and obedience to God is a primary theme in this religion. In order to live an Islamic life, believers must follow the five pillars, or tenets, of Islam, which are the testimony of faith (shahada), daily prayer (salah), giving alms (zakah), fasting during Ramadan (sawm), and the pilgrimage to Mecca (hajj).

Basic Groupings

The two primary branches of Islam are Sunni and Shia, which split from each other over a religio-political leadership dispute about the rightful successor to Muhammad. The Shia believe Muhammad's cousin and son-in-law, Ali, was the only divinely ordained Imam (religious leader), while the Sunni maintain the first three caliphs after Muhammad were also legitimate authorities. In modern Islam, Sunnis and Shia continue to have different views of acceptable schools of Islamic jurisprudence, and who is a proper Islamic religious authority. Islam also has an active mystical branch, Sufism, with various Sunni and Shia subsets.

Sunni Islam accounts for over 75% of the world's Muslim population. It recognizes the Abu Bakr as the first caliph after Muhammad. Sunni has four schools of Islamic doctrine and law - Hanafi, Maliki, Shafi'i, and Hanbali - which uniquely interpret the Hadith, or recorded oral traditions of Muhammad. A Sunni Muslim may elect to follow any one of these schools, as all are considered equally valid.

Shia Islam represents 10-20% of Muslims worldwide, and its distinguishing feature is its reverence for Ali as an infallible, divinely inspired leader, and as the first Imam of the Muslim community after Muhammad. A majority of Shia are known as "Twelvers," because they believe that the 11 familial successor imams after Muhammad culminate in a 12th Imam (al-Mahdi) who is hidden in the world and will reappear at its end to redeem the righteous.

Variants

Ismaili faith: A sect of Shia Islam, its adherents are also known as "Seveners," because they believe that the rightful seventh Imam in Islamic leadership was Isma'il, the elder son of Imam Jafar al-Sadiq. Ismaili tradition awaits the return of the seventh Imam as the Mahdi, or Islamic messianic figure. Ismailis are located in various parts of the world, particularly South Asia and the Levant.

Alawi faith: Another Shia sect of Islam, the name reflects followers' devotion to the religious authority of Ali. Alawites are a closed, secretive religious group who assert they are Shia Muslims, although outside scholars speculate their beliefs may have a syncretic mix with other faiths originating in the Middle East. Alawis live mostly in Syria, Lebanon, and Turkey.

Druze faith: A highly secretive tradition and a closed community that derives from the Ismaili sect of Islam; its core beliefs are thought to emphasize a combination of Gnostic principles believing that the Fatimid caliph, al-Hakin, is the one who embodies the key aspects of goodness of the universe, which are, the intellect, the word, the soul,

the preceptor, and the follower. The Druze have a key presence in Syria, Lebanon, and Israel.

Jainism - Originating in India, Jain spiritual philosophy believes in an eternal human soul, the eternal universe, and a principle of "the own nature of things." It emphasizes compassion for all living things, seeks liberation of the human soul from reincarnation through enlightenment, and values personal responsibility due to the belief in the immediate consequences of one's behavior. Jain philosophy teaches non-violence and prescribes vegetarianism for monks and laity alike; its adherents are a highly influential religious minority in Indian society.

Judaism - One of the first known monotheistic religions, likely dating to between 2000-1500 B.C., Judaism is the native faith of the Jewish people, based upon the belief in a covenant of responsibility between a sole omnipotent creator God and Abraham, the patriarch of Judaism's Hebrew Bible, or Tanakh. Divine revelation of principles and prohibitions in the Hebrew Scriptures form the basis of Jewish law, or halakhah, which is a key component of the faith. While there are extensive traditions of Jewish halakhic and theological discourse, there is no final dogmatic authority in the tradition. Local communities have their own religious leadership. Modern Judaism has three basic categories of faith: Orthodox, Conservative, and Reform/Liberal. These differ in their views and observance of Jewish law, with the Orthodox representing the most traditional practice, and Reform/Liberal communities the most accommodating of individualized interpretations of Jewish identity and faith.

Shintoism - A native animist tradition of Japan, Shinto practice is based upon the premise that every being and object has its own spirit or kami. Shinto practitioners worship several particular kamis, including the kamis of nature, and families often have shrines to their ancestors' kamis. Shintoism has no fixed tradition of prayers or prescribed dogma, but is characterized by individual ritual. Respect for the kamis in nature is a key Shinto value. Prior to the end of World War II, Shinto was the state religion of Japan, and bolstered the cult of the Japanese emperor.

Sikhism - Founded by the Guru Nanak (born 1469), Sikhism believes in a non-anthropomorphic, supreme, eternal, creator God; centering one's devotion to God is seen as a means of escaping the cycle of rebirth. Sikhs follow the teachings of Nanak and nine subsequent gurus. Their scripture, the Guru Granth Sahib - also known as the Adi Granth - is considered the living Guru, or final authority of Sikh faith and theology. Sikhism emphasizes equality of humankind and disavows caste, class, or gender discrimination.

Taoism - Chinese philosophy or religion based upon Lao Tzu's Tao Te Ching, which centers on belief in the Tao, or the way, as the flow of the universe and the nature of things. Taoism encourages a principle of non-force, or wu-wei, as the means to live harmoniously with the Tao. Taoists believe the esoteric world is made up of a perfect harmonious balance and nature, while in the manifest world - particularly in the body - balance is distorted. The Three Jewels of the Tao - compassion, simplicity, and humility - serve as the basis for Taoist ethics.

Zoroastrianism - Originating from the teachings of Zoroaster in about the 9th or 10th century B.C., Zoroastrianism may be the oldest continuing creedal religion. Its key beliefs center on a transcendent creator God, Ahura Mazda, and the concept of free will. The key ethical tenets of Zoroastrianism expressed in its scripture, the Avesta, are based on a dualistic worldview where one may prevent chaos if one chooses to serve God and exercises good thoughts, good words, and good deeds. Zoroastrianism is generally a closed religion and members are almost always born to Zoroastrian parents. Prior to the spread of Islam, Zoroastrianism dominated greater Iran. Today, though a minority, Zoroastrians remain primarily in Iran, India, and Pakistan.

Reserves of foreign exchange and gold: This entry gives the dollar value for the stock of all financial assets that are available to the central monetary authority for use in meeting a country's balance of payments needs as of the end-date of the period specified. This category includes not only foreign currency and gold, but also a country's holdings of Special Drawing Rights in the International Monetary Fund, and its reserve position in the Fund.

Roadways: This entry gives the total length of the road network and includes the length of the paved and unpaved portions.

School life expectancy (primary to tertiary): School life expectancy (SLE) is the total number of years of schooling (primary to tertiary) that a child can expect to receive, assuming that the probability of his or her being enrolled in school at any particular future age is equal to the current enrollment ratio at that age. Caution must be maintained when utilizing this indicator in international comparisons. For example, a year or grade completed in one country is not necessarily the same in terms of educational content or quality as a year or grade completed in another country. SLE represents the expected number of years of schooling that will be completed, including years spent repeating one or more grades.

Sex ratio: This entry includes the number of males for each female in five age groups - at birth, under 15 years, 15-64 years, 65 years and over, and for the total population. Sex ratio at birth has recently emerged as an indicator of certain kinds of sex discrimination in some countries. For instance, high sex ratios at birth in some Asian countries are now attributed to sex-selective abortion and infanticide due to a strong preference for sons. This will affect future marriage patterns and fertility patterns. Eventually, it could cause unrest among young adult males who are unable to find partners.

Stock of direct foreign investment - abroad: This entry gives the cumulative US dollar value of all investments in foreign countries made directly by residents - primarily companies - of the home country, as of the end of the time period indicated. Direct investment excludes investment through purchase of shares.

Stock of direct foreign investment - at home: This entry gives the cumulative US dollar value of all investments in the home country made directly by residents - primarily companies - of other countries as of the end of the time period indicated. Direct investment excludes investment through purchase of shares.

Stock of domestic credit: This entry is the total quantity of credit, denominated in the domestic currency, provided by banks to nonbanking institutions. The national currency units have been converted to US dollars at the closing exchange rate on the date of the information.

Stock of money: This entry, also known as "M1," comprises the total quantity of currency in circulation (notes and coins) plus demand deposits denominated in the national currency, held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy. The national currency units have been converted to US dollars at the closing exchange rate on the date of the information.

Stock of quasi money: This entry comprises the total quantity of time and savings deposits denominated in the national currency, held by nonbank financial institutions, state and local governments, nonfinancial public enterprises, and the private sector of the economy. When added together with "M1" the total money supply is known as "M2." The national currency units have been converted to US dollars at the closing exchange rate on the date of the information.

Suffrage: This entry gives the age at enfranchisement and whether the right to vote is universal or restricted.

Telephone numbers: All telephone numbers in The World Factbook consist of the country code in brackets, the city or area code (where required) in parentheses, and the local number. The one component that is not presented is the international access code, which varies from country to country. For example, an international direct dial telephone call placed from the US to Madrid, Spain, would be as follows: 011 [34] (1) 577-xxxx, where 011 is the international access code for station-to-station calls; 01 is for calls other than station-to-station calls, [34] is the country code for Spain, (1) is the city code for Madrid, 577 is the local exchange, and xxxx is the local telephone number. An international direct dial telephone call placed from another country to the US would be as follows: international access code + [1] (202) 939-xxxx, where [1] is the country code for the US, (202) is the area code for Washington, DC, 939 is the local exchange, and xxxx is the local telephone number.

Telephone system: This entry includes a brief general assessment of the system with details on the domestic and international components. The following terms and abbreviations are used throughout the entry:

Arabsat - Arab Satellite Communications Organization (Riyadh, Saudi Arabia).

Autodin - Automatic Digital Network (US Department of Defense).

CB - citizen's band mobile radio communications.

Cellular telephone system - the telephones in this system are radio transceivers, with each instrument having its own private radio frequency and sufficient radiated power to reach the booster station in its area (cell), from which the telephone signal is fed to a telephone exchange.

Central American Microwave System - a trunk microwave radio relay system that links the countries of Central America and Mexico with each other.

Coaxial cable - a multichannel communication cable consisting of a central conducting wire, surrounded by and insulated from a cylindrical conducting shell; a large number of telephone channels can be made available within the insulated space by the use of a large number of carrier frequencies.

Comsat - Communications Satellite Corporation (US).

DSN - Defense Switched Network (formerly Automatic Voice Network or Autovon); basic general-purpose, switched voice network of the Defense Communications System (US Department of Defense).

Eutelsat - European Telecommunications Satellite Organization (Paris).

Fiber-optic cable - a multichannel communications cable using a thread of optical glass fibers as a transmission medium in which the signal (voice, video, etc.) is in the form of a coded pulse of light.

GSM - a global system for mobile (cellular) communications devised by the Groupe Special Mobile of the pan-European standardization organization, Conference Europeenne des Posts et Telecommunications (CEPT) in 1982.

HF - high frequency; any radio frequency in the 3,000- to 30,000-kHz range.

Inmarsat - International Maritime Satellite Organization (London); provider of global mobile satellite communications for commercial, distress, and safety applications at sea, in the air, and on land.

Intelsat - International Telecommunications Satellite Organization (Washington, DC).

Intersputnik - International Organization of Space Communications (Moscow); first established in the former Soviet Union and the East European countries, it is now marketing its services worldwide with earth stations in North America, Africa, and East Asia.

Landline - communication wire or cable of any sort that is installed on poles or buried in the ground.

Marecs - Maritime European Communications Satellite used in the Inmarsat system on lease from the European Space Agency.

Marisat - satellites of the Comsat Corporation that participate in the Inmarsat system.

Medarabtel - the Middle East Telecommunications Project of the International Telecommunications Union (ITU) providing a modern telecommunications network, primarily by microwave radio relay, linking Algeria, Djibouti, Egypt, Jordan, Libya, Morocco, Saudi Arabia,

Somalia, Sudan, Syria, Tunisia, and Yemen; it was initially started in Morocco in 1970 by the Arab Telecommunications Union (ATU) and was known at that time as the Middle East Mediterranean Telecommunications Network.

Microwave radio relay - transmission of long distance telephone calls and television programs by highly directional radio microwaves that are received and sent on from one booster station to another on an optical path.

NMT - Nordic Mobile Telephone; an analog cellular telephone system that was developed jointly by the national telecommunications authorities of the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden).

Orbita - a Russian television service; also the trade name of a packet-switched digital telephone network.

Radiotelephone communications - the two-way transmission and reception of sounds by broadcast radio on authorized frequencies using telephone handsets.

PanAmSat - PanAmSat Corporation (Greenwich, CT).

SAFE - South African Far East Cable

Satellite communication system - a communication system consisting of two or more earth stations and at least one satellite that provide long distance transmission of voice, data, and television; the system usually serves as a trunk connection between telephone exchanges; if the earth stations are in the same country, it is a domestic system.

Satellite earth station - a communications facility with a microwave radio transmitting and receiving antenna and required receiving and transmitting equipment for communicating with satellites.

Satellite link - a radio connection between a satellite and an earth station permitting communication between them, either one-way (down link from satellite to earth station - television receive-only transmission) or two-way (telephone channels).

SHF - super high frequency; any radio frequency in the 3,000- to 30,000-MHz range.

Shortwave - radio frequencies (from 1.605 to 30 MHz) that fall above the commercial broadcast band and are used for communication over long distances.

Solidaridad - geosynchronous satellites in Mexico's system of international telecommunications in the Western Hemisphere.

Stationsar - Russia's geostationary system for satellite telecommunications.

Submarine cable - a cable designed for service under water.

TAT - Trans-Atlantic Telephone; any of a number of high-capacity submarine coaxial telephone cables linking Europe with North America.

Telefax - facsimile service between subscriber stations via the public switched telephone network or the international Datel network.

Telegraph - a telecommunications system designed for unmodulated electric impulse transmission.

Telex - a communication service involving teletypewriters connected by wire through automatic exchanges.

Tropospheric scatter - a form of microwave radio transmission in which the troposphere is used to scatter and reflect a fraction of the incident radio waves back to earth; powerful, highly directional antennas are used to transmit and receive the microwave signals; reliable over-the-horizon communications are realized for distances up to 600 miles in a single hop; additional hops can extend the range of this system for very long distances.

Trunk network - a network of switching centers, connected by multichannel trunk lines.

UHF - ultra high frequency; any radio frequency in the 300- to 3,000-MHz range.

VHF - very high frequency; any radio frequency in the 30- to 300-MHz range.

Telephones - main lines in use: This entry gives the total number of main telephone lines in use.

Telephones - mobile cellular: This entry gives the total number of mobile cellular telephone subscribers.

Television broadcast stations: This entry gives the total number of separate broadcast stations plus any repeater stations.

Terminology: Due to the highly structured nature of the Factbook database, some collective generic terms have to be used. For example, the word Country in the Country name entry refers to a wide variety of dependencies, areas of special sovereignty, uninhabited islands, and other entities in addition to the traditional countries or independent states. Military is also used as an umbrella term for various civil defense, security, and defense activities in many entries. The Independence entry includes the usual colonial independence dates and former ruling states as well as other significant nationhood dates such as the traditional founding date or the date of unification, federation, confederation, establishment, or state succession that are not strictly independence dates. Dependent areas have the nature of their dependency status noted in this same entry.

Terrain: This entry contains a brief description of the topography.

Time difference: This entry is expressed in The World Factbook in two ways. First, it is stated as the difference in hours between the capital of an entity and Coordinated Universal Time (UTC) during Standard Time. Additionally, the difference in time between the capital of an entity and that observed in Washington, D.C. is also provided. Note that the time difference assumes both locations are simultaneously observing Standard Time or Daylight Saving Time.

Time zones: Ten countries (Australia, Brazil, Canada, Indonesia, Kazakhstan, Mexico, New Zealand, Russia, Spain, and the United States) and the island of Greenland observe more than one official time depending on the number of designated time zones within their boundaries. An illustration of time zones throughout the world and within countries can be seen in the Standard Time Zones of the World map included in the Reference Maps section of The World Factbook.

Total fertility rate: This entry gives a figure for the average number of children that would be born per woman if all women lived to the end of their childbearing years and bore children according to a given fertility rate at each age. The total fertility rate (TFR) is a more direct measure of the level of fertility than the crude birth rate, since it refers to births per woman. This indicator shows the potential for population change in the country. A rate of two children per woman is considered the replacement rate for a population, resulting in relative stability in terms of total numbers. Rates above two children indicate populations growing in size and whose median age is declining. Higher rates may also indicate difficulties for families, in some situations, to feed and educate their children and for women to enter the labor force. Rates below two children indicate populations decreasing in size and growing older. Global fertility rates are in

general decline and this trend is most pronounced in industrialized countries, especially Western Europe, where populations are projected to decline dramatically over the next 50 years.

Total renewable water resources: This entry provides the long-term average water availability for a country in cubic kilometers of precipitation, recharged ground water, and surface inflows from surrounding countries. The values have been adjusted to account for overlap resulting from surface flow recharge of groundwater sources. Total renewable water resources provides the water total available to a country but does not include water resource totals that have been reserved for upstream or downstream countries through international agreements. Note that these values are averages and do not accurately reflect the total available in any given year. Annual available resources can vary greatly due to short-term and long-term climatic and weather variations.

Trafficking in persons: Trafficking in persons is modern-day slavery, involving victims who are forced, defrauded, or coerced into labor or sexual exploitation. The International Labor Organization (ILO), the UN agency charged with addressing labor standards, employment, and social protection issues, estimates that 12.3 million people worldwide are enslaved in forced labor, bonded labor, forced child labor, sexual servitude, and involuntary servitude at any given time. Human trafficking is a multi-dimensional threat, depriving people of their human rights and freedoms, risking global health, promoting social breakdown, inhibiting development by depriving countries of their human capital, and helping fuel the growth of organized crime. In 2000, the US Congress passed the Trafficking Victims Protection Act (TVPA), reauthorized in 2003 and 2005, which provides tools for the US to combat trafficking in persons, both domestically and abroad. One of the law's key components is the creation of the US Department of State's annual Trafficking in Persons Report, which assesses the government response (i.e., the current situation) in some 150 countries with a significant number of victims trafficked across their borders who are recruited, harbored, transported, provided, or obtained for forced labor or sexual exploitation. Countries in the annual report are rated in three tiers, based on government efforts to combat trafficking. The countries identified in this entry are those listed in the 2007 Trafficking in Persons Report as Tier 2 Watch List or Tier 3 based on the following tier rating definitions:

Tier 2 Watch List countries do not fully comply with the minimum standards for the elimination of trafficking but are making significant efforts to do so, and meet one of the following criteria:

1. they display high or significantly increasing number of victims,
2. they have failed to provide evidence of increasing efforts to combat trafficking in persons, or,
3. they have committed to take action over the next year.

Tier 3 countries neither satisfy the minimum standards for the elimination of trafficking nor demonstrate a significant effort to do so. Countries in this tier are subject to potential non-humanitarian and non-trade sanctions.

Transnational issues: This category includes four entries - Disputes - international, Refugees and internally displaced persons, Trafficking in persons, and Illicit drugs - that deal with current issues going beyond national boundaries.

Transportation: This category includes the entries dealing with the means for movement of people and goods.

Transportation - note: This entry includes miscellaneous transportation information of significance not included elsewhere.

UTC (Coordinated Universal Time): See entry for Coordinated Universal Time.

Unemployment rate: This entry contains the percent of the labor force that is without jobs. Substantial underemployment might be noted.

Waterways: This entry gives the total length of navigable rivers, canals, and other inland bodies of water.

Weights and Measures: This information is presented in Appendix G: Weights and Measures and includes mathematical notations (mathematical powers and names), metric interrelationships (prefix; symbol; length, weight, or capacity; area; volume), and standard conversion factors.

Years: All year references are for the calendar year (CY) unless indicated as fiscal year (FY). The calendar year is an accounting period of 12 months from 1 January to 31 December. The fiscal year is an accounting period of 12 months other than 1 January to 31 December.

Note: Information for the US and US dependencies was compiled from material in the public domain and does not represent Intelligence Community estimates.

CIA - The World Factbook — History

A Brief History of Basic Intelligence and The World Factbook

The Intelligence Cycle is the process by which information is acquired, converted into intelligence, and made available to policymakers. Information is raw data from any source, data that may be fragmentary, contradictory, unreliable, ambiguous, deceptive, or wrong. Intelligence is information that has been collected, integrated, evaluated, analyzed, and interpreted. Finished intelligence is the final product of the Intelligence Cycle ready to be delivered to the policymaker.

The three types of finished intelligence are: basic, current, and estimative. Basic intelligence provides the fundamental and factual reference material on a country or issue. Current intelligence reports on new developments. Estimative intelligence judges probable outcomes. The three are mutually supportive: basic intelligence is the foundation on which the other two are constructed; current intelligence continually updates the inventory of knowledge; and estimative intelligence revises overall interpretations of country and issue prospects for guidance of basic and current intelligence. The World Factbook , The President's Daily Brief , and the National Intelligence Estimates are examples of the three types of finished intelligence.

The United States has carried on foreign intelligence activities since the days of George Washington but only since World War II have they been coordinated on a government-wide basis. Three programs have highlighted the development of coordinated basic intelligence since that time: (1) the Joint Army Navy Intelligence Studies (JANIS), (2) the National Intelligence Survey (NIS), and (3) The World Factbook .

During World War II, intelligence consumers realized that the production of basic intelligence by different components of the US Government resulted in a great duplication of effort and conflicting information. The Japanese attack on Pearl Harbor in 1941 brought home to leaders in Congress and the executive branch the need for integrating departmental reports to national policymakers. Detailed and coordinated information was needed not only on such major powers as Germany and Japan , but also on places of little previous interest. In the Pacific Theater, for example, the Navy and Marines had to launch amphibious operations against many islands about which information was unconfirmed or nonexistent. Intelligence authorities resolved that the United States should never again be caught unprepared.

In 1943, Gen. George B. Strong (G-2), Adm. H. C. Train (Office of Naval Intelligence—ONI), and Gen. William J. Donovan (Director of the Office of Strategic Services—OSS) decided that a joint effort should be initiated. A steering committee was appointed on 27 April 1943 that recommended the formation of a Joint Intelligence Study Publishing Board to assemble, edit, coordinate, and publish the Joint Army Navy Intelligence Studies (JANIS). JANIS was the first interdepartmental basic intelligence program to fulfill the needs of the US Government for an authoritative and coordinated appraisal of strategic basic intelligence. Between April 1943 and July 1947, the board published 34 JANIS studies. JANIS performed well in the war effort, and numerous letters of commendation were received, including a statement from Adm. Forrest Sherman, Chief of Staff, Pacific Ocean Areas, which said, "JANIS has become the indispensable reference work for the shore-based planners."

The need for more comprehensive basic intelligence in the postwar world was well expressed in 1946 by George S. Pettee, a noted author on national security. He wrote in *The Future of American Secret Intelligence* (Infantry Journal Press, 1946, page 46) that world leadership in peace requires even more elaborate intelligence than in war. "The conduct of peace involves all countries, all human activities—not just the enemy and his war production."

The Central Intelligence Agency was established on 26 July 1947 and officially began operating on 18 September 1947. Effective 1 October 1947, the Director of Central Intelligence assumed operational responsibility for JANIS. On 13 January 1948, the National Security Council issued Intelligence Directive (NSCID) No. 3, which authorized the National Intelligence Survey (NIS) program as a peacetime replacement for the wartime JANIS program. Before adequate NIS country sections could be produced, government agencies had to develop more comprehensive gazetteers and

better maps. The US Board on Geographic Names (BGN) compiled the names; the Department of the Interior produced the gazetteers; and CIA produced the maps.

The Hoover Commission's Clark Committee, set up in 1954 to study the structure and administration of the CIA, reported to Congress in 1955 that: "The National Intelligence Survey is an invaluable publication which provides the essential elements of basic intelligence on all areas of the world. There will always be a continuing requirement for keeping the Survey up-to-date." The Factbook was created as an annual summary and update to the encyclopedic NIS studies. The first classified Factbook was published in August 1962, and the first unclassified version was published in June 1971. The NIS program was terminated in 1973 except for the Factbook, map, and gazetteer components. The 1975 Factbook was the first to be made available to the public with sales through the US Government Printing Office (GPO). The Factbook was first made available on the Internet in June 1997. The year 2008 marks the 61st anniversary of the establishment of the Central Intelligence Agency and the 65th year of continuous basic intelligence support to the US Government by The World Factbook and its two predecessor programs.

The Evolution of The World Factbook

National Basic Intelligence Factbook produced semiannually until 1980. Country entries include sections on Land, Water, People, Government, Economy, Communications, and Defense Forces.

1981—Publication becomes an annual product and is renamed The World Factbook. A total of 165 nations are covered on 225 pages.

1983—Appendices (Conversion Factors, International Organizations) first introduced.

1984—Appendices expanded; now include: A. The United Nations, B. Selected United Nations Organizations, C. Selected International Organizations, D. Country Membership in Selected Organizations, E. Conversion Factors.

1987—A new Geography section replaces the former separate Land and Water sections. UN Organizations and Selected International Organizations appendices merged into a new International Organizations appendix. First multi-color-cover Factbook.

1988—More than 40 new geographic entities added to provide complete world coverage without overlap or omission. Among the new entities are Antarctica, oceans (Arctic, Atlantic , Indian, Pacific), and the World. The front-of-the-book explanatory introduction expanded and retitled to Notes, Definitions, and Abbreviations. Two new Appendices added: Weights and Measures (in place of Conversion Factors) and a Cross- Reference List of Geographic Names. Factbook size reaches 300 pages.

1989—Economy section completely revised and now includes an Overview briefly describing a country's economy. New entries added under People, Government, and Communications.

1990—The Government section revised and considerably expanded with new entries.

1991—A new International Organizations and Groups appendix added. Factbook size reaches 405 pages.

1992—Twenty new successor state entries replace those of the Soviet Union and Yugoslavia . New countries are respectively: Armenia , Azerbaijan , Belarus , Estonia , Georgia , Kazakhstan , Kyrgyzstan , Latvia , Lithuania , Moldova , Russia , Tajikistan , Turkmenistan , Ukraine , Uzbekistan ; and Bosnia and Hercegovina , Croatia , Macedonia , Serbia and Montenegro , Slovenia . Number of nations in the Factbook rises to 188.

1993—Czechoslovakia 's split necessitates new Czech Republic and Slovakia entries. New Eritrea entry added after it secedes from Ethiopia . Substantial enhancements made to Geography section.

1994—Two new appendices address Selected International Environmental Agreements. The gross domestic product (GDP) of most developing countries changed to a purchasing power parity (PPP) basis rather than an exchange rate basis. Factbook size up to 512 pages.

1995—The GDP of all countries now presented on a PPP basis. New appendix lists estimates of GDP on an exchange rate basis. Communications category split; Railroads, Highways, Inland waterways, Pipelines, Merchant marine, and Airports entries now make up a new Transportation category. The World Factbook is first produced on CD-ROM.

1996—Maps accompanying each entry now present more detail. Flags also introduced for nearly all entities. Various new entries appear under Geography and

Communications. Factbook abbreviations consolidated into a new Appendix A. Two new appendices present a Cross-Reference List of Country Data Codes and a Cross-Reference List of Hydrogeographic Data Codes. Geographic coordinates added to Appendix H, Cross-Reference List of Geographic Names. Factbook size expands by 95 pages in one year to reach 652.

1997—A special edition for the CIA's 50 th anniversary. A schema or Guide to Country Profiles introduced. New color maps and flags now accompany each country profile. Category headings distinguished by shaded backgrounds. Number of categories expanded to nine—the current number—with the addition of an Introduction (for only a few countries) and Transnational Issues (which includes Disputes— international and Illicit drugs). The World Factbook introduced onto the Internet.

1998—The Introduction category with two entries, Current issues and Historical perspective, expanded to more countries. Last year for the production of CD-ROM versions of the Factbook.

1999—Historical perspective and Current issues entries in the Introduction category combined into a new Background statement. Several new Economy entries introduced. A new physical map of the world added to the back-of-the-book reference maps.

2000—A new "country profile" added on the Southern Ocean. The Background statements dramatically expanded to over 200 countries and possessions. A number of new Communications entries added.

2001—Background entries completed for all 267 entities in the Factbook. Several new HIV/AIDS entries introduced under the People category. Revision begun on individual country maps to include elevation extremes and a partial geographic grid. Weights and Measures appendix deleted.

2002—New entry on Distribution of Family income—Gini index added. Revision of individual country maps continued (process still ongoing).

2003—In the Economy category, petroleum entries added for oil production, consumption, exports, imports, and proved reserves, as well as natural gas proved reserves.

2004—Additional petroleum entries included for natural gas production, consumption, exports, and imports. In the Transportation category, under Merchant marine, subfields added for foreign-owned vessels and those registered in other

countries. Descriptions of the many forms of government mentioned in the Factbook incorporated into the Notes and Definitions.

2005—In the People category, a Major infectious diseases field added for countries deemed to pose a higher risk for travelers. In the Economy category, entries included for Current account balance, Investment, Public debt, and Reserves of foreign exchange and gold. The Transnational issues category expanded to include Refugees and internally displaced persons. Category headings receive distinctive colored backgrounds. These distinguishing colors are used in both the printed and online versions of the Factbook. Size of the printed Factbook reaches 702 pages.

2006—In the Economy category, national GDP figures now presented at Official Exchange Rates (OER) in addition to GDP at purchasing power parity (PPP).

2007—In the Government category, the Capital entry significantly expanded with up to four subfields, including new information having to do with time. The subfields consist of the name of the capital itself, its geographic coordinates, the time difference at the capital from coordinated universal time (UTC), and, if applicable, information on daylight saving time (DST). Where appropriate, a special note is added to highlight those countries with multiple time zones. A Trafficking in persons entry added to the Transnational issues category. A new appendix, Weights and Measures, (re)introduced to the online version of the Factbook.

2008—In the Geography category, two fields focus on the increasingly vital resource of water: Total renewable water resources and Freshwater withdrawal. In the Economy category, three fields added for: Stock of direct foreign investment—at home, Stock of direct foreign investment—abroad, and Market value of publicly traded shares. Concise descriptions of the major religions mentioned in the Factbook included in the Notes and Definitions.

The World Factbook is prepared by the Central Intelligence Agency for the use of US Government officials, and the style, format, coverage, and content are designed to meet their specific requirements. Information is provided by Antarctic Information Program (National Science Foundation), Bureau of the Census (Department of Commerce), Bureau of Labor Statistics (Department of Labor), Central Intelligence Agency, Council of Managers of National Antarctic Programs, Defense Intelligence Agency (Department of Defense), Department of Energy, Department of State, Fish and Wildlife Service (Department of the Interior), Maritime Administration (Department of Transportation), National Center for Medical Intelligence (Department of Defense), National Geospatial-Intelligence Agency (Department of Defense), Naval Facilities Engineering Command (Department of Defense), Office of Insular Affairs (Department of the Interior), Office of Naval Intelligence (Department of Defense), US Board on Geographic Names (Department of the Interior), US Transportation Command (Department of Defense), Oil & Gas Journal, and other public and private sources.

The Factbook is in the public domain. Accordingly, it may be copied freely without permission of the Central Intelligence Agency (CIA). The official seal of the CIA, however, may NOT be copied without permission as required by the CIA Act of 1949 (50 U.S.C. section 403m). Misuse of the official seal of the CIA could result in civil and criminal penalties.

CIA - The World Factbook — FAQs

Frequently Asked Questions

The World Factbook staff thanks you for your comments, suggestions, updates, kudos, and corrections over the past years. The willingness of readers from around the world to share their observations and specialized knowledge is very helpful as we try to produce the best possible publications. Please feel free to continue to write and e-mail us. When submitting corrections or updates to the Factbook, please include your source(s) of information. At least two Factbook staffers review every submitted item. The sheer volume of correspondence precludes detailed personal replies, but we sincerely appreciate your time and interest in the Factbook. If you include your e-mail address we will at least acknowledge your note. Thank you again.

Answers to many frequently asked questions (FAQs) are explained in the Notes and Definitions section in The World Factbook. Please review this section to see if your question is already answered there. In addition, we have compiled the following list of FAQs to answer other common questions. Select from the following categories to narrow your search:

General

Can you provide additional information for a specific country?

The staff cannot provide data beyond what appears in The World Factbook. The format and information in the Factbook are tailored to the specific requirements of US Government officials and content is focused on their current and anticipated needs. The staff welcomes suggestions for new entries.

How often is The World Factbook updated?

Formerly our Web site (and the published Factbook) were only updated annually. Beginning in November 2001 we instituted a new system of more frequent online updates. The World Factbook is currently updated every two weeks.

The annual printed version of the Factbook is usually released about midyear. US Government officials may obtain information about Factbook availability from their own organizations or through liaison channels to the CIA. Other users may obtain sales information through the following channels:

Can I use some or all of The World Factbook for my Web site (book, research project, homework, etc.)?

The World Factbook is in the public domain and may be used freely by anyone at anytime without seeking permission. However, US Code prohibits use of the CIA seal in a manner which implies that the CIA approved, endorsed, or authorized such use. If you have any questions about your intended use, you should consult with legal counsel. Further information on The World Factbook's use is described on the Contributors and Copyright Information page. As a courtesy, please cite The World Factbook when used.

Why doesn't The World Factbook include information on states, departments, provinces, etc., in the country format?

The World Factbook provides national-level information on countries, territories, and dependencies, but not subnational administrative units within a country. A good encyclopedia should provide state/province-level information.

Is it possible to access older editions of The World Factbook to do comparative research and trend analysis?

Previous versions of the Factbook, beginning with the 2000 edition, are available for downloading - but not browsing - on the CIA Web site. Hardcopy editions for earlier years are available from libraries.

Would it be possible to set up a partnership or collaboration between the producers of The World Factbook and other organizations or individuals?

The World Factbook does not partner with other organizations or individuals, but we do welcome comments and suggestions that such groups or persons choose to provide.

Geography

I can't find a geographic name for a particular country. Why not?

The World Factbook is not a gazetteer (a dictionary or index of places, usually with descriptive or statistical information) and cannot provide more than the names of the administrative divisions (in the Government category) and major cities/towns (on the country maps). Our expanded Cross-Reference List of Geographic Names, however, includes many of the world's major geographic features as well as historic (former) names of countries and cities mentioned in The World Factbook.

Why are Taiwan and the European Union listed out of alphabetical order at the end of the Factbook entries?

Taiwan is listed after the regular entries because even though the mainland People's Republic of China claims Taiwan, elected Taiwanese authorities de facto administer the island and reject mainland sovereignty claims. With the establishment of diplomatic relations with China on January 1, 1979, the US Government recognized the People's Republic of China as the sole legal government of China, acknowledging the Chinese position that there is only one China and that Taiwan is part of China.

The European Union (EU) is not a country, but it has taken on many nation-like attributes and these are likely to be expanded in the future. A more complete explanation on the inclusion of the EU into the Factbook may be found in the Preliminary statement.

Since we have an ambassador who represents the US at the Vatican, why is this entity not listed in the Factbook?

Vatican City is found under Holy See. The term "Holy See" refers to the authority, jurisdiction, and sovereignty vested in the Pope and his advisors to direct the worldwide Catholic Church. The Holy See has a legal personality that allows it to enter into treaties as the juridical equal of a state and to send and receive diplomatic representatives. Vatican City, created in 1929 to administer properties belonging to the Holy See in Rome, is recognized under international law as a sovereign state, but it does not send or receive diplomatic representatives. Consequently, Holy See is included as a Factbook entry, with Vatican City cross-referenced in the Geographic Names appendix.

Why is Palestine not listed in The World Factbook?

The areas that could potentially form a future Palestinian state — the West Bank and Gaza Strip — do appear in the Factbook. These areas are presently Israeli-occupied with current status subject to the Israeli-Palestinian 1995 Interim Agreement; their permanent status is to be determined through further negotiation.

Why are the Golan Heights not shown as part of Israel or Northern Cyprus with Turkey?

Territorial occupations/annexations not recognized by the United States Government are not shown on US Government maps.

Why don't you include information on entities such as Tibet or Kashmir?

The World Factbook provides information on the administrative divisions of a country as recommended by the United States Board on Geographic Names (BGN). The BGN is a component of the US Government that develops policies, principles, and procedures governing the spelling, use, and application of geographic names—domestic, foreign, Antarctic, and undersea. Its decisions enable all departments and agencies of the US Government to have access to uniform names of geographic features.

Also included in the Factbook are entries on parts of the world whose status has not yet been resolved (e.g., West Bank, Spratly Islands). Specific regions within a country or areas in dispute among countries are not covered.

What do you mean when you say that a country is "doubly landlocked"?

A doubly landlocked country is one that is separated from an ocean or an ocean-accessible sea by two intervening countries. Uzbekistan and Liechtenstein are the only countries that fit this definition.

Why is the area of the United States described as "slightly larger than China" in the Factbook, while other sources list China as larger in area than the United States?

It all depends on whether one is looking at total area (land and water) when making the comparison (which is the criterion used by the Factbook) or just land area (which excludes inland water features such as rivers or lakes).

Total area (combining land and water)

United States	=	9,826,630	sq	km
China	=	9,596,960	sq	km

Land only (without any water features)

United States = 9,161,923 sq km
China = 9,326,410 sq km

Why has The World Factbook dropped the four French departments of Guadeloupe, Martinique, Reunion, and French Guiana?

The reason the four entities are no longer in The World Factbook is because their status has changed. While they are overseas departments of France, they are also now recognized as French regions, having equal status to the 22 metropolitan regions that make up European France. In other words, they are now recognized as being part of France proper. Their status is somewhat analogous to Alaska and Hawaii vis-a-vis the contiguous United States. Although separated from the larger geographic entity, they are still considered to be an integral part of it.

Spelling and Pronunciation

Why is the spelling of proper names such as rulers, presidents, and prime ministers in The World Factbook different than their spelling in my country?

The Factbook staff applies the names and spellings from the Chiefs of State link on the CIA Web site. The World Factbook is prepared using the standard American English computer keyboard and does not use any special characters, symbols, or most diacritical markings in its spellings. Surnames are always spelled with capital letters; they may appear first in some cultures.

The spelling of geographic names, features, cities, administrative divisions, etc. in the Factbook differs from those used in my country. Why is this?

The United States Board on Geographic Names (BGN) recommends and approves names and spellings. The BGN is the component of the United States Government that develops policies, principles, and procedures governing the spelling, use, and application of geographic names—domestic, foreign, Antarctic, and undersea. Its decisions enable all departments and agencies of the US Government to use uniform names of geographic features. (A note is usually included where changes may have occurred but have not yet been approved by the BGN). The World Factbook is prepared using the standard American English computer keyboard and does not use any special characters, symbols, or most diacritical markings in its spellings.

Why doesn't The World Factbook include pronunciations of country or leader names?

There are too many variations in pronunciation among English-speaking countries, not to mention English renditions of non-English names, for pronunciations to be included. American English pronunciations are included for some countries like Qatar and Kiribati.

Why is the name of the Labour party misspelled?

When American and British spellings of common English words differ, The World Factbook always uses the American spelling, even when these common words form part of a proper name in British English.

Policies and Procedures

What is The World Factbook's source for a specific subject field?

The Factbook staff uses many different sources to publish what we judge are the most reliable and consistent data for any particular category. Space considerations preclude a listing of these various sources.

The names of some geographic features provided in the Factbook differ from those used in other publications. For example, in Asia the Factbook has Burma as the country name, but in other publications Myanmar is used; also, the Factbook uses Sea of Japan whereas other publications label it East Sea. What is your policy on naming geographic features?

The Factbook staff follows the guidance of the United States Board on Geographic Names (BGN). The BGN is the component of the United States Government that develops policies, principles, and procedures governing the spelling, use, and application of geographic names—domestic, foreign, Antarctic, and undersea. Its decisions enable all departments and agencies of the US Government to have access to uniform names of geographic features. The position of the BGN is that the names Burma and Sea of Japan be used in official US Government maps and publications.

Why is most of the statistical information in the Factbook given in metric units, rather than the units standard to US measure?

US Federal agencies are required by the Metric Conversion Act of 1975 (Public Law 94-168) and by Executive Order 12770 of July 1991 to use the International System of Units, commonly referred to as the metric system or SI. In addition, the metric system is used by over 95 percent of the world's population.

Why don't you include information on minimum and maximum temperature extremes?

The Factbook staff judges that this information would only be useful for some (generally smaller) countries. Larger countries can have large temperature extremes that do not represent the landmass as a whole. In the future, such a category may be adopted listing the extremes, but also adding a normal temperature range found throughout most of a country's territory.

What information sources are used for the country flags?

Flag designs used in The World Factbook are those recognized by the protocol office of the US Department of State.

Why do your GDP (Gross Domestic Product) statistics differ from other sources?

We have two sets of GDP dollar estimates in The World Factbook, one derived from purchasing power parity (PPP) calculations and the other derived using official exchange rates (OER). Other sources probably use one of the two. See the Notes and Definitions section on GDP and GDP methodology for more information.

On the CIA Web site, Chiefs of State is updated weekly, but the last update for the Factbook was an earlier date. Why the discrepancy?

Although Chiefs of State and The World Factbook both appear on the CIA Web site, they are produced and updated by separate staffs. Chiefs of State includes fewer countries but more leaders, and is updated more frequently than The World Factbook, which has a much larger database, and includes all countries.

Some percentage distributions do not add to 100. Why not?

Because of rounding, percentage distributions do not always add precisely to 100%. Rounding of numbers always results in a loss of precision—i.e., error. This error becomes apparent when percentage data are totaled, as the following two examples show:

Original Data Rounded to whole integer

Example	1	43.2	43
		30.4	30
		26.4	26
		<hr/>	<hr/>
		100.0 99	
Example	2	42.8	43
		31.6	32
		25.6	26
		<hr/>	<hr/>
		100.0 101	

When this occurs, we do not force the numbers to add exactly to 100, because doing so would introduce additional error into the distribution.

What rounding convention does The World Factbook use?

In deciding on the number of digits to present, the Factbook staff assesses the accuracy of the original data and the needs of US Government officials. All of the economic data are processed by computer—either at the source or by the Factbook staff. The economic data presented in The Factbook, therefore, follow the rounding convention used by virtually all numerical software applications, namely, any digit followed by a "5" is rounded up to the next higher digit, no matter whether the original digit is even or odd. Thus, for example, when rounded to the nearest integer, 2.5 becomes 3, rather than 2, as occurred in some pre-computer rounding systems.

Why do you list "Independence" dates for countries like France, Germany, and the United Kingdom?

For most countries, this entry presents the date that sovereignty was achieved and from which nation, empire, or trusteeship. For other countries, the date may be some other significant nationhood event such as the traditional founding date or the date of unification, federation, confederation, establishment, or state succession and so may not strictly be an "Independence" date. Dependent entities have the nature of their dependency status noted in this same entry.

Technical

Does The World Factbook comply with Section 508 of the Rehabilitation Act regarding accessibility of Web pages?

The World Factbook home page has a link entitled "Text/Low Bandwidth Version." The country data in the text version is fully accessible. We believe The World Factbook is compliant with the Section 508 law in both fact and spirit. If you are experiencing difficulty, please use our comment form to provide us details of the specific problem you are experiencing and the assistive software and/or hardware that you are using so that we can work with our technical support staff to find and implement a solution. We welcome visitors' suggestions to improve accessibility of The World Factbook and the CIA Web site.

I am using the Factbook online and it is not working. What is wrong?

Hundreds of "Factbook" look-alikes exist on the Internet. The Factbook site at: www.cia.gov is the only official site.

When I attempt to download a PDF (Portable Document Format) map file (or some other map) the file has no image. Can you fix this?

Some of the files on The World Factbook Web site are large and could take several minutes to download on a dial-up connection. The screen might be blank during the download process.

When I open a map on The World Factbook site, it is fuzzy or granular, or too big or too small. Why?

Adjusting the resolution setting on your monitor should correct this problem.

Is The World Factbook country data available in machine-readable format? All I can find is HTML, but I'm looking for simple tabular data.

The Factbook Web site now features "Rank Order" pages for selected Factbook entries. "Rank Order" pages are available for those data fields identified with a small bar chart icon located next to the title of the data entry. In addition, all of the "Rank Order" pages can be downloaded as tab-delimited data files that can be opened in other applications such as spreadsheets and databases.

Introduction Afghanistan

Background:

Ahmad Shah DURRANI unified the Pashtun tribes and founded Afghanistan in 1747. The country served as a buffer between the British and Russian empires until it won independence from notional British control in 1919. A brief experiment in democracy ended in a 1973 coup and a 1978 Communist counter-coup. The Soviet Union invaded in 1979 to support the tottering Afghan Communist regime, touching off a long and destructive war. The USSR withdrew in 1989 under relentless pressure by internationally supported anti-Communist mujahedin rebels. A series of subsequent civil wars saw Kabul finally fall in 1996 to the Taliban, a hardline Pakistani-sponsored movement that emerged in 1994 to end the country's civil war and anarchy. Following the 11 September 2001 terrorist attacks in New York City, a US, Allied, and anti-Taliban Northern Alliance military action toppled the Taliban for sheltering Osama BIN LADIN. The UN-sponsored Bonn Conference in 2001 established a process for political reconstruction that included the adoption of a new constitution, a presidential election in 2004, and National Assembly elections in 2005. In December 2004, Hamid KARZAI became the first democratically elected president of Afghanistan and the National Assembly was inaugurated the following December. Despite gains toward building a stable central government, a resurgent Taliban and continuing provincial instability - particularly in the south and the east - remain serious challenges for the Afghan Government.

Economy Afghanistan

Economy - overview:

Afghanistan's economy is recovering from decades of conflict. The economy has improved significantly since the fall of the Taliban regime in 2001 largely because of the infusion of international assistance, the recovery of the agricultural sector, and service sector growth. Real GDP growth exceeded 7% in 2007. Despite the progress of the past few years, Afghanistan is extremely poor, landlocked, and highly dependent on foreign aid, agriculture, and trade with neighboring countries. Much of the population continues to suffer from shortages of housing, clean water, electricity, medical care, and jobs. Criminality, insecurity, and the Afghan Government's inability to extend rule of

law to all parts of the country pose challenges to future economic growth. It will probably take the remainder of the decade and continuing donor aid and attention to significantly raise Afghanistan's living standards from its current level, among the lowest in the world. International pledges made by more than 60 countries and international financial institutions at the Berlin Donors Conference for Afghan reconstruction in March 2004 reached \$8.9 billion for 2004-09. While the international community remains committed to Afghanistan's development, pledging over \$24 billion at three donors' conferences since 2002, Kabul will need to overcome a number of challenges. Expanding poppy cultivation and a growing opium trade generate roughly \$4 billion in illicit economic activity and looms as one of Kabul's most serious policy concerns. Other long-term challenges include: budget sustainability, job creation, corruption, government capacity, and rebuilding war torn infrastructure.

@Albania

Introduction
Albania

Background:

Albania declared its independence from the Ottoman Empire in 1912, but was conquered by Italy in 1939. Communist partisans took over the country in 1944. Albania allied itself first with the USSR (until 1960), and then with China (to 1978). In the early 1990s, Albania ended 46 years of xenophobic Communist rule and established a multiparty democracy. The transition has proven challenging as successive governments have tried to deal with high unemployment, widespread corruption, a dilapidated physical infrastructure, powerful organized crime networks, and combative political opponents. Albania has made progress in its democratic development since first holding multiparty elections in 1991, but deficiencies remain. International observers judged elections to be largely free and fair since the restoration of political stability following the collapse of pyramid schemes in 1997. In the 2005 general elections, the Democratic Party and its allies won a decisive victory on pledges of reducing crime and corruption, promoting economic growth, and decreasing the size of government. The election, and particularly the orderly transition of power, was considered an important step forward. Although Albania's economy continues to grow, the country is still one of the poorest in Europe, hampered by a large informal economy and an inadequate energy and transportation infrastructure. Albania has played a largely helpful role in managing inter-ethnic tensions in southeastern Europe, and is continuing to work toward joining NATO and the EU. Albania, with troops in Iraq and Afghanistan, has been a strong supporter of the global war on terrorism.

Economy Albania

Economy - overview:

Lagging behind its Balkan neighbors, Albania is making the difficult transition to a more modern open-market economy. The government has taken measures to curb violent crime, and recently adopted a fiscal reform package aimed at reducing the large gray economy and attracting foreign investment. The economy is bolstered by annual remittances from abroad of \$600-\$800 million, mostly from Albanians residing in Greece and Italy; this helps offset the towering trade deficit. Agriculture, which accounts for more than one-fifth of GDP, is held back because of lack of modern equipment, unclear property rights, and the prevalence of small, inefficient plots of land. Energy shortages and antiquated and inadequate infrastructure contribute to Albania's poor business environment, which make it difficult to attract and sustain foreign investment. The completion of a new thermal power plant near Vlore and improved transmission line between Albania and Montenegro will help relieve the energy shortages. Also, the government is moving slowly to improve the poor national road and rail network, a long-standing barrier to sustained economic growth. On the positive side, macroeconomic growth was strong in 2003-07 and inflation is low and stable.

Issues

Disputes - international:

the Albanian Government calls for the protection of the rights of ethnic Albanians in neighboring countries, and the peaceful resolution of interethnic disputes; some ethnic Albanian groups in neighboring countries advocate for a "greater Albania," but the idea has little appeal among Albanian nationals; the mass emigration of unemployed Albanians remains a problem for developed countries, chiefly Greece and Italy

Trafficking in persons:

current situation: Albania is a source country for women and girls trafficked for the purpose of commercial sexual exploitation and forced labor; it is no longer considered a major country of transit; Albanian victims are trafficked to Greece, Italy, Macedonia, and Kosovo, with many trafficked onward to Western European countries; children were also trafficked to Greece for begging and other forms of child labor; approximately half of all Albanian trafficking victims are under age 18; internal sex trafficking of women and children is on the rise tier rating: Tier 2 Watch List - Albania is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons in 2007, particularly in the area of victim protection; the government did not appropriately identify trafficking victims during 2007, and has not demonstrated that it is vigorously investigating or prosecuting complicit officials (2008)

Illicit drugs:

increasingly active transshipment point for Southwest Asian opiates, hashish, and cannabis transiting the Balkan route and - to a lesser extent - cocaine from South America destined for Western Europe; limited opium and growing cannabis production; ethnic Albanian narcotrafficking organizations active and expanding in Europe; vulnerable to money laundering associated with regional trafficking in narcotics, arms, contraband, and illegal aliens

Introduction
Algeria

Background:

After more than a century of rule by France, Algerians fought through much of the 1950s to achieve independence in 1962. Algeria's primary political party, the National Liberation Front (FLN), has dominated politics ever since. Many Algerians in the subsequent generation were not satisfied, however, and moved to counter the FLN's centrality in Algerian politics. The surprising first round success of the Islamic Salvation Front (FIS) in the December 1991 balloting spurred the Algerian army to intervene and postpone the second round of elections to prevent what the secular elite feared would be an extremist-led government from assuming power. The army began a crackdown on the FIS that spurred FIS supporters to begin attacking government targets. The government later allowed elections featuring pro-government and moderate religious-based parties, but did not appease the activists who progressively widened their attacks. The fighting escalated into an insurgency, which saw intense fighting between 1992-98 and which resulted in over 100,000 deaths - many attributed to indiscriminate massacres of villagers by extremists. The government gained the upper hand by the late-1990s and FIS's armed wing, the Islamic Salvation Army, disbanded in January 2000. However, small numbers of armed militants persist in confronting government forces and conducting ambushes and occasional attacks on villages. The army placed Abdelaziz BOUTEFLIKA in the presidency in 1999 in a fraudulent election but claimed neutrality in his 2004 landslide reelection victory. Longstanding problems continue to face BOUTEFLIKA in his second term, including the ethnic minority Berbers' ongoing autonomy campaign, large-scale unemployment, a shortage of housing, unreliable electrical and water supplies, government inefficiencies and corruption, and the continuing activities of extremist militants. The 2006 merger of the Salafist Group for Preaching and Combat (GSPC) with al-Qaida (followed by a name change to al-Qaida in the Lands of the Islamic Maghreb) signaled an increase in bombings, including high-profile, mass-casualty suicide attacks targeted against the

Algerian government and Western interests. Algeria must also diversify its petroleum-based economy, which has yielded a large cash reserve but which has not been used to redress Algeria's many social and infrastructure problems.

Economy
Algeria

Economy - overview:

The hydrocarbons sector is the backbone of the economy, accounting for roughly 60% of budget revenues, 30% of GDP, and over 95% of export earnings. Algeria has the eighth-largest reserves of natural gas in the world and is the fourth-largest gas exporter; it ranks 14th in oil reserves. Sustained high oil prices in recent years have helped improve Algeria's financial and macroeconomic indicators. Algeria is running substantial trade surpluses and building up record foreign exchange reserves. Algeria has decreased its external debt to less than 10% of GDP after repaying its Paris Club and London Club debt in 2006. Real GDP has risen due to higher oil output and increased government spending. The government's continued efforts to diversify the economy by attracting foreign and domestic investment outside the energy sector, however, has had little success in reducing high unemployment and improving living standards. Structural reform within the economy, such as development of the banking sector and the construction of infrastructure, moves ahead slowly hampered by corruption and bureaucratic resistance.

Issues

Disputes - international:

Algeria, and many other states, rejects Moroccan administration of Western Sahara; the Polisario Front, exiled in Algeria, represents the Sahrawi Arab Democratic Republic; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; Algeria remains concerned about armed bandits operating throughout the Sahel who sometimes destabilize southern Algerian towns; dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the FLN's assertions of a claim to Chirac Pastures in southeastern Morocco

Refugees and internally displaced persons:

refugees (country of origin): 90,000 (Western Saharan Sahrawi, mostly living in Algerian-sponsored camps in the southwestern Algerian town of Tindouf) IDPs: undetermined (civil war during 1990s) (2007)

Trafficking in persons:

current situation: Algeria is a transit country for men and women trafficked from sub-Saharan Africa to Europe for the purposes of commercial sexual exploitation and involuntary servitude; Algerian children are trafficked internally for the purpose of domestic servitude or street vending tier rating: Tier 3 - Algeria did not report any serious law enforcement actions to punish traffickers who force women into commercial sexual exploitation or men into involuntary servitude in 2007; the government again reported no investigations of trafficking of children for domestic servitude or improvements in protection services available to victims of trafficking;

Algeria still lacks victim protection services, and its failure to distinguish between trafficking and illegal migration may result in the punishment of victims of trafficking (2008)

Introduction
American Samoa

Background:

Settled as early as 1000 B.C., Samoa was "discovered" by European explorers in the 18th century. International rivalries in the latter half of the 19th century were settled by an 1899 treaty in which Germany and the US divided the Samoan archipelago. The US formally occupied its portion - a smaller group of eastern islands with the excellent harbor of Pago Pago - the following year.

Economy American Samoa

Economy - overview:

American Samoa has a traditional Polynesian economy in which more than 90% of the land is communally owned. Economic activity is strongly linked to the US with which American Samoa conducts most of its commerce. Tuna fishing and tuna processing plants are the backbone of the private sector, with canned tuna the primary export. Transfers from the US Government add substantially to American Samoa's economic well being. Attempts by the government to develop a larger and broader economy are restrained by Samoa's remote location, its limited transportation, and its devastating hurricanes. Tourism is a promising developing sector. note: as a territory of the US, American Samoa does not treat the US as an external trade partner

Introduction
Andorra

Background:

For 715 years, from 1278 to 1993, Andorrans lived under a unique co-principality, ruled by French and Spanish leaders (from 1607 onward, the French chief of state and the Spanish bishop of Urgel). In 1993, this feudal system was modified with the titular heads of state retained, but the government transformed into a parliamentary democracy. Long isolated and impoverished, mountainous Andorra achieved considerable prosperity since World War II through its tourist industry. Many immigrants (legal and illegal) are attracted to the thriving economy with its lack of income taxes.

Economy Andorra

Economy - overview:

Tourism, the mainstay of Andorra's tiny, well-to-do economy, accounts for more than 80% of GDP. An estimated 11.6 million tourists visit annually, attracted by Andorra's duty-free status and by its summer and winter resorts. Andorra's comparative advantage has recently eroded as the economies of neighboring France and Spain have been opened up, providing broader availability of goods and lower tariffs. The banking sector, with its partial "tax haven" status, also contributes substantially to the economy. Agricultural production is limited - only 2% of the land is arable - and most food has to be imported. The principal livestock activity is sheep raising. Manufacturing output consists mainly of cigarettes, cigars, and furniture. Andorra is a member of the EU Customs Union and is treated as an EU member for trade in manufactured goods (no tariffs) and as a non-EU member for agricultural products.

Introduction
Angola

Background:

Angola is rebuilding its country after the end of a 27-year civil war in 2002. Fighting between the Popular Movement for the Liberation of Angola (MPLA), led by Jose Eduardo DOS SANTOS, and the National Union for the Total Independence of Angola (UNITA), led by Jonas SAVIMBI, followed independence from Portugal in 1975. Peace seemed imminent in 1992 when Angola held national elections, but UNITA renewed fighting after being beaten by the MPLA at the polls. Up to 1.5 million lives may have been lost - and 4 million people displaced - in the quarter century of fighting. SAVIMBI's death in 2002 ended UNITA's insurgency and strengthened the MPLA's hold on power. President DOS SANTOS has announced legislative elections will be held in September 2008, with presidential elections planned for sometime in 2009.

Economy Angola

Economy - overview:

Angola's high growth rate is driven by its oil sector, with record oil prices and rising petroleum production. Oil production and its supporting activities contribute about 85% of GDP. Increased oil production supported growth averaging more than 15% per year from 2004 to 2007. A postwar reconstruction boom and resettlement of displaced persons has led to high rates of growth in construction and agriculture as well. Much of the country's infrastructure is still damaged or undeveloped from the 27-year-long civil war. Remnants of the conflict such as widespread land mines still mar the countryside even though an apparently durable peace was established after the death of rebel leader Jonas SAVIMBI in February 2002. Subsistence agriculture provides the main livelihood for most of the people, but half of the country's food must still be imported. In 2005, the government started using a \$2 billion line of credit, since increased to \$7 billion, from China to rebuild Angola's public infrastructure, and several large-scale projects were completed in 2006. Angola also has large credit lines from Brazil, Portugal, Germany, Spain, and the EU. The central bank in 2003 implemented an exchange rate stabilization program using foreign exchange reserves to buy kwanzas out of circulation. This policy became more sustainable in 2005 because of strong oil export earnings; it has significantly reduced inflation. Although consumer inflation declined from 325% in 2000 to under 13% in 2007, the stabilization policy has put pressure on international net liquidity. Angola became a member of OPEC in late 2006 and in late 2007 was assigned a production quota of 1.9 million barrels a day, somewhat less than the 2-2.5 million bbl Angola's government had wanted. To fully take advantage of its rich national resources - gold, diamonds, extensive forests, Atlantic fisheries, and large oil deposits - Angola will need to implement government reforms, increase transparency, and reduce corruption. The government has rejected a formal IMF monitored program, although it continues Article IV consultations and ad hoc

cooperation. Corruption, especially in the extractive sectors, and the negative effects of large inflows of foreign exchange, are major challenges facing Angola.

Introduction
Anguilla

Background:

Colonized by English settlers from Saint Kitts in 1650, Anguilla was administered by Great Britain until the early 19th century, when the island - against the wishes of the inhabitants - was incorporated into a single British dependency, along with Saint Kitts and Nevis. Several attempts at separation failed. In 1971, two years after a revolt, Anguilla was finally allowed to secede; this arrangement was formally recognized in 1980, with Anguilla becoming a separate British dependency.

Anguilla

Economy - overview:

Anguilla has few natural resources, and the economy depends heavily on luxury tourism, offshore banking, lobster fishing, and remittances from emigrants. Increased activity in the tourism industry has spurred the growth of the construction sector, contributing to economic growth. Anguillian officials have put substantial effort into developing the offshore financial sector, which is small, but growing. In the medium term, prospects for the economy will depend largely on the tourism sector and, therefore, on revived income growth in the industrialized nations as well as on favorable weather conditions.

Introduction
Antarctica

Background:

Speculation over the existence of a "southern land" was not confirmed until the early 1820s when British and American commercial operators and British and Russian national expeditions began exploring the Antarctic Peninsula region and other areas south of the Antarctic Circle. Not until 1840 was it established that Antarctica was indeed a continent and not just a group of islands. Several exploration "firsts" were achieved in the early 20th century. Following World War II, there was an upsurge in scientific research on the continent. A number of countries have set up a range of year-round and seasonal stations, camps, and refuges to support scientific research in Antarctica. Seven have made territorial claims, but not all countries recognize these claims. In order to form a legal framework for the activities of nations on the continent, an Antarctic Treaty was negotiated that neither denies nor gives recognition to existing territorial claims; signed in 1959, it entered into force in 1961.

Geography Antarctica

Location:

continent mostly south of the Antarctic Circle

Geographic coordinates:

90 00 S, 0 00 E

Map references:

Antarctic Region

Area:

total: 14 million sq km land: 14 million sq km (280,000 sq km ice-free, 13.72 million sq km ice-covered) (est.) note: fifth-largest continent, following Asia, Africa, North America, and South America, but larger than Australia and the subcontinent of Europe

Area - comparative:

slightly less than 1.5 times the size of the US

Land boundaries:

0 km note: see entry on Disputes - international

Coastline:

17,968 km

Maritime claims:

Australia, Chile, and Argentina claim Exclusive Economic Zone (EEZ) rights or similar over 200 nm extensions seaward from their continental claims, but like the claims themselves, these zones are not accepted by other countries; 21 of 28 Antarctic consultative nations have made no claims to Antarctic territory (although Russia and the US have reserved the right to do so) and do not recognize the claims of the other nations; also see the Disputes - international entry

Climate:

severe low temperatures vary with latitude, elevation, and distance from the ocean; East Antarctica is colder than West Antarctica because of its higher elevation; Antarctic Peninsula has the most moderate climate; higher temperatures occur in January along the coast and average slightly below freezing

Terrain:

about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to nearly 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Elevation extremes:

lowest point: Bentley Subglacial Trench -2,555 m highest point: Vinson Massif 4,897 m note: the lowest known land point in Antarctica is hidden in the Bentley Subglacial Trench; at its surface is the deepest ice yet discovered and the world's lowest elevation not under seawater

Natural resources:

iron ore, chromium, copper, gold, nickel, platinum and other minerals, and coal and hydrocarbons have been found in small uncommercial quantities; none presently exploited; krill, finfish, and crab have been taken by commercial fisheries

Land use:

arable land: 0% permanent crops: 0% other: 100% (ice 98%, barren rock 2%) (2005)

Natural hazards:

katabatic (gravity-driven) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise along the coast; volcanism on Deception Island and isolated areas of West Antarctica; other seismic activity rare and weak; large icebergs may calve from ice shelf

Environment - current issues:

in 1998, NASA satellite data showed that the Antarctic ozone hole was the largest on record, covering 27 million square kilometers; researchers in 1997 found that increased ultraviolet light passing through the hole damages the DNA of icefish, an Antarctic fish lacking hemoglobin; ozone depletion earlier was shown to harm one-celled Antarctic marine plants; in 2002, significant areas of ice shelves disintegrated in response to regional warming

Geography - note:

the coldest, windiest, highest (on average), and driest continent; during summer, more solar radiation reaches the surface at the South Pole than is received at the Equator in an equivalent period; mostly uninhabitable

People Antarctica

Population:

no indigenous inhabitants, but there are both permanent and summer-only staffed research stations note: 28 nations, all signatory to the Antarctic Treaty, operate through their National Antarctic Program a number of seasonal-only (summer) and year-round research stations on the continent and its nearby islands south of 60 degrees south latitude (the region covered by the Antarctic Treaty); these stations' population of persons doing and supporting science or engaged in the management and protection of the Antarctic region varies from approximately 4,000 in summer to 1,000 in winter; in addition, approximately 1,000 personnel, including ship's crew and scientists doing onboard research, are present in the waters of the treaty region; peak summer (December-February) population - 4,219 total; Argentina 667, Australia 200, Brazil 40, Bulgaria 15, Chile 237, China 70, Czech Republic 20, Ecuador 26, Finland 20, France 100, France and Italy jointly 45, Germany 90, India 65, Italy 90, Japan 125, South Korea 70, NZ 85, Norway 44, Peru 28, Poland 40, Romania 3, Russia 429, South Africa 80, Spain 28, Sweden 20, Ukraine 24, UK 205, US 1,293, Uruguay 60 (2007-2008); winter (June-August) station population - 1,088 total; Argentina 176, Australia 62, Brazil 12, Chile 96, China 29, France 26, France and Italy jointly 13, Germany 9, India 25, Italy 2, Japan 40, South Korea 18, NZ 10, Norway 7, Poland 12, Russia 148, South Africa 10, Ukraine 12, UK 37, US 337, Uruguay 9 (2008); research stations operated within the Antarctic Treaty area (south of 60 degrees south latitude) by National Antarctic Programs: year-round stations - 38 total; Argentina 6, Australia 3, Brazil 1, Chile 4, China 2, France 1, France and Italy jointly 1, Germany 1, India 1, Japan 1, South Korea 1, NZ 1, Norway 1, Poland 1, Russia 5, South Africa 1, Ukraine 1, UK 2, US 3, Uruguay 1 (2008); a range of seasonal-only (summer) stations, camps, and refuges - Argentina, Australia, Bulgaria, Brazil, Chile, China, Czech Republic, Ecuador, Finland, France, Germany, India, Italy, Japan, South Korea, New Zealand, Norway, Peru, Poland, Romania, Russia, Spain, Sweden, Ukraine, UK, US, and Uruguay (2007-2008); in addition, during the austral summer some nations have numerous occupied locations such as tent camps, summer-long temporary facilities, and mobile traverses in support of research (March 2008 est.)

Antarctic Treaty Summary - the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, establishes the legal framework for the management of Antarctica; the 30th Antarctic Treaty Consultative Meeting was held in Delhi, India in April/May 2007; at these periodic meetings, decisions are made by consensus (not by vote) of all consultative member nations; at the end of 2007, there were 46 treaty member nations: 28 consultative and 18 non-consultative; consultative (decision-making) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 21 non-claimant nations; the US and Russia have reserved the right to make claims; the US does not recognize the claims of others; Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; the years in parentheses indicate when a consultative member-nation acceded to the Treaty and when it was accepted as a consultative member, while no date indicates the country was an original 1959 treaty signatory; claimant nations are - Argentina, Australia, Chile, France, NZ, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1975/1983), Bulgaria (1978/1998) China (1983/1985), Ecuador (1987/1990), Finland (1984/1989), Germany (1979/1981), India (1983/1983), Italy (1981/1987), Japan, South Korea (1986/1989), Netherlands (1967/1990), Peru (1981/1989), Poland (1961/1977), Russia, South Africa, Spain (1982/1988), Sweden (1984/1988), Ukraine (1992/2004), Uruguay (1980/1985), and the US; non-consultative members, with year of accession in parentheses, are - Austria (1987), Belarus (2006), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1962/1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Papua New Guinea (1981), Romania (1971), Slovakia (1962/1993), Switzerland (1990), Turkey (1996), and Venezuela (1999); note - Czechoslovakia acceded to the Treaty in 1962 and separated into the Czech Republic and Slovakia in 1993; Article 1 - area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2 - freedom of scientific investigation and cooperation shall continue; Article 3 - free exchange of information and personnel, cooperation with the UN and other international agencies; Article 4 - does not

recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5 - prohibits nuclear explosions or disposal of radioactive wastes; Article 6 - includes under the treaty all land and ice shelves south of 60 degrees 00 minutes south and reserves high seas rights; Article 7 - treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all expeditions and of the introduction of military personnel must be given; Article 8 - allows for jurisdiction over observers and scientists by their own states; Article 9 - frequent consultative meetings take place among member nations; Article 10 - treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11 - disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14 - deal with upholding, interpreting, and amending the treaty among involved nations; other agreements - some 200 recommendations adopted at treaty consultative meetings and ratified by governments include - Agreed Measures for Fauna and Flora (1964) which were later incorporated into the Environmental Protocol; Convention for the Conservation of Antarctic Seals (1972); Convention on the Conservation of Antarctic Marine Living Resources (1980); a mineral resources agreement was signed in 1988 but remains unratified; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through six specific annexes: 1) environmental impact assessment, 2) conservation of Antarctic fauna and flora, 3) waste disposal and waste management, 4) prevention of marine pollution, 5) area protection and management and 6) liability arising from environmental emergencies; it prohibits all activities relating to mineral resources except scientific research; a permanent Antarctic Treaty Secretariat was established in 2004 in Buenos Aires, Argentina

Legal system:

Antarctica is administered through meetings of the consultative member nations; decisions from these meetings are carried out by these member nations (with respect to their own nationals and operations) in accordance with their own national laws; US law, including certain criminal offenses by or against US nationals, such as murder, may apply extraterritorially; some US laws directly apply to Antarctica; for example, the Antarctic Conservation Act, 16 U.S.C. section 2401 et seq., provides civil and criminal penalties for the following activities, unless authorized by regulation of statute: the taking of native mammals or birds; the introduction of nonindigenous plants and animals; entry into specially protected areas; the discharge or disposal of pollutants;

and the importation into the US of certain items from Antarctica; violation of the Antarctic Conservation Act carries penalties of up to \$10,000 in fines and one year in prison; the National Science Foundation and Department of Justice share enforcement responsibilities; Public Law 95-541, the US Antarctic Conservation Act of 1978, as amended in 1996, requires expeditions from the US to Antarctica to notify, in advance, the Office of Oceans, Room 5805, Department of State, Washington, DC 20520, which reports such plans to other nations as required by the Antarctic Treaty; for more information, contact Permit Office, Office of Polar Programs, National Science Foundation, Arlington, Virginia 22230; telephone: (703) 292-8030, or visit their website at www.nsf.gov; more generally, access to the Antarctic Treaty area, that is to all areas between 60 and 90 degrees south latitude, is subject to a number of relevant legal instruments and authorization procedures adopted by the states party to the Antarctic Treaty

Economy Antarctica

Economy - overview:

Fishing off the coast and tourism, both based abroad, account for Antarctica's limited economic activity. Antarctic fisheries in 2005-06 (1 July-30 June) reported landing 128,081 metric tons (estimated fishing from the area covered by the Convention on the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Antarctic Treaty area). Unregulated fishing, particularly of Patagonian toothfish (*Dissostichus eleginoides*), is a serious problem. The CCAMLR determines the recommended catch limits for marine species. A total of 36,460 tourists visited the Antarctic Treaty area in the 2006-07 Antarctic summer, up from the 30,877 visitors the previous year (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO); this does not include passengers on overflights). Nearly all of them were passengers on commercial (nongovernmental) ships and several yachts that make trips during the summer. Most tourist trips last approximately two weeks.

Military Antarctica

Military - note:

the Antarctic Treaty prohibits any measures of a military nature, such as the establishment of military bases and fortifications, the carrying out of military maneuvers, or the testing of any type of weapon; it permits the use of military personnel or equipment for scientific research or for any other peaceful purposes

Transnational Antarctica

Issues

Disputes - international:

the Antarctic Treaty freezes, and most states do not recognize, the land and maritime territorial claims made by Argentina, Australia, Chile, France, New Zealand, Norway, and the United Kingdom (some overlapping) for three-fourths of the continent; the US and Russia reserve the right to make claims; no claims have been made in the sector between 90 degrees west and 150 degrees west; the International Whaling Commission created a sanctuary around the entire continent to deter catches by countries claiming to conduct scientific whaling; Australia has established a similar preserve in the waters around its territorial claim

Introduction
Antigua and Barbuda

Background:

The Siboney were the first to inhabit the islands of Antigua and Barbuda in 2400 B.C., but Arawak Indians populated the islands when COLUMBUS landed on his second voyage in 1493. Early settlements by the Spanish and French were succeeded by the English who formed a colony in 1667. Slavery, established to run the sugar plantations on Antigua, was abolished in 1834. The islands became an independent state within the British Commonwealth of Nations in 1981.

Economy Antigua and Barbuda

Economy - overview:

Antigua has a relatively high GDP per capita in comparison to most other Caribbean nations. It has experienced solid growth since 2003, driven by a construction boom in hotels and housing that which should wind down in 2008. Tourism continues to dominate the economy, accounting for more than half of GDP. The dual-island nation's agricultural production is focused on the domestic market and constrained by a limited water supply and a labor shortage stemming from the lure of higher wages in tourism and construction. Manufacturing comprises enclave-type assembly for export with major products being bedding, handicrafts, and electronic components. Prospects for economic growth in the medium term will continue to depend on income growth in the industrialized world, especially in the US, which accounts for slightly more than one-third of tourist arrivals. Since taking office in 2004, the SPENCER government has adopted an ambitious fiscal reform program, but will continue to be saddled by its debt burden with a debt-to-GDP ratio exceeding 100%.

@Arctic Ocean

Introduction
Arctic Ocean

Background:

The Arctic Ocean is the smallest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and the recently delimited Southern Ocean). The Northwest Passage (US and Canada) and Northern Sea Route (Norway and Russia) are two important seasonal waterways. A sparse network of air, ocean, river, and land routes circumscribes the Arctic Ocean.

Geography Arctic Ocean

Location:

body of water between Europe, Asia, and North America, mostly north of the Arctic Circle

Geographic coordinates:

90 00 N, 0 00 E

Map references:

Arctic Region

Area:

total: 14.056 million sq km note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, East Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Area - comparative:

slightly less than 1.5 times the size of the US

Coastline:

45,389 km

Climate:

polar climate characterized by persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain:

central surface covered by a perennial drifting polar icepack that, on average, is about 3 meters thick, although pressure ridges may be three times that thickness; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Elevation extremes:

lowest point: Fram Basin -4,665 m highest point: sea level 0 m

Natural resources:

sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals and whales)

Natural hazards:

ice islands occasionally break away from northern Ellesmere Island; icebergs calved from glaciers in western Greenland and extreme northeastern Canada; permafrost in islands; virtually ice locked from October to June; ships subject to superstructure icing from October to May

Environment - current issues:

endangered marine species include walruses and whales; fragile ecosystem slow to change and slow to recover from disruptions or damage; thinning polar icepack

Geography - note:

major chokepoint is the southern Chukchi Sea (northern access to the Pacific Ocean via the Bering Strait); strategic location between North America and Russia; shortest marine link between the extremes of eastern and western Russia; floating research stations operated by the US and Russia; maximum snow cover in March or April about 20 to 50 centimeters over the frozen ocean; snow cover lasts about 10 months

Economy Arctic Ocean

Economy - overview:

Economic activity is limited to the exploitation of natural resources, including petroleum, natural gas, fish, and seals.

Transportation Arctic Ocean

Ports and terminals:

Churchill (Canada), Murmansk (Russia), Prudhoe Bay (US)

Transportation - note:

sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Eurasia) are important seasonal waterways

Disputes - international:

the littoral states are engaged in various stages of demonstrating the limits of their continental shelves beyond 200 nautical miles from their declared baselines in accordance with Article 76, paragraph 8, of the United Nations Convention on the Law of the Sea; record summer melting of sea ice in the Arctic has restimulated interest in maritime shipping lanes and sea floor exploration

@Argentina

Introduction
Argentina

Background:

In 1816, the United Provinces of the Rio Plata declared their independence from Spain. After Bolivia, Paraguay, and Uruguay went their separate ways, the area that remained became Argentina. The country's population and culture were heavily shaped by immigrants from throughout Europe, but most particularly Italy and Spain, which provided the largest percentage of newcomers from 1860 to 1930. Up until about the mid-20th century, much of Argentina's history was dominated by periods of internal political conflict between Federalists and Unitarians and between civilian and military factions. After World War II, an era of Peronist authoritarian rule and interference in

subsequent governments was followed by a military junta that took power in 1976. Democracy returned in 1983, and has persisted despite numerous challenges, the most formidable of which was a severe economic crisis in 2001-02 that led to violent public protests and the resignation of several interim presidents. The economy has recovered strongly since bottoming out in 2002.

Economy Argentina

Economy - overview:

Argentina benefits from rich natural resources, a highly literate population, an export-oriented agricultural sector, and a diversified industrial base. Although one of the world's wealthiest countries 100 years ago, Argentina suffered during most of the 20th century from recurring economic crises, persistent fiscal and current account deficits, high inflation, mounting external debt, and capital flight. A severe depression, growing public and external indebtedness, and a bank run culminated in 2001 in the most serious economic, social, and political crisis in the country's turbulent history. Interim President Adolfo RODRIGUEZ SAA declared a default - the largest in history - on the government's foreign debt in December of that year, and abruptly resigned only a few days after taking office. His successor, Eduardo DUHALDE, announced an end to the peso's decade-long 1-to-1 peg to the US dollar in early 2002. The economy bottomed out that year, with real GDP 18% smaller than in 1998 and almost 60% of Argentines under the poverty line. Real GDP rebounded to grow by an average 9% annually over the subsequent five years, taking advantage of previously idled industrial capacity and labor, an audacious debt restructuring and reduced debt burden, excellent international financial conditions, and expansionary monetary and fiscal policies. Inflation, however, reached double-digit levels in 2006 and the government of President Nestor KIRCHNER responded with "voluntary" price agreements with businesses, as well as export taxes and restraints. Multi-year price freezes on electricity and natural gas rates for residential users stoked consumption and kept private investment away, leading to restrictions on industrial use and blackouts in 2007.

Military - note:

the Argentine military is a well-organized force constrained by the country's prolonged economic hardship; the country has recently experienced a strong recovery, and the military is implementing a modernization plan aimed at making the ground forces lighter and more responsive (2008)

Disputes - international:

Argentina continues to assert its claims to the UK-administered Falkland Islands (Islas Malvinas), South Georgia, and the South Sandwich Islands in its constitution, forcibly occupying the Falklands in 1982, but in 1995 agreed no longer to seek settlement by force; territorial claim in Antarctica partially overlaps UK and Chilean claims; unruly region at convergence of Argentina-Brazil-Paraguay borders is locus of money laundering, smuggling, arms and illegal narcotics trafficking, and fundraising for extremist organizations; uncontested dispute between Brazil and Uruguay over Brazileira/Brasiliera Island in the Quaraí/Cuareim River leaves the tripoint with Argentina in question; in 2006, Argentina went to the ICJ to protest, on environmental grounds, the construction of two pulp mills in Uruguay on the Uruguay River, which forms the boundary; both parties presented their pleadings in 2007 with Argentina's reply in January and Uruguay's rejoinder in July 2008; the joint boundary commission, established by Chile and Argentina in 2001 has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Trafficking in persons:

current situation: Argentina is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; most victims are trafficked within the country, from rural to urban areas; child sex tourism is a problem; foreign women and children, primarily from Paraguay, Brazil, and the Dominican Republic, are trafficked to Argentina for commercial sexual exploitation; Argentine women and girls are also trafficked to neighboring countries, Mexico, and Western Europe for sexual exploitation; a significant number of Bolivians, Peruvians, and Paraguayans are trafficked into the country for forced labor in sweatshops, agriculture, and as domestic servants tier rating: Tier 2 Watch List - despite some progress, Argentina remains on the Tier 2 Watch List for the third consecutive year for its failure to show evidence of increasing efforts to combat human trafficking, particularly in terms of providing adequate assistance to victims and curbing official complicity with trafficking activity, especially on the provincial and local levels; the Argentine Congress has demonstrated progress by enacting much-needed and first-ever federal anti-trafficking legislation (2008)

Illicit drugs:

a transshipment country for cocaine headed for Europe; some money-laundering activity, especially in the Tri-Border Area; law enforcement corruption; a source for precursor chemicals; increasing domestic consumption of drugs in urban centers, especially cocaine base and synthetic drugs

Introduction
Armenia

Background:

Armenia prides itself on being the first nation to formally adopt Christianity (early 4th century). Despite periods of autonomy, over the centuries Armenia came under the sway of various empires including the Roman, Byzantine, Arab, Persian, and Ottoman. During World War I in the western portion of Armenia, Ottoman Turkey instituted a policy of forced resettlement coupled with other harsh practices that resulted in an estimated 1 million Armenian deaths. The eastern area of Armenia was ceded by the Ottomans to Russia in 1828; this portion declared its independence in 1918, but was conquered by the Soviet Red Army in 1920. Armenian leaders remain preoccupied by the long conflict with Muslim Azerbaijan over Nagorno-Karabakh, a primarily Armenian-populated region, assigned to Soviet Azerbaijan in the 1920s by Moscow. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, Armenian forces held not only Nagorno-Karabakh

but also a significant portion of Azerbaijan proper. The economies of both sides have been hurt by their inability to make substantial progress toward a peaceful resolution. Turkey imposed an economic blockade on Armenia and closed the common border because of the Armenian separatists' control of Nagorno-Karabakh and surrounding areas.

Economy Armenia

Economy - overview:

Since the breakup of the Soviet Union in 1991, Armenia has made progress in implementing many economic reforms including privatization, price reforms, and prudent fiscal policies. The conflict with Azerbaijan over the ethnic Armenian-dominated region of Nagorno-Karabakh contributed to a severe economic decline in the early 1990s. By 1994, however, the Armenian Government launched an ambitious IMF-sponsored economic liberalization program that resulted in positive growth rates. Economic growth has averaged over 13% in recent years. Armenia has managed to reduce poverty, slash inflation, stabilize its currency, and privatize most small- and medium-sized enterprises. Under the old Soviet central planning system, Armenia developed a modern industrial sector, supplying machine tools, textiles, and other manufactured goods to sister republics, in exchange for raw materials and energy. Armenia has since switched to small-scale agriculture and away from the large agroindustrial complexes of the Soviet era. Nuclear power plants built at Metsamor in the 1970s were closed following the 1988 Spitak Earthquake, though they sustained no damage. One of the two reactors was re-opened in 1995, but the Armenian government is under international pressure to close it due to concerns that the Soviet era design lacks

important safeguards. Metsamor provides 40 percent of the country's electricity - hydropower accounts for about one-fourth. Economic ties with Russia remain close, especially in the energy sector. The electricity distribution system was privatized in 2002 and bought by Russia's RAO-UES in 2005. Construction of a pipeline to deliver natural gas from Iran to Armenia is halfway completed and is scheduled to be commissioned by January 2009. Armenia has some mineral deposits (copper, gold, bauxite). Pig iron, unwrought copper, and other nonferrous metals are Armenia's highest valued exports. Armenia's severe trade imbalance has been offset somewhat by international aid, remittances from Armenians working abroad, and foreign direct investment. Armenia joined the WTO in January 2003. The government made some improvements in tax and customs administration in recent years, but anti-corruption measures will be more difficult to implement. Despite strong economic growth, Armenia's unemployment rate remains high. Armenia will need to pursue additional economic reforms in order to improve its economic competitiveness and to build on recent improvements in poverty and unemployment, especially given its economic isolation from two of its nearest neighbors, Turkey and Azerbaijan.

Issues

Disputes - international:

Armenia supports ethnic Armenian secessionists in Nagorno-Karabakh and since the early 1990s, has militarily occupied 16% of Azerbaijan - Organization for Security and Cooperation in Europe (OSCE) continues to mediate dispute; over 800,000 mostly ethnic Azerbaijanis were driven from the occupied lands and Armenia; about 230,000 ethnic Armenians were driven from their homes in Azerbaijan into Armenia and Nagorno-Karabakh; Azerbaijan seeks transit route through Armenia to connect to Naxcivan exclave; border with Turkey remains closed over Nagorno-Karabakh dispute; ethnic Armenian groups in Javakheti region of Georgia seek greater autonomy; Armenians continue to emigrate, primarily to Russia, seeking employment

Refugees and internally displaced persons:

refugees (country of origin): 113,295 (Azerbaijan) IDPs: 8,400 (conflict with Azerbaijan over Nagorno-Karabakh, majority have returned home since 1994 ceasefire) (2007)

Trafficking in persons:

current situation: Armenia is primarily a source country for women and girls trafficked to the UAE and Turkey for the purpose of commercial sexual exploitation; Armenian men and women are trafficked to Turkey and Russia for the purpose of forced labor tier rating: Tier 2 Watch List - Armenia is placed on the Tier 2 Watch List for a fourth consecutive year; its efforts to increase compliance with the minimum standards were assessed based on its commitments to undertake future actions, particularly in the areas of improving victim protection and assistance; while the government elevated anti-trafficking responsibilities to the ministerial level, adopted a new National Action Plan, and drafted a National Referral Mechanism, it has yet to show tangible progress in identifying and protecting victims or in tackling trafficking complicity of government officials; the Armenian Government made some notable improvements in its anti-trafficking law enforcement efforts, but it failed to demonstrate evidence of investigations, prosecutions, convictions, and sentences of officials complicit in trafficking (2008)

Illicit drugs:

illicit cultivation of small amount of cannabis for domestic consumption; minor transit point for illicit drugs - mostly opium and hashish - moving from Southwest Asia to Russia and to a lesser extent the rest of Europe

Introduction
Aruba

Background:

Discovered and claimed for Spain in 1499, Aruba was acquired by the Dutch in 1636. The island's economy has been dominated by three main industries. A 19th century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. Aruba seceded from the Netherlands Antilles in 1986 and became a separate, autonomous member of the Kingdom of the Netherlands. Movement toward full independence was halted at Aruba's request in 1990.

Economy
Aruba

Economy - overview:

Tourism is the mainstay of the small, open Aruban economy, with offshore banking and oil refining and storage also important. The rapid growth of the tourism sector over the last decade has resulted in a substantial expansion of other activities. Over 1.5 million tourists per year visit Aruba, with 75% of those from the US. Construction continues to boom, with hotel capacity five times the 1985 level. In addition, the country's oil refinery reopened in 1993, providing a major source of employment, foreign exchange earnings, and growth. Tourist arrivals have rebounded strongly following a dip after the 11 September 2001 attacks. The island experiences only a brief low season, and hotel occupancy in 2004 averaged 80%, compared to 68% throughout the rest of the Caribbean. The government has made cutting the budget and trade deficits a high priority.

Introduction
Ashmore and Cartier Islands

Background:

These uninhabited islands came under Australian authority in 1931; formal administration began two years later. Ashmore Reef supports a rich and diverse avian and marine habitat; in 1983, it became a National Nature Reserve. Cartier Island, a former bombing range, became a marine reserve in 2000.

@Atlantic Ocean

Introduction
Atlantic Ocean

Background:

The Atlantic Ocean is the second largest of the world's five oceans (after the Pacific Ocean, but larger than the Indian Ocean, Southern Ocean, and Arctic Ocean). The Kiel Canal (Germany), Oresund (Denmark-Sweden), Bosphorus (Turkey), Strait of Gibraltar (Morocco-Spain), and the Saint Lawrence Seaway (Canada-US) are important strategic access waterways. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth world ocean, the Southern Ocean, removed the portion of the Atlantic Ocean south of 60 degrees south latitude.

Geography
Atlantic Ocean

Location:

body of water between Africa, Europe, the Southern Ocean, and the Western Hemisphere

Geographic coordinates:
0 00 N, 25 00 W

Map references:

Area:

total:	76.762	million	sq	km
note:	includes	Baltic Sea,	Black Sea,	Caribbean Sea,
	Denmark Strait,	part of the	Drake Passage,	Gulf of Mexico,
				Labrador

Sea, Mediterranean Sea, North Sea, Norwegian Sea, almost all of the Scotia Sea, and other tributary water bodies

Area - comparative:

slightly less than 6.5 times the size of the US

Coastline:

111,866 km

Climate:

tropical cyclones (hurricanes) develop off the coast of Africa near Cape Verde and move westward into the Caribbean Sea; hurricanes can occur from May to December, but are most frequent from August to November

Terrain:

surface usually covered with sea ice in Labrador Sea, Denmark Strait, and coastal portions of the Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic, counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Elevation extremes:

lowest point: Milwaukee Deep in the Puerto Rico Trench -8,605 m highest point: sea level 0 m

Natural resources:

oil and gas fields, fish, marine mammals (seals and whales), sand and gravel aggregates, placer deposits, polymetallic nodules, precious stones

Natural hazards:

icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic Ocean from February to August and have been spotted as far south as Bermuda and the Madeira Islands; ships subject to superstructure icing in extreme northern Atlantic from October to May; persistent fog can be a maritime hazard from May to September; hurricanes (May to December)

Environment - current issues:

endangered marine species include the manatee, seals, sea lions, turtles, and whales; drift net fishing is hastening the decline of fish stocks and contributing to international disputes; municipal sludge pollution off eastern US, southern Brazil, and eastern Argentina; oil pollution in Caribbean Sea, Gulf of Mexico, Lake Maracaibo, Mediterranean Sea, and North Sea; industrial waste and municipal sewage pollution in Baltic Sea, North Sea, and Mediterranean Sea

Geography - note:

major chokepoints include the Dardanelles, Strait of Gibraltar, access to the Panama and Suez Canals; strategic straits include the Strait of Dover, Straits of Florida, Mona Passage, The Sound (Oresund), and Windward Passage; the Equator divides the Atlantic Ocean into the North Atlantic Ocean and South Atlantic Ocean

Economy Atlantic Ocean

Economy - overview:

The Atlantic Ocean provides some of the world's most heavily trafficked sea routes, between and within the Eastern and Western Hemispheres. Other economic activity includes the exploitation of natural resources, e.g., fishing, dredging of aragonite sands (The Bahamas), and production of crude oil and natural gas (Caribbean Sea, Gulf of Mexico, and North Sea).

Transportation Atlantic Ocean

Transportation - note:

Kiel Canal and Saint Lawrence Seaway are two important waterways; significant domestic commercial and recreational use of Intracoastal Waterway on central and south Atlantic seaboard and Gulf of Mexico coast of US; the International Maritime Bureau reports the territorial waters of littoral states and offshore Atlantic waters as high risk for piracy and armed robbery against ships, particularly in the Gulf of Guinea off West Africa, the east coast of Brazil, and the Caribbean Sea; numerous commercial vessels have been attacked and hijacked both at anchor and while underway; hijacked vessels are often disguised and cargoes stolen; crews have been robbed and stores or cargoes stolen

Introduction
Australia

Background:

Aboriginal settlers arrived on the continent from Southeast Asia about 40,000 years before the first Europeans began exploration in the 17th century. No formal territorial claims were made until 1770, when Capt. James COOK took possession in the name of Great Britain. Six colonies were created in the late 18th and 19th centuries; they federated and became the Commonwealth of Australia in 1901. The new country took advantage of its natural resources to rapidly develop agricultural and manufacturing industries and to make a major contribution to the British effort in World Wars I and II. In recent decades, Australia has transformed itself into an internationally competitive, advanced market economy. It boasted one of the OECD's fastest growing economies during the 1990s, a performance due in large part to economic reforms adopted in the 1980s. Long-term concerns include climate-change issues such as the depletion of the ozone layer and more frequent droughts, and management and conservation of coastal areas, especially the Great Barrier Reef.

Economy
Australia

Economy - overview:

Australia has an enviable, strong economy with a per capita GDP on par with the four dominant West European economies. Robust business and consumer confidence and high export prices for raw materials and agricultural products are fueling the economy, particularly in mining states. Australia's emphasis on reforms, low inflation, a housing market boom, and growing ties with China have been key factors behind the economy's 16 solid years of expansion. Drought, robust import demand, and a strong currency have pushed the trade deficit up in recent years, while infrastructure bottlenecks and a tight labor market are constraining growth in export volumes and stoking inflation. Australia's budget has been in surplus since 2002 due to strong revenue growth.

Introduction Austria

Background:

Once the center of power for the large Austro-Hungarian Empire, Austria was reduced to a small republic after its defeat in World War I. Following annexation by Nazi Germany in 1938 and subsequent occupation by the victorious Allies in 1945, Austria's status remained unclear for a decade. A State Treaty signed in 1955 ended the occupation, recognized Austria's independence, and forbade unification with Germany. A constitutional law that same year declared the country's "perpetual neutrality" as a condition for Soviet military withdrawal. The Soviet Union's collapse in 1991 and Austria's entry into the European Union in 1995 have altered the meaning of this neutrality. A prosperous, democratic country, Austria entered the EU Economic and Monetary Union in 1999.

Economy
Austria

Economy - overview:

Austria, with its well-developed market economy and high standard of living, is closely tied to other EU economies, especially Germany's. The Austrian economy also benefits greatly from strong commercial relations, especially in the banking and insurance sectors, with central, eastern, and southeastern Europe. The economy features a large service sector, a sound industrial sector, and a small, but highly developed agricultural sector. Membership in the EU has drawn an influx of foreign investors attracted by Austria's access to the single European market and proximity to the new EU economies. The outgoing government has successfully pursued a comprehensive economic reform program, aimed at streamlining government and creating a more competitive business environment, further strengthening Austria's attractiveness as an investment location. It has implemented effective pension reforms; however, lower taxes in 2005-06 led to a small budget deficit in 2006 and 2007. Boosted by strong exports, growth nevertheless reached 3.3% in both 2006 and 2007, although the economy may slow in 2008 because of the strong euro, high oil prices, and problems in international financial markets. To meet increased competition - especially from new EU members and Central European countries - Austria will need to continue restructuring, emphasizing knowledge-based sectors of the economy, and encouraging greater labor flexibility and greater labor participation by its aging population.

@Azerbaijan

Introduction Azerbaijan

Background:

Azerbaijan - a nation with a majority-Turkic and majority-Muslim population - was briefly independent from 1918 to 1920; it regained its independence after the collapse of the Soviet Union in 1991. Despite a 1994 cease-fire, Azerbaijan has yet to resolve its conflict with Armenia over the Azerbaijani Nagorno-Karabakh enclave (largely Armenian populated). Azerbaijan has lost 16% of its territory and must support some 600,000 internally displaced persons as a result of the conflict. Corruption is ubiquitous, and the government has been accused of authoritarianism. Although the poverty rate has been reduced in recent years, the promise of widespread wealth from development of Azerbaijan's energy sector remains largely unfulfilled.

Economy Azerbaijan

Economy - overview:

Azerbaijan's high economic growth in 2006 and 2007 is attributable to large and growing oil exports. Azerbaijan's oil production declined through 1997, but has registered an increase every year since. Negotiation of production-sharing arrangements (PSAs) with foreign firms, which have committed \$60 billion to long-term oilfield development, should generate the funds needed to spur future industrial development. Oil production under the first of these PSAs, with the Azerbaijan International Operating Company, began in November 1997. A consortium of Western oil companies began pumping 1 million barrels a day from a large offshore field in early 2006, through a \$4 billion pipeline it built from Baku to Turkey's Mediterranean port of Ceyhan. By 2010 revenues from this project will double the country's current GDP. Azerbaijan shares all the formidable problems of the former Soviet republics in making the transition from a command to a market economy, but its considerable energy resources brighten its long-term prospects. Baku has only recently begun making progress on economic reform, and old economic ties and structures are slowly being replaced. Several other obstacles impede Azerbaijan's economic progress: the need for stepped up foreign investment in the non-energy sector, the continuing conflict with Armenia over the Nagorno-Karabakh region, pervasive corruption, and elevated inflation. Trade with Russia and the other former Soviet republics is declining in importance, while trade is building with Turkey and the nations of Europe. Long-term prospects will depend on world oil prices, the location of new oil and gas pipelines in the region, and Azerbaijan's ability to manage its energy wealth.

Issues

Disputes - international:

Armenia supports ethnic Armenian secessionists in Nagorno-Karabakh and since the early 1990s has militarily occupied 16% of Azerbaijan; over 800,000 mostly ethnic Azerbaijanis were driven from the occupied lands and Armenia; about 230,000 ethnic Armenians were driven from their homes in Azerbaijan into Armenia and Nagorno-Karabakh; Azerbaijan seeks transit route through Armenia to connect to Naxcivan exclave; Organization for Security and Cooperation in Europe (OSCE) continues to mediate dispute; Azerbaijan, Kazakhstan, and Russia have ratified Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on an even one-fifth allocation and challenges Azerbaijan's hydrocarbon exploration in disputed waters; bilateral talks continue with Turkmenistan on dividing the seabed and contested oilfields in the middle of the Caspian; Azerbaijan and Georgia continue to discuss the alignment of their boundary at certain crossing areas

Refugees and internally displaced persons:

refugees (country of origin): 2,400 (Russia) IDPs: 580,000-690,000 (conflict with Armenia over Nagorno-Karabakh) (2007)

Trafficking in persons:

current situation: Azerbaijan is primarily a source and transit country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; women and some children from Azerbaijan are trafficked to Turkey and the UAE for the purpose of sexual exploitation; men and boys are trafficked to Russia for the purpose of forced labor; Azerbaijan serves as a transit country for victims from Uzbekistan, Kyrgyzstan, Kazakhstan, and Moldova trafficked to Turkey and the UAE for sexual exploitation tier rating: Tier 2 Watch List - Azerbaijan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in

persons, particularly efforts to investigate, prosecute, and punish traffickers; to address complicity among law enforcement personnel; and to adequately identify and protect victims in Azerbaijan; the government has yet to develop a much-needed mechanism to identify potential trafficking victims and refer them to safety and care; poor treatment of trafficking victims in courtrooms continues to be a problem (2008)

Illicit drugs:

limited illicit cultivation of cannabis and opium poppy, mostly for CIS consumption; small government eradication program; transit point for Southwest Asian opiates bound for Russia and to a lesser extent the rest of Europe

Introduction
Bahamas, The

Background:

Lucayan Indians inhabited the islands when Christopher COLUMBUS first set foot in the New World on San Salvador in 1492. British settlement of the islands began in 1647; the islands became a colony in 1783. Since attaining independence from the UK in 1973, The Bahamas have prospered through tourism and international banking and investment management. Because of its geography, the country is a major transshipment point for illegal drugs, particularly shipments to the US and Europe, and its territory is used for smuggling illegal migrants into the US.

Economy Bahamas, The

Economy - overview:

The Bahamas is one of the wealthiest Caribbean countries with an economy heavily dependent on tourism and offshore banking. Tourism together with tourism-driven construction and manufacturing accounts for approximately 60% of GDP and directly or indirectly employs half of the archipelago's labor force. Steady growth in tourism receipts and a boom in construction of new hotels, resorts, and residences had led to solid GDP growth in recent years, but tourist arrivals have been on the decline since

2006. Financial services constitute the second-most important sector of the Bahamian economy and, when combined with business services, account for about 36% of GDP. However, since December 2000, when the government enacted new regulations on the financial sector, many international businesses have left The Bahamas. Manufacturing and agriculture combined contribute approximately a tenth of GDP and show little growth, despite government incentives aimed at those sectors. Overall growth prospects in the short run rest heavily on the fortunes of the tourism sector. Tourism, in turn, depends on growth in the US, the source of more than 80% of the visitors.

Introduction
Bahrain

Background:

In 1783, the al-Khalifa family captured Bahrain from the Persians. In order to secure these holdings, it entered into a series of treaties with the UK during the 19th century that made Bahrain a British protectorate. The archipelago attained its independence in 1971. Bahrain's small size and central location among Persian Gulf countries require it to play a delicate balancing act in foreign affairs among its larger neighbors. Facing

declining oil reserves, Bahrain has turned to petroleum processing and refining and has transformed itself into an international banking center. King HAMAD bin Isa al-Khalifa, after coming to power in 1999, pushed economic and political reforms to improve relations with the Shia community. Shia political societies participated in 2006 parliamentary and municipal elections. Al Wifaq, the largest Shia political society, won the largest number of seats in the elected chamber of the legislature. However, Shi'a discontent has resurfaced in recent years with street demonstrations and occasional low-level violence.

Economy Bahrain

Economy - overview:

With its highly developed communication and transport facilities, Bahrain is home to numerous multinational firms with business in the Gulf. Petroleum production and refining account for over 60% of Bahrain's export receipts, over 70% of government revenues, and 11% of GDP (exclusive of allied industries), underpinning Bahrain's strong economic growth in recent years. Aluminum is Bahrain's second major export after oil. Other major segments of Bahrain's economy are the financial and construction sectors. Bahrain is focused on Islamic banking and is competing on an international scale with Malaysia as a worldwide banking center. Bahrain is actively pursuing the diversification and privatization of its economy to reduce the country's dependence on oil. As part of this effort, in August 2006 Bahrain and the US implemented a Free Trade Agreement (FTA), the first FTA between the US and a Gulf state. Continued strong growth hinges on Bahrain's ability to acquire new natural gas supplies as feedstock to support its expanding petrochemical and aluminum industries. Unemployment, especially among the young, and the depletion of oil and underground water resources are long-term economic problems.

Trafficking in persons:

current situation: Bahrain is a destination country for men and women trafficked for the purposes of involuntary servitude and commercial sexual exploitation; men and women from Africa, South Asia, and Southeast Asia migrate voluntarily to Bahrain to work as laborers or domestic servants where some face conditions of involuntary servitude such as unlawful withholding of passports, restrictions on movements, non-payment of wages, threats, and physical or sexual abuse; women from Thailand, Morocco, Eastern Europe, and Central Asia are trafficked to Bahrain for the purpose of commercial sexual exploitation tier rating: Tier 2 Watch List - Bahrain is on the Tier 2

Watch List for failing to show evidence of increased efforts to combat human trafficking, particularly efforts that enforce laws against trafficking in persons, and that prevent the punishment of victims of trafficking; during 2007, Bahrain passed a comprehensive law prohibiting all forms of trafficking in persons; the government also established a specialized anti-trafficking unit within the Ministry of Interior to investigate trafficking crimes; however, the government did not report any prosecutions or convictions for trafficking offenses during 2007, despite reports of a substantial problem of involuntary servitude and sex trafficking (2008)

Introduction
Bangladesh

Background:

Europeans began to set up trading posts in the area of Bangladesh in the 16th century; eventually the British came to dominate the region and it became part of British India. In 1947, West Pakistan and East Bengal (both primarily Muslim) separated from India (largely Hindu) and jointly became the new country of Pakistan. East Bengal became East Pakistan in 1955, but the awkward arrangement of a two-part country with its territorial units separated by 1,600 km left the Bengalis marginalized and dissatisfied. East Pakistan seceded from its union with West Pakistan in 1971 and was renamed Bangladesh. A military-backed caretaker regime suspended planned parliamentary elections in January 2007 in an effort to reform the political system and root out corruption; the regime has pledged new democratic elections by the end of 2008. About

a third of this extremely poor country floods annually during the monsoon rainy season, hampering economic development.

Economy Bangladesh

Economy - overview:

The economy has grown 5-6% over the past few years despite inefficient state-owned enterprises, delays in exploiting natural gas resources, insufficient power supplies, and slow implementation of economic reforms. Bangladesh remains a poor, overpopulated,

and inefficiently-governed nation. Although more than half of GDP is generated through the service sector, nearly two-thirds of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product. Garment exports and remittances from Bangladeshis working overseas, mainly in the Middle East and East Asia, fuel economic growth.

Introduction
Barbados

Background:

The island was uninhabited when first settled by the British in 1627. Slaves worked the sugar plantations established on the island until 1834 when slavery was abolished. The economy remained heavily dependent on sugar, rum, and molasses production through most of the 20th century. The gradual introduction of social and political reforms in the 1940s and 1950s led to complete independence from the UK in 1966. In the 1990s, tourism and manufacturing surpassed the sugar industry in economic importance.

Economy Barbados

Economy - overview:

Historically, the Barbadian economy was dependent on sugarcane cultivation and related activities. However, production in recent years has diversified into light industry and tourism, with about three-quarters of GDP and 80% of exports being attributed to services. Growth has rebounded since 2003, bolstered by increases in construction projects and tourism revenues - reflecting its success in the higher-end segment. The country enjoys one of the highest per capita incomes in the region and an investment grade rating which benefits from its political stability and stable institutions. Offshore finance and information services are important foreign exchange earners and thrive from having the same time zone as eastern US financial centers and a relatively highly educated workforce. The government continues its efforts to reduce unemployment, to encourage direct foreign investment, and to privatize remaining state-owned enterprises.

Introduction

Belarus

Background:

After seven decades as a constituent republic of the USSR, Belarus attained its independence in 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. Belarus and Russia signed a treaty on a two-state union on 8 December 1999 envisioning greater political and economic integration. Although Belarus agreed to a framework to carry out the accord, serious implementation has yet to take place. Since his election in July 1994 as the country's first president, Alexandr LUKASHENKO has steadily consolidated his power through authoritarian means. Government restrictions on freedom of speech and the press, peaceful assembly, and religion continue.

Economy Belarus

Economy - overview:

Belarus has seen little structural reform since 1995, when President LUKASHENKO launched the country on the path of "market socialism." In keeping with this policy, LUKASHENKO reimposed administrative controls over prices and currency exchange rates and expanded the state's right to intervene in the management of private enterprises. Since 2005, the government has re-nationalized a number of private companies. In addition, businesses have been subject to pressure by central and local governments, e.g., arbitrary changes in regulations, numerous rigorous inspections, retroactive application of new business regulations, and arrests of "disruptive" businessmen and factory owners. A wide range of redistributive policies has helped those at the bottom of the ladder; the Gini coefficient is among the lowest in the world. Because of these restrictive economic policies, Belarus has had trouble attracting foreign investment. Nevertheless, GDP growth has been strong in recent years, reaching nearly 7% in 2007, despite the roadblocks of a tough, centrally directed economy with a high, but decreasing, rate of inflation. Belarus receives heavily discounted oil and

natural gas from Russia and much of Belarus' growth can be attributed to the re-export of Russian oil at market prices. Trade with Russia - by far its largest single trade partner - decreased in 2007, largely as a result of a change in the way the Value Added Tax (VAT) on trade was collected. Russia has introduced an export duty on oil shipped to Belarus, which will increase gradually through 2009, and a requirement that Belarusian duties on re-exported Russian oil be shared with Russia - 80% will go to Russia in 2008, and 85% in 2009. Russia also increased Belarusian natural gas prices from \$47 per thousand cubic meters (tcm) to \$100 per tcm in 2007, and plans to increase prices gradually to world levels by 2011. Russia's recent policy of bringing energy prices for Belarus to world market levels may result in a slowdown in economic growth in Belarus over the next few years. Some policy measures, including tightening of fiscal and monetary policies, improving energy efficiency, and diversifying exports, have been introduced, but external borrowing has been the main mechanism used to manage the growing pressures on the economy.

Issues

Disputes - international:

Boundary demarcated with Latvia and Lithuania in 2006; 1997 boundary delimitation treaty with Ukraine remains unratified over unresolved financial claims, preventing demarcation and diminishing border security

Illicit drugs:

limited cultivation of opium poppy and cannabis, mostly for the domestic market; transshipment point for illicit drugs to and via Russia, and to the Baltics and Western Europe; a small and lightly regulated financial center; new anti-money-laundering legislation does not meet international standards; few investigations or prosecutions of money-laundering activities

Introduction
Belgium

Background:

Belgium became independent from the Netherlands in 1830; it was occupied by Germany during World Wars I and II. The country prospered in the past half century as a modern, technologically advanced European state and member of NATO and the EU. Tensions between the Dutch-speaking Flemings of the north and the French-speaking Walloons of the south have led in recent years to constitutional amendments granting these regions formal recognition and autonomy.

Economy Belgium

Economy - overview:

This modern, private-enterprise economy has capitalized on its central geographic location, highly developed transport network, and diversified industrial and commercial base. Industry is concentrated mainly in the populous Flemish area in the north. With few natural resources, Belgium must import substantial quantities of raw materials and export a large volume of manufactures, making its economy unusually dependent on the state of world markets. Roughly three-quarters of its trade is with other EU countries. Public debt is more than 85% of GDP. On the positive side, the government has succeeded in balancing its budget, and income distribution is relatively equal. Belgium began circulating the euro currency in January 2002. Economic growth in 2001-03 dropped sharply because of the global economic slowdown, with moderate recovery in 2004-07. Economic growth and foreign direct investment are expected to slow down in 2008, due to credit tightening, falling consumer and business confidence, and above average inflation. However, with the successful negotiation of the 2008 budget and devolution of power within the government, political tensions seem to be easing and could lead to an improvement in the economic outlook for 2008.

Introduction
Belize

Background:

Belize was the site of several Mayan city states until their decline at the end of the first millennium A.D. The British and Spanish disputed the region in the 17th and 18th centuries; it formally became the colony of British Honduras in 1854. Territorial disputes between the UK and Guatemala delayed the independence of Belize until 1981. Guatemala refused to recognize the new nation until 1992. Tourism has become the mainstay of the economy. Current concerns include an unsustainable foreign debt, high unemployment, growing involvement in the South American drug trade, growing urban crime, and increasing incidences of HIV/AIDS.

Economy
Belize

Economy - overview:

In this small, essentially private-enterprise economy, tourism is the number one foreign exchange earner followed by exports of marine products, citrus, cane sugar, bananas, and garments. The government's expansionary monetary and fiscal policies, initiated in September 1998, led to sturdy GDP growth averaging nearly 4% in 1999-2007. Oil discoveries in 2006 bolstered the economic growth in 2006 and 2007. Major concerns continue to be the sizable trade deficit and unsustainable foreign debt. In February 2007, the government restructured nearly all of its public external commercial debt, which will reduce interest payments and relieve liquidity concerns. A key short-term objective remains the reduction of poverty with the help of international donors.

Introduction
Benin

Background:

Present day Benin was the site of Dahomey, a prominent West African kingdom that rose in the 15th century. The territory became a French Colony in 1872 and achieved independence on 1 August 1960, as the Republic of Benin. A succession of military governments ended in 1972 with the rise to power of Mathieu KEREKOU and the

establishment of a government based on Marxist-Leninist principles. A move to representative government began in 1989. Two years later, free elections ushered in former Prime Minister Nicephore SOGLO as president, marking the first successful transfer of power in Africa from a dictatorship to a democracy. KEREKOU was returned to power by elections held in 1996 and 2001, though some irregularities were alleged. KEREKOU stepped down at the end of his second term in 2006 and was succeeded by Thomas YAYI Boni, a political outsider and independent. YAYI has begun a high profile fight against corruption and has strongly promoted accelerating Benin's economic growth.

Economy Benin

Economy - overview:

The economy of Benin remains underdeveloped and dependent on subsistence agriculture, cotton production, and regional trade. Growth in real output has averaged around 5% in the past seven years, but rapid population growth has offset much of this

increase. Inflation has subsided over the past several years. In order to raise growth still further, Benin plans to attract more foreign investment, place more emphasis on tourism, facilitate the development of new food processing systems and agricultural products, and encourage new information and communication technology. Specific projects to improve the business climate by reforms to the land tenure system, the commercial justice system, and the financial sector were included in Benin's \$307 million Millennium Challenge Account grant signed in February 2006. The 2001 privatization policy continues in telecommunications, water, electricity, and agriculture though the government annulled the privatization of Benin's state cotton company in November 2007 after the discovery of irregularities in the bidding process. The Paris Club and bilateral creditors have eased the external debt situation, with Benin benefiting from a G8 debt reduction announced in July 2005, while pressing for more rapid structural reforms. An insufficient electrical supply continues to adversely affect Benin's economic growth though the government recently has taken steps to increase domestic power production.

Introduction
Bermuda

Background:

Bermuda was first settled in 1609 by shipwrecked English colonists headed for Virginia. Tourism to the island to escape North American winters first developed in Victorian times. Tourism continues to be important to the island's economy, although international business has overtaken it in recent years. Bermuda has developed into a highly successful offshore financial center. Although a referendum on independence from the UK was soundly defeated in 1995, the present government has reopened debate on the issue.

Economy
Bermuda

Economy - overview:

Bermuda enjoys the third highest per capita income in the world, more than 50% higher than that of the US. Its economy is primarily based on providing financial services for international business and luxury facilities for tourists. A number of reinsurance companies relocated to the island following the 11 September 2001 attacks and again after Hurricane Katrina in August 2005, contributing to the expansion of an already robust international business sector. Bermuda's tourism industry - which derives over 80% of its visitors from the US - continues to struggle but remains the island's number two industry. Most capital equipment and food must be imported. Bermuda's industrial sector is small, although construction continues to be important; the average

cost of a house in June 2003 had risen to \$976,000. Agriculture is limited with only 20% of the land being arable.

@Bhutan

Introduction
Bhutan

Background:

In 1865, Britain and Bhutan signed the Treaty of Sinchulu, under which Bhutan would receive an annual subsidy in exchange for ceding some border land to British India. Under British influence, a monarchy was set up in 1907; three years later, a treaty was signed whereby the British agreed not to interfere in Bhutanese internal affairs and Bhutan allowed Britain to direct its foreign affairs. This role was assumed by independent India after 1947. Two years later, a formal Indo-Bhutanese accord returned the areas of Bhutan annexed by the British, formalized the annual subsidies the country received, and defined India's responsibilities in defense and foreign relations. A refugee issue of over 100,000 Bhutanese in Nepal remains unresolved; 90% of the refugees are housed in seven United Nations Office of the High Commissioner for Refugees (UNHCR) camps. In March 2005, King Jigme Singye WANGCHUCK unveiled the government's draft constitution - which would introduce major democratic reforms - and pledged to hold a national referendum for its approval. In December 2006, the King abdicated the throne to his son, Jigme Khesar Namgyel WANGCHUCK, in order to give him experience as head of state before the democratic transition. In early 2007, India and Bhutan renegotiated their treaty to allow Bhutan greater autonomy in

conducting its foreign policy, although Thimphu continues to coordinate policy decisions in this area with New Delhi. In July 2007, seven ministers of Bhutan's ten-member cabinet resigned to join the political process, and the cabinet acted as a caretaker regime until democratic elections for seats to the country's first parliament were completed in March 2008. The king ratified the country's first constitution in July 2008.

Economy Bhutan

Economy - overview:

The economy, one of the world's smallest and least developed, is based on agriculture and forestry, which provide the main livelihood for more than 60% of the population. Agriculture consists largely of subsistence farming and animal husbandry. Rugged mountains dominate the terrain and make the building of roads and other infrastructure difficult and expensive. The economy is closely aligned with India's through strong trade and monetary links and dependence on India's financial assistance. The industrial sector is technologically backward, with most production of the cottage industry type. Most development projects, such as road construction, rely on Indian migrant labor. Model education, social, and environment programs are underway with support from multilateral development organizations. Each economic program takes into account the government's desire to protect the country's environment and cultural traditions. For example, the government, in its cautious expansion of the tourist sector, encourages visits by upscale, environmentally conscientious tourists. Detailed controls and uncertain policies in areas such as industrial licensing, trade, labor, and finance continue to hamper foreign investment. Hydropower exports to India had a major impact on growth in 2007.

Introduction
Bolivia

Background:

Bolivia, named after independence fighter Simon BOLIVAR, broke away from Spanish rule in 1825; much of its subsequent history has consisted of a series of nearly 200 coups and countercoups. Democratic civilian rule was established in 1982, but leaders have faced difficult problems of deep-seated poverty, social unrest, and illegal drug production. In December 2005, Bolivians elected Movement Toward Socialism leader Evo MORALES president - by the widest margin of any leader since the restoration of civilian rule in 1982 - after he ran on a promise to change the country's traditional political class and empower the nation's poor majority. However, since taking office, his controversial strategies have exacerbated racial and economic tensions between the Amerindian populations of the Andean west and the non-indigenous communities of the eastern lowlands.

Economy Bolivia

Economy - overview:

Bolivia is one of the poorest and least developed countries in Latin America. Following a disastrous economic crisis during the early 1980s, reforms spurred private investment, stimulated economic growth, and cut poverty rates in the 1990s. The period 2003-05 was characterized by political instability, racial tensions, and violent protests against plans - subsequently abandoned - to export Bolivia's newly discovered natural gas reserves to large northern hemisphere markets. In 2005, the government passed a controversial hydrocarbons law that imposed significantly higher royalties and required foreign firms then operating under risk-sharing contracts to surrender all production to the state energy company, which was made the sole exporter of natural gas. The law

also required that the state energy company regain control over the five companies that were privatized during the 1990s - a process that is still underway. In 2006, higher earnings for mining and hydrocarbons exports pushed the current account surplus to about 12% of GDP and the government's higher tax take produced a fiscal surplus after years of large deficits. Debt relief from the G8 - announced in 2005 - also has significantly reduced Bolivia's public sector debt burden. Private investment as a share of GDP, however, remains among the lowest in Latin America, and inflation reached double-digit levels in 2007.

Issues

Disputes - international:

Chile and Peru rebuff Bolivia's reactivated claim to restore the Atacama corridor, ceded to Chile in 1884, but Chile offers instead unrestricted but not sovereign maritime

access through Chile for Bolivian natural gas and other commodities; an accord placed the long-disputed Isla Suárez/Ilha de Guajará-Mirim, a fluvial island on the Río Mamoré, under Bolivian administration in 1958, but sovereignty remains in dispute

Illicit drugs:

world's third-largest cultivator of coca (after Colombia and Peru) with an estimated 29,500 hectares under cultivation in 2007, a slight increase over 2006; third largest producer of cocaine, estimated at 120 metric tons of potential pure cocaine in 2007; transit country for Peruvian and Colombian cocaine destined for Brazil, Argentina, Chile, Paraguay, and Europe; cultivation generally increasing since 2000, despite eradication and alternative crop programs; weak border controls; some money-laundering activity related to narcotics trade, especially along the borders with Brazil and Paraguay; major cocaine consumption (2007)

Introduction
Bosnia and Herzegovina

Background:

Bosnia and Herzegovina's declaration of sovereignty in October 1991 was followed by a declaration of independence from the former Yugoslavia on 3 March 1992 after a referendum boycotted by ethnic Serbs. The Bosnian Serbs - supported by neighboring Serbia and Montenegro - responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "Greater Serbia." In

March 1994, Bosniaks and Croats reduced the number of warring factions from three to two by signing an agreement creating a joint Bosniak/Croat Federation of Bosnia and Herzegovina. On 21 November 1995, in Dayton, Ohio, the warring parties initialed a peace agreement that brought to a halt three years of interethnic civil strife (the final agreement was signed in Paris on 14 December 1995). The Dayton Peace Accords retained Bosnia and Herzegovina's international boundaries and created a joint multi-ethnic and democratic government charged with conducting foreign, diplomatic, and fiscal policy. Also recognized was a second tier of government comprised of two entities roughly equal in size: the Bosniak/Croat Federation of Bosnia and Herzegovina and the Bosnian Serb-led Republika Srpska (RS). The Federation and RS governments were charged with overseeing most government functions. The Office of the High Representative (OHR) was established to oversee the implementation of the civilian aspects of the agreement. In 1995-96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission was to deter renewed hostilities. European Union peacekeeping troops (EUFOR) replaced SFOR in December 2004; their mission is to maintain peace and stability throughout the country. EUFOR's mission changed from peacekeeping to civil policing in October 2007, with its presence reduced from nearly 7,000 to 2,500 troops.

Economy Bosnia and Herzegovina

Economy - overview:

Bosnia and Herzegovina ranked next to Macedonia as the poorest republic in the old Yugoslav federation. Although agriculture is almost all in private hands, farms are small and inefficient, and the republic traditionally is a net importer of food. The private sector is growing and foreign investment is slowly increasing, but government spending, at nearly 40% of adjusted GDP, remains unreasonably high. The interethnic warfare in Bosnia caused production to plummet by 80% from 1992 to 1995 and unemployment to soar. With an uneasy peace in place, output recovered in 1996-99 at high percentage rates from a low base; but output growth slowed in 2000-02. Part of the lag in output was made up in 2003-07 when GDP growth exceeded 5% per year. National-level statistics are limited and do not capture the large share of black market activity. The konvertibilna marka (convertible mark or BAM)- the national currency introduced in 1998 - is pegged to the euro, and confidence in the currency and the banking sector has increased. Implementing privatization, however, has been slow, particularly in the Federation, although more successful in the Republika Srpska. Banking reform accelerated in 2001 as all the Communist-era payments bureaus were shut down; foreign banks, primarily from Western Europe, now control most of the banking sector. A sizeable current account deficit and high unemployment rate remain the two most serious macroeconomic problems. On 1 January 2006 a new value-added tax (VAT) went into effect. The VAT has been successful in capturing much of the gray market economy and has developed into a significant and predictable source of revenues for all layers of government. Bosnia and Herzegovina became a full member of the Central European Free Trade Agreement in September 2007. The country receives substantial reconstruction assistance and humanitarian aid from the international community but will have to prepare for an era of declining assistance.

Introduction
Botswana

Background:

Formerly the British protectorate of Bechuanaland, Botswana adopted its new name upon independence in 1966. Four decades of uninterrupted civilian leadership, progressive social policies, and significant capital investment have created one of the

most dynamic economies in Africa. Mineral extraction, principally diamond mining, dominates economic activity, though tourism is a growing sector due to the country's conservation practices and extensive nature preserves. Botswana has one of the world's highest known rates of HIV/AIDS infection, but also one of Africa's most progressive and comprehensive programs for dealing with the disease.

Economy Botswana

Economy - overview:

Botswana has maintained one of the world's highest economic growth rates since independence in 1966, though growth slowed to 4.7% annually in 2006-07. Through fiscal discipline and sound management, Botswana has transformed itself from one of the poorest countries in the world to a middle-income country with a per capita GDP of nearly \$15,000 in 2007. Two major investment services rank Botswana as the best credit risk in Africa. Diamond mining has fueled much of the expansion and currently accounts for more than one-third of GDP and for 70-80% of export earnings. Tourism, financial services, subsistence farming, and cattle raising are other key sectors. On the downside, the government must deal with high rates of unemployment and poverty.

Unemployment officially was 23.8% in 2004, but unofficial estimates place it closer to 40%. HIV/AIDS infection rates are the second highest in the world and threaten Botswana's impressive economic gains. An expected leveling off in diamond mining production overshadows long-term prospects.

Introduction
Bouvet Island

Background:

This uninhabited volcanic island is almost entirely covered by glaciers and is difficult to approach. It was discovered in 1739 by a French naval officer after whom the island was named. No claim was made until 1825, when the British flag was raised. In 1928, the UK waived its claim in favor of Norway, which had occupied the island the previous year. In 1971, Norway designated Bouvet Island and the adjacent territorial waters a nature reserve. Since 1977, it has run an automated meteorological station on the island.

Introduction
Brazil

Background:

Following three centuries under the rule of Portugal, Brazil became an independent nation in 1822 and a republic in 1889. By far the largest and most populous country in South America, Brazil overcame more than half a century of military intervention in the governance of the country when in 1985 the military regime peacefully ceded power to civilian rulers. Brazil continues to pursue industrial and agricultural growth and development of its interior. Exploiting vast natural resources and a large labor pool, it is today South America's leading economic power and a regional leader. Highly unequal income distribution and crime remain pressing problems.

Economy Brazil

Economy - overview:

Characterized by large and well-developed agricultural, mining, manufacturing, and service sectors, Brazil's economy outweighs that of all other South American countries and is expanding its presence in world markets. Having weathered 2001-03 financial turmoil, capital inflows are regaining strength and the currency has resumed appreciating. The appreciation has slowed export volume growth, but since 2004, Brazil's growth has yielded increases in employment and real wages. The resilience in the economy stems from commodity-driven current account surpluses, and sound macroeconomic policies that have bolstered international reserves to historically high levels, reduced public debt, and allowed a significant decline in real interest rates. A floating exchange rate, an inflation-targeting regime, and a tight fiscal policy are the three pillars of the economic program. From 2003 to 2007, Brazil ran record trade surpluses and recorded its first current account surpluses since 1992. Productivity gains coupled with high commodity prices contributed to the surge in exports. Brazil improved its debt profile in 2006 by shifting its debt burden toward real denominated and domestically held instruments. "LULA" DA SILVA restated his commitment to fiscal responsibility by maintaining the country's primary surplus during the 2006 election. Following his second inauguration, "LULA" DA SILVA announced a package of further economic reforms to reduce taxes and increase investment in infrastructure. The government's goal of achieving strong growth while reducing the debt burden is likely to create inflationary pressures.

@British Indian Ocean Territory

Introduction

British Indian Ocean Territory

Background:

Formerly administered as part of the British Crown Colony of Mauritius, the British Indian Ocean Territory (BIOT) was established as an overseas territory of the UK in 1965. A number of the islands of the territory were later transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six main island groups comprising the Chagos Archipelago. The largest and most

southerly of the islands, Diego Garcia, contains a joint UK-US naval support facility. All of the remaining islands are uninhabited. Between 1967 and 1973, former agricultural workers, earlier residents in the islands, were relocated primarily to Mauritius, but also to the Seychelles. Negotiations between 1971 and 1982 resulted in the establishment of a trust fund by the British Government as compensation for the displaced islanders, known as Chagossians. Beginning in 1998, the islanders pursued a series of lawsuits against the British Government seeking further compensation and the right to return to the territory. In 2006 and 2007, British court rulings invalidated the immigration policies contained in the 2004 BIOT Constitution Order that had excluded the islanders from the archipelago, but upheld the special military status of Diego Garcia. In 2008, the House of Lords, as the final court of appeal in the UK, ruled in favor of the British Government by overturning the lower court rulings and finding no right of return on the part of the Chagossians.

Economy
British Virgin Islands

Economy - overview:

The economy, one of the most stable and prosperous in the Caribbean, is highly dependent on tourism, generating an estimated 45% of the national income. An estimated 820,000 tourists, mainly from the US, visited the islands in 2005. In the mid-

1980s, the government began offering offshore registration to companies wishing to incorporate in the islands, and incorporation fees now generate substantial revenues. Roughly 400,000 companies were on the offshore registry by yearend 2000. The adoption of a comprehensive insurance law in late 1994, which provides a blanket of confidentiality with regulated statutory gateways for investigation of criminal offenses, made the British Virgin Islands even more attractive to international business. Livestock raising is the most important agricultural activity; poor soils limit the islands' ability to meet domestic food requirements. Because of traditionally close links with the US Virgin Islands, the British Virgin Islands has used the US dollar as its currency since 1959.

Introduction
Brunei

Background:

The Sultanate of Brunei's influence peaked between the 15th and 17th centuries when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In 1888, Brunei became a British protectorate; independence was achieved in 1984. The same family has ruled Brunei for over six centuries. Brunei benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in Asia.

Economy Brunei

Economy - overview:

Brunei has a small well-to-do economy that encompasses a mixture of foreign and domestic entrepreneurship, government regulation, welfare measures, and village tradition. Crude oil and natural gas production account for just over half of GDP and more than 90% of exports. Per capita GDP is among the highest in Asia, and substantial income from overseas investment supplements income from domestic production. The government provides for all medical services and free education through the university level and subsidizes rice and housing. Brunei's leaders are concerned that steadily increased integration in the world economy will undermine internal social cohesion. Plans for the future include upgrading the labor force, reducing unemployment, strengthening the banking and tourist sectors, and, in general, further widening the economic base beyond oil and gas.

Introduction
Bulgaria

Background:

The Bulgars, a Central Asian Turkic tribe, merged with the local Slavic inhabitants in the late 7th century to form the first Bulgarian state. In succeeding centuries, Bulgaria struggled with the Byzantine Empire to assert its place in the Balkans, but by the end of the 14th century the country was overrun by the Ottoman Turks. Northern Bulgaria attained autonomy in 1878 and all of Bulgaria became independent from the Ottoman Empire in 1908. Having fought on the losing side in both World Wars, Bulgaria fell within the Soviet sphere of influence and became a People's Republic in 1946. Communist domination ended in 1990, when Bulgaria held its first multiparty election since World War II and began the contentious process of moving toward political democracy and a market economy while combating inflation, unemployment, corruption, and crime. The country joined NATO in 2004 and the EU in 2007.

Economy Bulgaria

Economy - overview:

Bulgaria, a former communist country that entered the EU on 1 January 2007, has experienced strong growth since a major economic downturn in 1996. Successive governments have demonstrated commitment to economic reforms and responsible fiscal planning, but have failed so far to rein in rising inflation and large current account deficits. Bulgaria has averaged more than 6% growth since 2004, attracting significant amounts of foreign direct investment, but corruption in the public administration, a weak judiciary, and the presence of organized crime remain significant challenges.

Introduction
Burkina Faso

Background:

Burkina Faso (formerly Upper Volta) achieved independence from France in 1960. Repeated military coups during the 1970s and 1980s were followed by multiparty elections in the early 1990s. Current President Blaise COMPAORE came to power in a 1987 military coup and has won every election since then. Burkina Faso's high population density and limited natural resources result in poor economic prospects for the majority of its citizens. Recent unrest in Cote d'Ivoire and northern Ghana has hindered the ability of several hundred thousand seasonal Burkinabe farm workers to find employment in neighboring countries.

Economy Burkina Faso

Economy - overview:

One of the poorest countries in the world, landlocked Burkina Faso has few natural resources and a weak industrial base. About 90% of the population is engaged in subsistence agriculture, which is vulnerable to periodic drought. Cotton is the main cash crop and the government has joined with three other cotton producing countries in the region - Mali, Niger, and Chad - to lobby in the World Trade Organization for fewer subsidies to producers in other competing countries. Since 1998, Burkina Faso has embarked upon a gradual but successful privatization of state-owned enterprises. Having revised its investment code in 2004, Burkina Faso hopes to attract foreign investors. Thanks to this new code and other legislation favoring the mining sector, the country has seen an upswing in gold exploration and production. While the bitter internal crisis in neighboring Cote d'Ivoire is beginning to be resolved, it is still having a negative effect on Burkina Faso's trade and employment. In 2007 higher costs for energy and imported foodstuffs, as well as low cotton prices, dampened a GDP growth rate that had averaged 6% in the last 10 years. Burkina Faso received a Millennium Challenge Account threshold grant to improve girls' education at the primary school level, and appears likely to receive a grant in the areas of infrastructure, agriculture, and land reform.

Introduction
Burma

Background:

Britain conquered Burma over a period of 62 years (1824-1886) and incorporated it into its Indian Empire. Burma was administered as a province of India until 1937 when it became a separate, self-governing colony; independence from the Commonwealth was attained in 1948. Gen. NE WIN dominated the government from 1962 to 1988, first as military ruler, then as self-appointed president, and later as political kingpin. Despite multiparty legislative elections in 1990 that resulted in the main opposition party - the

National League for Democracy (NLD) - winning a landslide victory, the ruling junta refused to hand over power. NLD leader and Nobel Peace Prize recipient AUNG SAN SUU KYI, who was under house arrest from 1989 to 1995 and 2000 to 2002, was imprisoned in May 2003 and subsequently transferred to house arrest. After Burma's ruling junta in August 2007 unexpectedly increased fuel prices, tens of thousands of Burmese marched in protest, led by prodemocracy activists and Buddhist monks. In late September 2007, the government brutally suppressed the protests, killing at least 13 people and arresting thousands for participating in the demonstrations. Since then, the regime has continued to raid homes and monasteries and arrest persons suspected of participating in the pro-democracy protests. The junta appointed Labor Minister AUNG KYI in October 2007 as liaison to AUNG SAN SUU KYI, who remains under house arrest and virtually incommunicado with her party and supporters.

Economy Burma

Economy - overview:

Burma, a resource-rich country, suffers from pervasive government controls, inefficient economic policies, and rural poverty. The junta took steps in the early 1990s to liberalize the economy after decades of failure under the "Burmese Way to Socialism," but those efforts stalled, and some of the liberalization measures were rescinded. Despite Burma's increasing oil and gas revenue, socio-economic conditions have deteriorated due to the regime's mismanagement of the economy. Lacking monetary or fiscal stability, the economy suffers from serious macroeconomic imbalances - including rising inflation, fiscal deficits, multiple official exchange rates that overvalue the Burmese kyat, a distorted interest rate regime, unreliable statistics, and an inability to reconcile national accounts to determine a realistic GDP figure. Most overseas development assistance ceased after the junta began to suppress the democracy movement in 1988 and subsequently refused to honor the results of the 1990 legislative elections. In response to the government of Burma's attack in May 2003 on AUNG SAN SUU KYI and her convoy, the US imposed new economic sanctions in August 2003 including a ban on imports of Burmese products and a ban on provision of financial services by US persons. Further, a poor investment climate hampers attracting outside investment slowing the inflow of foreign exchange. The most productive sectors will continue to be in extractive industries, especially oil and gas, mining, and timber with the latter especially causing environmental degradation. Other areas, such as manufacturing and services, are struggling with inadequate infrastructure, unpredictable import/export policies, deteriorating health and education systems, and endemic corruption. A major banking crisis in 2003 shuttered the country's 20 private banks and disrupted the economy. As of 2007, the largest private banks operated under tight restrictions limiting the private sector's access to formal credit. Moreover, the September 2007 crackdown on prodemocracy demonstrators, including thousands of monks, further strained the economy as the tourism industry, which directly employs about 500,000 people, suffered dramatic declines in foreign visitor levels. In November 2007, the European Union announced new sanctions banning investment and trade in

Burmese gems, timber and precious stones, while the United States expanded its sanctions list to include more Burmese government and military officials and their family members, as well as prominent regime business cronies, their family members, and associated companies. Official statistics are inaccurate. Published statistics on foreign trade are greatly understated because of the size of the black market and unofficial border trade - often estimated to be as large as the official economy. Though the Burmese government has good economic relations with its neighbors, better investment and business climates and an improved political situation are needed to promote serious foreign investment, exports, and tourism.

Issues

Disputes - international:

over half of Burma's population consists of diverse ethnic groups who have substantial numbers of kin in neighboring countries; Thailand must deal with Karen and other ethnic refugees, asylum seekers, and rebels, as well as illegal cross-border activities from Burma; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween River near the border with Burma; citing environmental, cultural, and social concerns, China is reconsidering construction of 13 dams on the Salween River but energy-starved Burma with backing from Thailand remains intent on building five hydro-electric dams downstream, despite identical regional and international protests; India seeks cooperation from Burma to keep Indian Nagaland separatists, such as the United Liberation Front of Assam, from hiding in remote

Burmese Uplands; after 21 years, Bangladesh resumes talks with Burma on delimiting a maritime boundary in January 2008

Refugees and internally displaced persons:

IDPs: 503,000 (government offensives against ethnic insurgent groups near the eastern borders; most IDPs are ethnic Karen, Karenni, Shan, Tavoyan, and Mon) (2007)

Trafficking in persons:

current situation: Burma is a source country for women, children, and men trafficked for the purpose of forced labor and commercial sexual exploitation; Burmese women and children are trafficked to East and Southeast Asia for commercial sexual exploitation, domestic servitude, and forced labor; Burmese children are subjected to conditions of forced labor in Thailand as hawkers, beggars, and for work in shops, agriculture, fish processing, and small-scale industries; women are trafficked for commercial sexual exploitation to Malaysia and China; some trafficking victims transit Burma from Bangladesh to Malaysia and from China to Thailand; internal trafficking occurs primarily from villages to urban centers and economic hubs for labor in industrial zones, agricultural estates, and commercial sexual exploitation; military and civilian officials continue to use a significant amount of forced labor; ethnic insurgent groups also used compulsory labor of adults and unlawful recruitment of children; the military junta's gross economic mismanagement, human rights abuses, and its policy of using forced labor are the top causal factors for Burma's significant trafficking problem tier rating: Tier 3 - Burma does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; military and civilian officials remain directly involved in significant acts of forced labor and unlawful conscription of child soldiers (2008)

Illicit drugs:

remains world's second-largest producer of illicit opium with an estimated production in 2008 of 340 metric tons, an increase of 26%, and cultivation in 2008 was 22,500 hectares, a 4% increase from 2007; production in the United Wa State Army's areas of greatest control remains low; Shan state is the source of 94% of poppy cultivation; lack of government will to take on major narcotrafficking groups and lack of serious commitment against money laundering continues to hinder the overall antidrug effort; major source of methamphetamine and heroin for regional consumption; currently

under Financial Action Task Force countermeasures due to continued failure to address its inadequate money-laundering controls (2008)

Introduction
Burundi

Background:

Burundi's first democratically elected president was assassinated in October 1993 after only 100 days in office, triggering widespread ethnic violence between Hutu and Tutsi factions. More than 200,000 Burundians perished during the conflict that spanned almost a dozen years. Hundreds of thousands of Burundians were internally displaced or became refugees in neighboring countries. An internationally brokered power-sharing agreement between the Tutsi-dominated government and the Hutu rebels in 2003 paved the way for a transition process that led to an integrated defense force, established a new constitution in 2005, and elected a majority Hutu government in 2005. The new government, led by President Pierre NKURUNZIZA, signed a South African brokered ceasefire with the country's last rebel group in September of 2006 but still faces many challenges.

Economy Burundi

Economy - overview:

Burundi is a landlocked, resource-poor country with an underdeveloped manufacturing sector. The economy is predominantly agricultural with more than 90% of the population dependent on subsistence agriculture. Economic growth depends on coffee and tea exports, which account for 90% of foreign exchange earnings. The ability to pay for imports, therefore, rests primarily on weather conditions and international coffee and tea prices. The Tutsi minority, 14% of the population, dominates the

government and the coffee trade at the expense of the Hutu majority, 85% of the population. An ethnic-based war that lasted for over a decade resulted in more than 200,000 deaths, forced more than 48,000 refugees into Tanzania, and displaced 140,000 others internally. Only one in two children go to school, and approximately one in 15 adults has HIV/AIDS. Food, medicine, and electricity remain in short supply. Burundi's GDP grew around 5% annually in 2006-07. Political stability and the end of the civil war have improved aid flows and economic activity has increased, but underlying weaknesses - a high poverty rate, poor education rates, a weak legal system, and low administrative capacity - risk undermining planned economic reforms. Burundi will continue to remain heavily dependent on aid from bilateral and multilateral donors; the delay of funds after a corruption scandal cut off bilateral aid in 2007 reduced government's revenues and its ability to pay salaries.

to conduct anti-trafficking law enforcement activities continue to be causes for concern; Burundi has not ratified the 2000 UN TIP Protocol (2008)

Introduction
Cambodia

Background:

Most Cambodians consider themselves to be Khmers, descendants of the Angkor Empire that extended over much of Southeast Asia and reached its zenith between the 10th and 13th centuries. Attacks by the Thai and Cham (from present-day Vietnam) weakened the empire, ushering in a long period of decline. The king placed the country under French protection in 1863 and it became part of French Indochina in 1887. Following Japanese occupation in World War II, Cambodia gained full independence from France in 1953. In April 1975, after a five-year struggle, Communist Khmer Rouge forces captured Phnom Penh and evacuated all cities and towns. At least 1.5 million Cambodians died from execution, forced hardships, or starvation during the Khmer Rouge regime under POL POT. A December 1978 Vietnamese invasion drove the Khmer Rouge into the countryside, began a 10-year Vietnamese occupation, and touched off almost 13 years of civil war. The 1991 Paris Peace Accords mandated democratic elections and a ceasefire, which was not fully respected by the Khmer Rouge. UN-sponsored elections in 1993 helped restore some semblance of normalcy under a coalition government. Factional fighting in 1997 ended the first coalition government, but a second round of national elections in 1998 led to the formation of another coalition government and renewed political stability. The remaining elements

of the Khmer Rouge surrendered in early 1999. Some of the remaining Khmer Rouge leaders are awaiting trial by a UN-sponsored tribunal for crimes against humanity. Elections in July 2003 were relatively peaceful, but it took one year of negotiations between contending political parties before a coalition government was formed. In October 2004, King SIHANOUK abdicated the throne due to illness and his son, Prince Norodom SIHAMONI, was selected to succeed him. Local elections were held in Cambodia in April 2007, and there was little in the way of pre-election violence that preceded prior elections. National elections are scheduled for July 2008.

Economy
Cambodia

Economy - overview:

From 2001 to 2004, the economy grew at an average rate of 6.4%, driven largely by an expansion in the garment sector and tourism. The US and Cambodia signed a Bilateral Textile Agreement, which gave Cambodia a guaranteed quota of US textile imports and established a bonus for improving working conditions and enforcing Cambodian labor laws and international labor standards in the industry. With the January 2005 expiration of a WTO Agreement on Textiles and Clothing, Cambodia-based textile producers were forced to compete directly with lower-priced producing countries such as China and India. Better-than-expected garment sector performance led to more than 9% growth in 2007. Its vibrant garment industry employs more than 350,000 people and contributes more than 70% of Cambodia's exports. The Cambodian government has committed itself to a policy supporting high labor standards in an attempt to maintain buyer interest. In 2005, exploitable oil and natural gas deposits were found beneath Cambodia's territorial waters, representing a new revenue stream for the government if commercial extraction begins. Mining also is attracting significant investor interest, particularly in the northeastern parts of the country, and the government has said opportunities exist for mining bauxite, gold, iron and gems. In 2006, a US-Cambodia bilateral Trade and Investment Framework Agreement (TIFA) was signed and the first round of discussions took place in early 2007. The tourism industry continues to grow rapidly, with foreign arrivals reaching 2 million in 2007. In 2007 the government signed a joint venture agreement with two companies to form a new national airline. The long-term development of the economy remains a daunting challenge. The Cambodian government is working with bilateral and multilateral donors, including the World Bank and IMF, to address the country's many pressing needs. The major economic challenge for Cambodia over the next decade will be fashioning an economic environment in which the private sector can create enough jobs to handle Cambodia's demographic imbalance. More than 50% of the population is less than 21 years old. The population lacks education and productive skills, particularly in the poverty-ridden countryside, which suffers from an almost total lack of basic infrastructure.

The former French Cameroon and part of British Cameroon merged in 1961 to form the present country. Cameroon has generally enjoyed stability, which has permitted the development of agriculture, roads, and railways, as well as a petroleum industry. Despite a slow movement toward democratic reform, political power remains firmly in the hands of President Paul BIYA.

Economy Cameroon

Economy - overview:

Because of its modest oil resources and favorable agricultural conditions, Cameroon has one of the best-endowed primary commodity economies in sub-Saharan Africa. Still, it faces many of the serious problems facing other underdeveloped countries, such as a top-heavy civil service and a generally unfavorable climate for business enterprise. Since 1990, the government has embarked on various IMF and World Bank programs designed to spur business investment, increase efficiency in agriculture, improve trade, and recapitalize the nation's banks. In June 2000, the government completed an IMF-sponsored, three-year structural adjustment program; however, the IMF is pressing for more reforms, including increased budget transparency, privatization, and poverty reduction programs. In January 2001, the Paris Club agreed to reduce Cameroon's debt of \$1.3 billion by \$900 million; debt relief now totals \$1.26 billion. International oil and cocoa prices have a significant impact on the economy.

Issues

Disputes - international:

Joint Border Commission with Nigeria reviewed 2002 ICJ ruling on the entire boundary and bilaterally resolved differences, including June 2006 Greentree Agreement that immediately ceded sovereignty of the Bakassi Peninsula to Cameroon with a full phase-out of Nigerian control and patriation of residents in 2008; Cameroon and Nigeria agree on maritime delimitation in March 2008; sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty, which also includes the Chad-Niger and Niger-Nigeria boundaries

Refugees and internally displaced persons:

refugees (country of origin): 20,000-30,000 (Chad); 3,000 (Nigeria); 24,000 (Central African Republic) (2007)

Trafficking in persons:

current situation: Cameroon is a source, transit, and destination country for women and children trafficked for the purposes of forced labor and commercial sexual exploitation; most victims are children trafficked within country, with girls primarily trafficked for domestic servitude and sexual exploitation; both boys and girls are also trafficked within Cameroon for forced labor in sweatshops, bars, restaurants, and on tea and cocoa plantations; children are trafficked into Cameroon from neighboring states for forced labor in agriculture, fishing, street vending, and spare-parts shops; Cameroon is a transit country for children trafficked between Gabon and Nigeria, and from Nigeria to Saudi Arabia; it is a source country for women transported by sex-trafficking rings to Europe tier rating: Tier 2 Watch List - Cameroon is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking in 2007, particularly in terms of efforts to prosecute and convict trafficking offenders; while Cameroon reported some arrests of traffickers, none of them were prosecuted or punished; the government does not identify trafficking victims among vulnerable populations nor does it monitor the number of victims it intercepts (2008)

Introduction
Canada

Background:

A land of vast distances and rich natural resources, Canada became a self-governing dominion in 1867 while retaining ties to the British crown. Economically and technologically the nation has developed in parallel with the US, its neighbor to the south across an unfortified border. Canada faces the political challenges of meeting public demands for quality improvements in health care and education services, as well as responding to separatist concerns in predominantly francophone Quebec. Canada also aims to develop its diverse energy resources while maintaining its commitment to the environment.

Geography
Canada

Location:

Northern North America, bordering the North Atlantic Ocean on the east, North Pacific Ocean on the west, and the Arctic Ocean on the north, north of the conterminous US

Geographic coordinates:

Coastline:

202,080 km

Maritime claims:

territorial sea: 12 nm contiguous zone: 24 nm exclusive economic zone: 200 nm
continental shelf: 200 nm or to the edge of the continental margin

Climate:

varies from temperate in south to subarctic and arctic in north

Terrain:

mostly plains with mountains in west and lowlands in southeast

Elevation extremes:

lowest point: Atlantic Ocean 0 m highest point: Mount Logan 5,959 m

Natural resources:

iron ore, nickel, zinc, copper, gold, lead, molybdenum, potash, diamonds, silver, fish,
timber, wildlife, coal, petroleum, natural gas, hydropower

Land use:

Natural hazards:

continuous permafrost in north is a serious obstacle to development; cyclonic storms form east of the Rocky Mountains, a result of the mixing of air masses from the Arctic, Pacific, and North American interior, and produce most of the country's rain and snow east of the mountains

Environment - current issues:

air pollution and resulting acid rain severely affecting lakes and damaging forests; metal smelting, coal-burning utilities, and vehicle emissions impacting on agricultural and forest productivity; ocean waters becoming contaminated due to agricultural, industrial, mining, and forestry activities

Environment - international agreements:

Economy Canada

Economy - overview:

As an affluent, high-tech industrial society in the trillion-dollar class, Canada resembles the US in its market-oriented economic system, pattern of production, and affluent living standards. Since World War II, the impressive growth of the manufacturing, mining, and service sectors has transformed the nation from a largely rural economy into one primarily industrial and urban. The 1989 US-Canada Free Trade Agreement (FTA) and the 1994 North American Free Trade Agreement (NAFTA) (which includes Mexico) touched off a dramatic increase in trade and economic integration with the US. Given its great natural resources, skilled labor force, and modern capital plant, Canada enjoys solid economic prospects. Top-notch fiscal

management has produced consecutive balanced budgets since 1997, although public debate continues over the equitable distribution of federal funds to the Canadian provinces. Exports account for roughly a third of GDP. Canada enjoys a substantial trade surplus with its principal trading partner, the US, which absorbs 80% of Canadian exports each year. Canada is the US's largest foreign supplier of energy, including oil, gas, uranium, and electric power. During 2007, Canada enjoyed good economic growth, moderate inflation, and the lowest unemployment rate in more than three decades.

Introduction Cape Verde

Background:

The uninhabited islands were discovered and colonized by the Portuguese in the 15th century; Cape Verde subsequently became a trading center for African slaves and later an important coaling and resupply stop for whaling and transatlantic shipping. Following independence in 1975, and a tentative interest in unification with Guinea-Bissau, a one-party system was established and maintained until multi-party elections were held in 1990. Cape Verde continues to exhibit one of Africa's most stable democratic governments. Repeated droughts during the second half of the 20th century caused significant hardship and prompted heavy emigration. As a result, Cape Verde's expatriate population is greater than its domestic one. Most Cape Verdeans have both African and Portuguese antecedents.

Economy Cape Verde

Economy - overview:

This island economy suffers from a poor natural resource base, including serious water shortages exacerbated by cycles of long-term drought. The economy is service-oriented, with commerce, transport, tourism, and public services accounting for about three-fourths of GDP. Although nearly 70% of the population lives in rural areas, the share of food production in GDP is low. About 82% of food must be imported. The fishing potential, mostly lobster and tuna, is not fully exploited. Cape Verde annually runs a high trade deficit, financed by foreign aid and remittances from emigrants; remittances supplement GDP by more than 20%. Economic reforms are aimed at developing the private sector and attracting foreign investment to diversify the economy. Future prospects depend heavily on the maintenance of aid flows, the encouragement of tourism, remittances, and the momentum of the government's development program. Cape Verde became a member of the WTO in July 2008.

@Cayman Islands

Introduction
Cayman Islands

Background:

The Cayman Islands were colonized from Jamaica by the British during the 18th and 19th centuries, and were administered by Jamaica after 1863. In 1959, the islands became a territory within the Federation of the West Indies, but when the Federation dissolved in 1962, the Cayman Islands chose to remain a British dependency.

With no direct taxation, the islands are a thriving offshore financial center. More than 68,000 companies were registered in the Cayman Islands as of 2003, including almost 500 banks, 800 insurers, and 5,000 mutual funds. A stock exchange was opened in 1997. Tourism is also a mainstay, accounting for about 70% of GDP and 75% of foreign currency earnings. The tourist industry is aimed at the luxury market and caters mainly to visitors from North America. Total tourist arrivals exceeded 2.1 million in 2003, with about half from the US. About 90% of the islands' food and consumer goods must be imported. The Caymanians enjoy one of the highest outputs per capita and one of the highest standards of living in the world.

@Central African Republic

Introduction
Central African Republic

Background:

The former French colony of Ubangi-Shari became the Central African Republic upon independence in 1960. After three tumultuous decades of misrule - mostly by military governments - civilian rule was established in 1993 and lasted for one decade. President Ange-Felix PATASSE's civilian government was plagued by unrest, and in March 2003 he was deposed in a military coup led by General Francois BOZIZE, who established a transitional government. Though the government has the tacit support of civil society groups and the main parties, a wide field of candidates contested the municipal, legislative, and presidential elections held in March and May of 2005 in which General BOZIZE was affirmed as president. The government still does not fully control the countryside, where pockets of lawlessness persist. Unrest in neighboring nations, Chad, Sudan, and the DRC, continues to affect stability in the Central African Republic as well.

Economy
Central African Republic

Economy - overview:

Subsistence agriculture, together with forestry, remains the backbone of the economy of the Central African Republic (CAR), with more than 70% of the population living in outlying areas. The agricultural sector generates more than half of GDP. Timber has accounted for about 16% of export earnings and the diamond industry, for 40%. Important constraints to economic development include the CAR's landlocked position, a poor transportation system, a largely unskilled work force, and a legacy of misdirected macroeconomic policies. Factional fighting between the government and its opponents remains a drag on economic revitalization. Distribution of income is extraordinarily unequal. Grants from France and the international community can only partially meet humanitarian needs.

Introduction
Chad

Background:

Chad, part of France's African holdings until 1960, endured three decades of civil warfare as well as invasions by Libya before a semblance of peace was finally restored in 1990. The government eventually drafted a democratic constitution, and held flawed presidential elections in 1996 and 2001. In 1998, a rebellion broke out in northern Chad, which has sporadically flared up despite several peace agreements between the government and the rebels. In 2005, new rebel groups emerged in western Sudan and made probing attacks into eastern Chad, despite signing peace agreements in December 2006 and October 2007. Power remains in the hands of an ethnic minority. In June 2005, President Idriss DEBY held a referendum successfully removing constitutional term limits and won another controversial election in 2006. Sporadic rebel campaigns continued throughout 2006 and 2007, and the capital experienced a significant rebel threat in early 2008.

Economy Chad

Economy - overview:

Chad's primarily agricultural economy will continue to be boosted by major foreign direct investment projects in the oil sector that began in 2000. At least 80% of Chad's population relies on subsistence farming and livestock raising for its livelihood. Chad's economy has long been handicapped by its landlocked position, high energy costs, and a history of instability. Chad relies on foreign assistance and foreign capital for most public and private sector investment projects. A consortium led by two US companies has been investing \$3.7 billion to develop oil reserves - estimated at 1 billion barrels - in southern Chad. Chinese companies are also expanding exploration efforts and plan to build a refinery. The nation's total oil reserves have been estimated to be 1.5 billion barrels. Oil production came on stream in late 2003. Chad began to export oil in 2004. Cotton, cattle, and gum arabic provide the bulk of Chad's non-oil export earnings.

Introduction
Chile

Background:

Prior to the coming of the Spanish in the 16th century, northern Chile was under Inca rule while Araucanian Indians (also known as Mapuches) inhabited central and southern Chile. Although Chile declared its independence in 1810, decisive victory over the Spanish was not achieved until 1818. In the War of the Pacific (1879-83), Chile defeated Peru and Bolivia and won its present northern regions. It was not until the 1880s that the Araucanian Indians were completely subjugated. A three-year-old Marxist government of Salvador ALLENDE was overthrown in 1973 by a military coup led by Augusto PINOCHET, who ruled until a freely elected president was installed in

1990. Sound economic policies, maintained consistently since the 1980s, have contributed to steady growth, reduced poverty rates by over half, and have helped secure the country's commitment to democratic and representative government. Chile has increasingly assumed regional and international leadership roles befitting its status as a stable, democratic nation.

Economy
Chile

Economy - overview:

Chile has a market-oriented economy characterized by a high level of foreign trade. During the early 1990s, Chile's reputation as a role model for economic reform was strengthened when the democratic government of Patricio AYLWIN - which took over from the military in 1990 - deepened the economic reform initiated by the military government. Growth in real GDP averaged 8% during 1991-97, but fell to half that level in 1998 because of tight monetary policies implemented to keep the current account deficit in check and because of lower export earnings - the latter a product of the global financial crisis. A severe drought exacerbated the recession in 1999, reducing crop yields and causing hydroelectric shortfalls and electricity rationing, and Chile experienced negative economic growth for the first time in more than 15 years. Despite the effects of the recession, Chile maintained its reputation for strong financial institutions and sound policy that have given it the strongest sovereign bond rating in South America. Between 2000 and 2007 growth ranged between 2%-6%. Throughout these years Chile maintained a low rate of inflation with GDP growth coming from high copper prices, solid export earnings (particularly forestry, fishing, and mining), and growing domestic consumption. President BACHELET in 2006 established an Economic and Social Stabilization Fund to hold excess copper revenues so that social spending can be maintained during periods of copper shortfalls. This fund probably surpassed \$20 billion at the end of 2007. Chile continues to attract foreign direct investment, but most foreign investment goes into gas, water, electricity and mining. Unemployment has exhibited a downward trend over the past two years, dropping to 7.8% and 7.0% at the end of 2006 and 2007, respectively. Chile deepened its longstanding commitment to trade liberalization with the signing of a free trade agreement with the US, which took effect on 1 January 2004. Chile claims to have more bilateral or regional trade agreements than any other country. It has 57 such agreements (not all of them full free trade agreements), including with the European Union, Mercosur, China, India, South Korea, and Mexico.

Issues

Disputes - international:

Chile and Peru rebuff Bolivia's reinvigorated claim to restore the Atacama corridor, ceded to Chile in 1884, but Chile has offered instead unrestricted but not sovereign maritime access through Chile to Bolivian gas and other commodities; Chile rejects Peru's unilateral legislation to change its latitudinal maritime boundary with Chile to an equidistance line with a southwestern axis favoring Peru, in October 2007, Peru took its maritime complaint with Chile to the ICJ; territorial claim in Antarctica (Chilean Antarctic Territory) partially overlaps Argentine and British claims; the joint boundary commission, established by Chile and Argentina in 2001, has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

Illicit drugs:

transshipment country for cocaine destined for Europe and the region; economic prosperity and increasing trade have made Chile more attractive to traffickers seeking to launder drug profits, especially through the Iquique Free Trade Zone, but a recent anti-money-laundering law improves controls; imported precursors passed on to Bolivia; domestic cocaine consumption is rising, making Chile a significant consumer of cocaine

Introduction
China

Background:

For centuries China stood as a leading civilization, outpacing the rest of the world in the arts and sciences, but in the 19th and early 20th centuries, the country was beset by civil unrest, major famines, military defeats, and foreign occupation. After World War II, the Communists under MAO Zedong established an autocratic socialist system that, while ensuring China's sovereignty, imposed strict controls over everyday life and cost the lives of tens of millions of people. After 1978, his successor DENG Xiaoping and other leaders focused on market-oriented economic development and by 2000 output had quadrupled. For much of the population, living standards have improved dramatically and the room for personal choice has expanded, yet political controls remain tight.

Economy China

Economy - overview:

China's economy during the last quarter century has changed from a centrally planned system that was largely closed to international trade to a more market-oriented economy that has a rapidly growing private sector and is a major player in the global economy. Reforms started in the late 1970s with the phasing out of collectivized agriculture, and expanded to include the gradual liberalization of prices, fiscal decentralization,

increased autonomy for state enterprises, the foundation of a diversified banking system, the development of stock markets, the rapid growth of the non-state sector, and the opening to foreign trade and investment. China has generally implemented reforms in a gradualist or piecemeal fashion, including the sale of minority shares in four of China's largest state banks to foreign investors and refinements in foreign exchange and bond markets in 2005. After keeping its currency tightly linked to the US dollar for years, China in July 2005 revalued its currency by 2.1% against the US dollar and moved to an exchange rate system that references a basket of currencies. Cumulative appreciation of the renminbi against the US dollar since the end of the dollar peg reached 15% in January 2008. The restructuring of the economy and resulting efficiency gains have contributed to a more than tenfold increase in GDP since 1978. Measured on a purchasing power parity (PPP) basis, China in 2007 stood as the second-largest economy in the world after the US, although in per capita terms the country is still lower middle-income. Annual inflows of foreign direct investment in 2007 rose to \$75 billion. By the end of 2007, more than 5,000 domestic Chinese enterprises had established direct investments in 172 countries and regions around the world. The Chinese government faces several economic development challenges: (a) to sustain adequate job growth for tens of millions of workers laid off from state-owned enterprises, migrants, and new entrants to the work force; (b) to reduce corruption and other economic crimes; and (c) to contain environmental damage and social strife related to the economy's rapid transformation. Economic development has been more rapid in coastal provinces than in the interior, and approximately 200 million rural laborers have relocated to urban areas to find work. One demographic consequence of the "one child" policy is that China is now one of the most rapidly aging countries in the world. Deterioration in the environment - notably air pollution, soil erosion, and the steady fall of the water table, especially in the north - is another long-term problem. China continues to lose arable land because of erosion and economic development. In 2007 China intensified government efforts to improve environmental conditions, tying the evaluation of local officials to environmental targets, publishing a national climate change policy, and establishing a high level leading group on climate change, headed by Premier WEN Jiabao. The Chinese government seeks to add energy production capacity from sources other than coal and oil as its double-digit economic growth increases demand. Chinese energy officials in 2007 agreed to purchase five third generation nuclear reactors from Western companies. More power generating capacity came on line in 2006 as large scale investments - including the Three Gorges Dam across the Yangtze River - were completed.

Issues

Disputes - international:

continuing talks and confidence-building measures work toward reducing tensions over Kashmir that nonetheless remains militarized with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; China and India continue their security and foreign policy dialogue started in 2005 related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, and other matters; China claims most of India's Arunachal Pradesh to the base of the Himalayas; lacking any treaty describing the boundary, Bhutan and China continue negotiations to establish a common boundary alignment to resolve territorial disputes due to cartographic discrepancies; Chinese maps show an international boundary symbol off the coasts of the littoral states of the South China Seas, where China has interrupted Vietnamese hydrocarbon exploration; China asserts sovereignty over the Spratly Islands together with Malaysia, Philippines, Taiwan, Vietnam, and possibly Brunei; the 2002 "Declaration on the Conduct of Parties in the South China Sea" eased tensions in the Spratly's but is not the legally binding "code of conduct" sought by some parties; Vietnam and China continue to expand construction of facilities in the Spratly's and in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord on marine seismic activities in the Spratly Islands; China occupies some of the Paracel Islands also claimed by Vietnam and Taiwan; China and Taiwan continue to reject both Japan's claims to the uninhabited islands of Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared equidistance line in the East China Sea, the site of intensive hydrocarbon exploration and exploitation; certain islands in the Yalu and Tumen rivers are in dispute with North Korea; North Korea and China seek to stem

illegal migration to China by North Koreans, fleeing privations and oppression, by building a fence along portions of the border and imprisoning North Koreans deported by China; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with their 2004 Agreement; China and Tajikistan have begun demarcating the revised boundary agreed to in the delimitation of 2002; the decade-long demarcation of the China-Vietnam land boundary is expected to be completed by the end of 2008, while the maritime boundary delimitation and fisheries agreements in the Gulf of Tonkin, ratified in June 2004, have been implemented; citing environmental, cultural, and social concerns, China has reconsidered construction of 13 dams on the Salween River, but energy-starved Burma, with backing from Thailand, remains intent on building five hydro-electric dams downstream despite regional and international protests; Chinese and Hong Kong authorities met in March 2008 to resolve ownership and use of lands recovered in Shenzhen River channelization, including 96-hectare Lok Ma Chau Loop; Hong Kong developing plans to reduce 2,000 out of 2,800 hectares of its restricted Closed Area by 2010

Refugees and internally displaced persons:

refugees (country of origin): 300,897 (Vietnam); estimated 30,000-50,000 (North Korea) IDPs: 90,000 (2007)

Trafficking in persons:

current situation: China is a source, transit, and destination country for men, women, and children trafficked for the purposes of sexual exploitation and forced labor; the majority of trafficking in China occurs within the country's borders, but there is also considerable international trafficking of Chinese citizens to Africa, Asia, Europe, Latin America, the Middle East, and North America; Chinese women are lured abroad through false promises of legitimate employment, only to be forced into commercial sexual exploitation, largely in Taiwan, Thailand, Malaysia, and Japan; women and children are trafficked to China from Mongolia, Burma, North Korea, Russia, and Vietnam for forced labor, marriage, and prostitution; some North Korean women and children seeking to leave their country voluntarily cross the border into China and are then sold into prostitution, marriage, or forced labor tier rating: Tier 2 Watch List - China is on the Tier 2 Watch List for the fourth consecutive year for its failure to provide evidence of increasing efforts to combat human trafficking, particularly in terms of punishment of trafficking crimes and the protection of Chinese and foreign victims of

trafficking; victims are sometimes punished for unlawful acts that were committed as a direct result of their being trafficked, such as violations of prostitution or immigration/emigration controls; the Chinese Government continued to treat North Korean victims of trafficking solely as economic migrants, routinely deporting them back to horrendous conditions in North Korea; additional challenges facing the Chinese Government include the enormous size of its trafficking problem and the significant level of corruption and complicity in trafficking by some local government officials (2008)

Illicit drugs:

major transshipment point for heroin produced in the Golden Triangle region of Southeast Asia; growing domestic drug abuse problem; source country for chemical precursors, despite new regulations on its large chemical industry

Introduction
Christmas Island

Background:

Named in 1643 for the day of its discovery, the island was annexed and settlement began by the UK in 1888. Phosphate mining began in the 1890s. The UK transferred sovereignty to Australia in 1958. Almost two-thirds of the island has been declared a national park.

Christmas Island

Economy - overview:

Phosphate mining had been the only significant economic activity, but in December 1987 the Australian Government closed the mine. In 1991, the mine was reopened. With the support of the government, a \$34 million casino opened in 1993, but closed in 1998. The Australian Government in 2001 agreed to support the creation of a commercial space-launching site on the island, expected to begin operations in the near future.

@Clipperton Island

Introduction Clipperton Island

Background:

This isolated island was named for John CLIPPERTON, a pirate who made it his hideout early in the 18th century. Annexed by France in 1855, it was seized by Mexico in 1897. Arbitration eventually awarded the island to France, which took possession in 1935.

@Cocos (Keeling) Islands

Introduction

Cocos (Keeling) Islands

Background:

There are 27 coral islands in the group. Captain William KEELING discovered the islands in 1609, but they remained uninhabited until the 19th century. From the 1820s to 1978, members of the CLUNIE-ROSS family controlled the islands and the copra produced from local coconuts. Annexed by the UK in 1857, the Cocos Islands were transferred to the Australian Government in 1955. The population on the two inhabited islands generally is split between the ethnic Europeans on West Island and the ethnic Malays on Home Island.

@Colombia

Introduction
Colombia

Background:

Colombia was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others are Ecuador and Venezuela). A 40-year conflict between government forces and anti-government insurgent groups and illegal paramilitary groups - both heavily funded by the drug trade - escalated during the 1990s. The insurgents lack the military or popular support necessary to overthrow the government, and violence has been decreasing since about 2002, but insurgents continue attacks against civilians and large swaths of the countryside are under guerrilla influence. More than 32,000 former paramilitaries had demobilized by the end of 2006 and the United

Self Defense Forces of Colombia (AUC) as a formal organization had ceased to function. Still, some renegades continued to engage in criminal activities. The Colombian Government has stepped up efforts to reassert government control throughout the country, and now has a presence in every one of its administrative departments. However, neighboring countries worry about the violence spilling over their borders.

Economy
Colombia

Economy - overview:

Colombia's economy has experienced positive growth over the past five years despite a serious armed conflict. In fact, 2007 is regarded by policy makers and the private sector as one of the best economic years in recent history, after 2005. The economy continues to improve in part because of austere government budgets, focused efforts to reduce public debt levels, an export-oriented growth strategy, improved domestic security, and high commodity prices. Ongoing economic problems facing President URIBE include reforming the pension system, reducing high unemployment, and funding new exploration to offset declining oil production. The government's economic reforms and democratic security strategy, coupled with increased investment, have engendered a growing sense of confidence in the economy. However, the business sector continues to be concerned about failure of the US Congress to approve the signed FTA.

Introduction
Comoros

Background:

Comoros has endured more than 20 coups or attempted coups since gaining independence from France in 1975. In 1997, the islands of Anjouan and Moheli declared independence from Comoros. In 1999, military chief Col. AZALI seized power in a bloodless coup, and helped negotiate the 2000 Fomboni Accords power-sharing agreement in which the federal presidency rotates among the three islands, and each island maintains its own local government. AZALI won the 2002 Presidential election, and each island in the archipelago elected its own president. AZALI stepped down in 2006 and President SAMBI took office. Since 2006, Anjouan's President Mohamed BACAR has refused to work effectively with the Union presidency. In 2007, BACAR effected Anjouan's de-facto secession from the Union, refusing to step down in favor of fresh Anjouanais elections when Comoros' other islands held legitimate elections in July. The African Union (AU) initially attempted to resolve the political crisis by applying sanctions and a naval blockade on Anjouan, but in March 2008, AU and Comoran soldiers seized the island. The move was generally welcomed by the island's inhabitants.

Economy Comoros

Economy - overview:

One of the world's poorest countries, Comoros is made up of three islands that have inadequate transportation links, a young and rapidly increasing population, and few natural resources. The low educational level of the labor force contributes to a subsistence level of economic activity, high unemployment, and a heavy dependence on foreign grants and technical assistance. Agriculture, including fishing, hunting, and forestry, contributes 40% to GDP, employs 80% of the labor force, and provides most of the exports. The country is not self-sufficient in food production; rice, the main staple, accounts for the bulk of imports. The government - which is hampered by internal political disputes - is struggling to upgrade education and technical training, privatize commercial and industrial enterprises, improve health services, diversify exports, promote tourism, and reduce the high population growth rate. The political problems caused the economy to contract in 2007. Remittances from 150,000 Comorans abroad help supplement GDP.

@Congo, Democratic Republic of the

Introduction
Congo, Democratic Republic of the

Background:

Established as a Belgian colony in 1908, the Republic of the Congo gained its independence in 1960, but its early years were marred by political and social instability. Col. Joseph MOBUTU seized power and declared himself president in a November 1965 coup. He subsequently changed his name - to MOBUTU Sese Seko - as well as that of the country - to Zaire. MOBUTU retained his position for 32 years through several sham elections, as well as through the use of brutal force. Ethnic strife and civil war, touched off by a massive inflow of refugees in 1994 from fighting in Rwanda and Burundi, led in May 1997 to the toppling of the MOBUTU regime by a rebellion backed by Rwanda and Uganda and fronted by Laurent KABILA. He renamed the country the Democratic Republic of the Congo (DRC), but in August 1998 his regime was itself challenged by a second insurrection again backed by Rwanda and Uganda. Troops from Angola, Chad, Namibia, Sudan, and Zimbabwe intervened to support KABILA's regime. A cease-fire was signed in July 1999 by the DRC, Congolese armed rebel groups, Angola, Namibia, Rwanda, Uganda, and Zimbabwe but sporadic fighting continued. Laurent KABILA was assassinated in January 2001 and his son, Joseph KABILA, was named head of state. In October 2002, the new president was successful in negotiating the withdrawal of Rwandan forces occupying eastern Congo; two months later, the Pretoria Accord was signed by all remaining warring parties to end the fighting and establish a government of national unity. A transitional government was set up in July 2003. Joseph KABILA as president and four vice presidents represented the former government, former rebel groups, the political opposition, and civil society. The transitional government held a successful constitutional referendum in December 2005 and elections for the presidency, National Assembly, and provincial legislatures in 2006. KABILA was inaugurated president in December 2006. The National Assembly was installed in September 2006. Its president, Vital KAMERHE, was chosen in

December. Provincial assemblies were constituted in early 2007, and elected governors and national senators in January 2007.

Economy

Congo, Democratic Republic of the

Economy - overview:

The economy of the Democratic Republic of the Congo - a nation endowed with vast potential wealth - is slowly recovering from two decades of decline. Conflict, which began in August 1998, dramatically reduced national output and government revenue, increased external debt, and resulted in the deaths of more than 3.5 million people from violence, famine, and disease. Foreign businesses curtailed operations due to uncertainty about the outcome of the conflict, lack of infrastructure, and the difficult operating environment. Conditions began to improve in late 2002 with the withdrawal of a large portion of the invading foreign troops. The transitional government reopened relations with international financial institutions and international donors, and President KABILA has begun implementing reforms, although progress is slow and the International Monetary Fund curtailed their program for the DRC at the end of March 2006 because of fiscal overruns. Much economic activity still occurs in the informal sector, and is not reflected in GDP data. Renewed activity in the mining sector, the source of most export income, boosted Kinshasa's fiscal position and GDP growth. Government reforms and improved security may lead to increased government revenues, outside budget assistance, and foreign direct investment, although an uncertain legal framework, corruption, and a lack of transparency in government policy are continuing long-term problems.

Issues

Disputes - international:

heads of the Great Lakes states and UN pledged in 2004 to abate tribal, rebel, and militia fighting in the region, including northeast Congo, where the UN Organization Mission in the Democratic Republic of the Congo (MONUC), organized in 1999, maintains over 16,500 uniformed peacekeepers; members of Uganda's Lords Resistance Army forces continue to seek refuge in Congo's Garamba National Park as peace talks with the Uganda government evolve; the location of the boundary in the broad Congo River with the Republic of the Congo is indefinite except in the Pool Malebo/Stanley Pool area; Uganda and DROC dispute Rukwanzi island in Lake Albert and other areas on the Semliki River with hydrocarbon potential; boundary commission continues discussions over Congolese-administered triangle of land on the right bank of the Lunkinda river claimed by Zambia near the DROC village of Pweto

Refugees and internally displaced persons:

refugees (country of origin): 132,295 (Angola); 37,313 (Rwanda); 17,777 (Burundi); 13,904 (Uganda); 6,181 (Sudan); 5,243 (Republic of Congo) IDPs: 1.4 million (fighting between government forces and rebels since mid-1990s; most IDPs are in eastern provinces) (2007)

Trafficking in persons:

current situation: Democratic Republic of the Congo is a source and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; much of this trafficking occurs within the country's unstable eastern provinces and is perpetrated by armed groups outside government control tier rating: Tier 2 Watch List - Democratic Republic of the Congo is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat trafficking in persons in 2007; while some significant initial advances were noted, the government's capacity to apprehend, convict, or imprison traffickers remained weak; the government lacks sufficient financial, technical, and human resources to effectively address not only trafficking crimes, but also to provide basic levels of security in some parts of the country (2008)

Illicit drugs:

one of Africa's biggest producers of cannabis, but mostly for domestic consumption; while rampant corruption and inadequate supervision leaves the banking system vulnerable to money laundering, the lack of a well-developed financial system limits the country's utility as a money-laundering center

@Congo, Republic of the

Introduction
Congo, Republic of the

Background:

Upon independence in 1960, the former French region of Middle Congo became the Republic of the Congo. A quarter century of experimentation with Marxism was abandoned in 1990 and a democratically elected government took office in 1992. A brief civil war in 1997 restored former Marxist President Denis SASSOU-NGUESSO, and ushered in a period of ethnic and political unrest. Southern-based rebel groups agreed to a final peace accord in March 2003, but the calm is tenuous and refugees continue to present a humanitarian crisis. The Republic of Congo was once one of Africa's largest petroleum producers, but with declining production it will need new offshore oil finds to sustain its oil earnings over the long term.

Economy
Congo, Republic of the

Economy - overview:

The economy is a mixture of subsistence agriculture, an industrial sector based largely on oil, and support services, and a government characterized by budget problems and overstaffing. Oil has supplanted forestry as the mainstay of the economy, providing a major share of government revenues and exports. In the early 1980s, rapidly rising oil revenues enabled the government to finance large-scale development projects with GDP growth averaging 5% annually, one of the highest rates in Africa. The government has mortgaged a substantial portion of its oil earnings through oil-backed loans that have contributed to a growing debt burden and chronic revenue shortfalls. Economic reform efforts have been undertaken with the support of international organizations, notably the World Bank and the IMF. However, the reform program came to a halt in June 1997 when civil war erupted. Denis SASSOU-NGUESSO, who returned to power when the war ended in October 1997, publicly expressed interest in moving forward on economic reforms and privatization and in renewing cooperation with international financial institutions. Economic progress was badly hurt by slumping oil prices and the resumption of armed conflict in December 1998, which worsened the republic's budget deficit. The current administration presides over an uneasy internal peace and faces difficult economic challenges of stimulating recovery and reducing poverty. Recovery of oil prices has boosted the economy's GDP and near-term prospects. In March 2006, the World Bank and the International Monetary Fund (IMF) approved Heavily Indebted Poor Countries (HIPC) treatment for Congo.

Introduction
Cook Islands

Background:

Named after Captain COOK, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand; in 1965, residents chose self-government in free association with New Zealand. The emigration of skilled workers to New Zealand and government deficits are continuing problems.

Economy Cook Islands

Economy - overview:

Like many other South Pacific island nations, the Cook Islands' economic development is hindered by the isolation of the country from foreign markets, the limited size of domestic markets, lack of natural resources, periodic devastation from natural disasters, and inadequate infrastructure. Agriculture, employing about one-third of the working population, provides the economic base with major exports made up of copra and citrus fruit. Black pearls are the Cook Islands' leading export. Manufacturing activities are limited to fruit processing, clothing, and handicrafts. Trade deficits are offset by remittances from emigrants and by foreign aid, overwhelmingly from New Zealand. In the 1980s and 1990s, the country lived beyond its means, maintaining a bloated public service and accumulating a large foreign debt. Subsequent reforms, including the sale of state assets, the strengthening of economic management, the encouragement of tourism, and a debt restructuring agreement, have rekindled investment and growth.

Introduction
Coral Sea Islands

Background:

Scattered over more than three-quarters of a million square kilometers of ocean, the Coral Sea Islands were declared a territory of Australia in 1969. Introduction

Costa Rica

Background:

Although explored by the Spanish early in the 16th century, initial attempts at colonizing Costa Rica proved unsuccessful due to a combination of factors, including: disease from mosquito-infested swamps, brutal heat, resistance by natives, and pirate raids. It was not until 1563 that a permanent settlement of Cartago was established in the cooler, fertile central highlands. The area remained a colony for some two and a half centuries. In 1821, Costa Rica became one of several Central American provinces that jointly declared their independence from Spain. Two years later it joined the United Provinces of Central America, but this federation disintegrated in 1838, at which time Costa Rica proclaimed its sovereignty and independence. Since the late 19th century, only two brief periods of violence have marred the country's democratic development. Although it still maintains a large agricultural sector, Costa Rica has expanded its economy to include strong technology and tourism industries. The standard of living is relatively high. Land ownership is widespread.

Economy Costa Rica

Economy - overview:

Costa Rica's basically stable economy depends on tourism, agriculture, and electronics exports. Poverty has remained around 20% for nearly 20 years, and the strong social safety net that had been put into place by the government has eroded due to increased financial constraints on government expenditures. Immigration from Nicaragua has increasingly become a concern for the government. The estimated 300,000-500,000 Nicaraguans estimated to be in Costa Rica legally and illegally are an important source of (mostly unskilled) labor, but also place heavy demands on the social welfare system. Foreign investors remain attracted by the country's political stability and high education levels, as well as the fiscal incentives offered in the free-trade zones. Exports have become more diversified in the past 10 years due to the growth of the high-tech manufacturing sector, which is dominated by the microprocessor industry. Tourism continues to bring in foreign exchange, as Costa Rica's impressive biodiversity makes it a key destination for ecotourism. The government continues to grapple with its large internal and external deficits and sizable internal debt. Reducing inflation remains a difficult problem because of rising import prices, labor market rigidities, and fiscal deficits. Tax and public expenditure reforms will be necessary to close the budget gap. In October 2007, a national referendum voted in favor of the US-Central American Free Trade Agreement (CAFTA).

@Cote d'Ivoire

Introduction
Cote d'Ivoire

Background:

Close ties to France since independence in 1960, the development of cocoa production for export, and foreign investment made Cote d'Ivoire one of the most prosperous of the West African states, but did not protect it from political turmoil. In December 1999, a military coup - the first ever in Cote d'Ivoire's history - overthrew the government. Junta leader Robert GUEI blatantly rigged elections held in late 2000

and declared himself the winner. Popular protest forced him to step aside and brought Laurent GBAGBO into power. Ivorian dissidents and disaffected members of the military launched a failed coup attempt in September 2002. Rebel forces claimed the northern half of the country, and in January 2003 were granted ministerial positions in a unity government under the auspices of the Linas-Marcoussis Peace Accord. President GBAGBO and rebel forces resumed implementation of the peace accord in December 2003 after a three-month stalemate, but issues that sparked the civil war, such as land reform and grounds for citizenship, remained unresolved. In March 2007 President GBAGBO and former New Force rebel leader Guillaume SORO signed the Ouagadougou Political Agreement. As a result of the agreement, SORO joined GBAGBO's government as Prime Minister and the two agreed to reunite the country by dismantling the zone of confidence separating North from South, integrate rebel forces into the national armed forces, and hold elections. Several thousand French and UN troops remain in Cote d'Ivoire to help the parties implement their commitments and to support the peace process.

Economy Cote d'Ivoire

Economy - overview:

Cote d'Ivoire is the world's largest producer and exporter of cocoa beans and a significant producer and exporter of coffee and palm oil. Consequently, the economy is highly sensitive to fluctuations in international prices for these products, and, to a lesser extent, in climatic conditions. Despite government attempts to diversify the economy, it is still heavily dependent on agriculture and related activities, engaging roughly 68% of the population. Since 2006, oil and gas production have become more important engines of economic activity than cocoa. According to IMF statistics, earnings from oil and refined products were \$1.3 billion in 2006, while cocoa-related revenues were \$1 billion during the same period. Cote d'Ivoire's offshore oil and gas production has resulted in substantial crude oil exports and provides sufficient natural gas to fuel electricity exports to Ghana, Togo, Benin, Mali and Burkina Faso. Oil exploration by a number of consortiums of private companies continues offshore, and President GBAGBO has expressed hope that daily crude output could reach 200,000 barrels per day (b/d) by the end of the decade. Since the end of the civil war in 2003, political turmoil has continued to damage the economy, resulting in the loss of foreign investment and slow economic growth. GDP grew by 1.8% in 2006 and 1.7% in 2007. Per capita income has declined by 15% since 1999.

Issues

Disputes - international:

despite the presence of over 9,000 UN forces (UNOCI) in Cote d'Ivoire since 2004, ethnic conflict still leaves displaced hundreds of thousands of Ivoirians in and out of the country as well as driven out migrants from neighboring states who worked in Ivorian cocoa plantations; the March 2007 peace deal between Ivorian rebels and the government brought significant numbers of rebels out of hiding in neighboring states

Refugees and internally displaced persons:

refugees (country of origin): 25,615 (Liberia) IDPs: 709,000 (2002 coup; most IDPs are in western regions) (2007)

Trafficking in persons:

Cote d'Ivoire is a source, transit, and destination country for women and children trafficked for forced labor and commercial sexual exploitation; trafficking within the country is more prevalent than international trafficking and the majority of victims are children; women and girls are trafficked from northern areas to southern cities for domestic servitude, restaurant labor, and sexual exploitation; boys are trafficked internally for agricultural and service labor and transnationally for forced labor in agriculture, mining, construction, and in the fishing industry; women and girls are trafficked to and from other West and Central African countries for domestic servitude and forced street vending tier rating: Tier 2 Watch List - Cote d'Ivoire is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking in 2007, particularly with regard to its law enforcement efforts and

protection of sex trafficking victims; in addition, Ivoirian law does not prohibit all forms of trafficking, and Cote d'Ivoire has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs:

illicit producer of cannabis, mostly for local consumption; utility as a narcotic transshipment point to Europe reduced by ongoing political instability; while rampant corruption and inadequate supervision leave the banking system vulnerable to money laundering, the lack of a developed financial system limits the country's utility as a major money-laundering center

Introduction
Croatia

Background:

The lands that today comprise Croatia were part of the Austro-Hungarian Empire until the close of World War I. In 1918, the Croats, Serbs, and Slovenes formed a kingdom known after 1929 as Yugoslavia. Following World War II, Yugoslavia became a federal independent Communist state under the strong hand of Marshal TITO. Although Croatia declared its independence from Yugoslavia in 1991, it took four years of sporadic, but often bitter, fighting before occupying Serb armies were mostly cleared from Croatian lands. Under UN supervision, the last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998.

Economy Croatia

Economy - overview:

Once one of the wealthiest of the Yugoslav republics, Croatia's economy suffered badly during the 1991-95 war as output collapsed and the country missed the early waves of investment in Central and Eastern Europe that followed the fall of the Berlin Wall. Since 2000, however, Croatia's economic fortunes have begun to improve slowly,

with moderate but steady GDP growth between 4% and 6% led by a rebound in tourism and credit-driven consumer spending. Inflation over the same period has remained tame and the currency, the kuna, stable. Nevertheless, difficult problems still remain, including a stubbornly high unemployment rate, a growing trade deficit and uneven regional development. The state retains a large role in the economy, as privatization efforts often meet stiff public and political resistance. While macroeconomic stabilization has largely been achieved, structural reforms lag because of deep resistance on the part of the public and lack of strong support from politicians. The EU accession process should accelerate fiscal and structural reform.

Introduction Cuba

Background:

The native Amerindian population of Cuba began to decline after the European discovery of the island by Christopher COLUMBUS in 1492 and following its development as a Spanish colony during the next several centuries. Large numbers of African slaves were imported to work the coffee and sugar plantations, and Havana became the launching point for the annual treasure fleets bound for Spain from Mexico and Peru. Spanish rule, marked initially by neglect, became increasingly repressive, provoking an independence movement and occasional rebellions that were harshly suppressed. It was US intervention during the Spanish-American War in 1898 that finally overthrew Spanish rule. The subsequent Treaty of Paris established Cuban independence, which was granted in 1902 after a three-year transition period. Fidel CASTRO led a rebel army to victory in 1959; his iron rule held the subsequent regime together for nearly five decades. He stepped down as president in February 2008 in favor of his younger brother Raul CASTRO. Cuba's Communist revolution, with Soviet support, was exported throughout Latin America and Africa during the 1960s, 1970s, and 1980s. The country is now slowly recovering from a severe economic downturn in 1990, following the withdrawal of former Soviet subsidies, worth \$4 billion to \$6 billion annually. Cuba portrays its difficulties as the result of the US embargo in place since 1961. Illicit migration to the US - using homemade rafts, alien smugglers, air flights, or via the southwest border - is a continuing problem. The US Coast Guard intercepted 2,864 individuals attempting to cross the Straits of Florida in fiscal year 2006.

Economy Cuba

Economy - overview:

The government continues to balance the need for economic loosening against a desire for firm political control. It has rolled back limited reforms undertaken in the 1990s to increase enterprise efficiency and alleviate serious shortages of food, consumer goods, and services. The average Cuban's standard of living remains at a lower level than before the downturn of the 1990s, which was caused by the loss of Soviet aid and domestic inefficiencies. Since late 2000, Venezuela has been providing oil on preferential terms, and it currently supplies about 100,000 barrels per day of petroleum products. Cuba has been paying for the oil, in part, with the services of Cuban personnel in Venezuela, including some 20,000 medical professionals. In 2007, high metals prices continued to boost Cuban earnings from nickel and cobalt production. Havana continued to invest in the country's energy sector to mitigate electrical blackouts that had plagued the country since 2004.

US Naval Base at Guantanamo Bay is leased to US and only mutual agreement or US abandonment of the facility can terminate the lease

Trafficking in persons:

current situation: Cuba is principally a source country for women and children trafficked within the country for the purpose of commercial sexual exploitation and possibly for forced labor; the country is a destination for sex tourism, including child sex tourism, which is a problem in many areas of the country; some Cuban nationals willingly migrate to the United States, but are subsequently exploited for forced labor by their smugglers; Cuba is also a transit point for the smuggling of migrants from China, Sri Lanka, Bangladesh, Lebanon, and other nations to the United States and Canada tier rating: Tier 3 - Cuba does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; exact information about trafficking in Cuba is difficult to obtain because the government does

not acknowledge or condemn human trafficking as a problem in Cuba; tangible efforts to prosecute offenders, protect victims, or prevent human trafficking activity do not appear to have been made during 2007; Cuba has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs:

territorial waters and air space serve as transshipment zone for US- and European-bound drugs; established the death penalty for certain drug-related crimes in 1999

Introduction
Cyprus

Background:

A former British colony, Cyprus became independent in 1960 following years of resistance to British rule. Tensions between the Greek Cypriot majority and Turkish Cypriot minority came to a head in December 1963, when violence broke out in the capital of Nicosia. Despite the deployment of UN peacekeepers in 1964, sporadic intercommunal violence continued forcing most Turkish Cypriots into enclaves throughout the island. In 1974, a Greek Government-sponsored attempt to seize control of Cyprus was met by military intervention from Turkey, which soon controlled more than a third of the island. In 1983, the Turkish-held area declared itself the "Turkish Republic of Northern Cyprus" (TRNC), but it is recognized only by Turkey. The latest two-year round of UN-brokered talks - between the leaders of the Greek Cypriot and

Turkish Cypriot communities to reach an agreement to reunite the divided island - ended when the Greek Cypriots rejected the UN settlement plan in an April 2004 referendum. The entire island entered the EU on 1 May 2004, although the EU acquis - the body of common rights and obligations - applies only to the areas under direct government control, and is suspended in the areas administered by Turkish Cypriots. However, individual Turkish Cypriots able to document their eligibility for Republic of Cyprus citizenship legally enjoy the same rights accorded to other citizens of European Union states. The election of a new Cypriot president in 2008 served as the impetus for the UN to encourage both the Turkish and Cypriot Governments to reopen unification negotiations.

Economy Cyprus

Economy - overview:

The area of the Republic of Cyprus under government control has a market economy dominated by the service sector, which accounts for 78% of GDP. Tourism, financial services, and real estate are the most important sectors. Erratic growth rates over the past decade reflect the economy's reliance on tourism, which often fluctuates with political instability in the region and economic conditions in Western Europe. Nevertheless, the economy in the area under government control grew by an average of 3.6% per year during the period of 2000-06, well above the EU average. Cyprus joined the European Exchange Rate Mechanism (ERM2) in May 2005 and adopted the euro as its national currency on 1 January 2008. An aggressive austerity program in the preceding years, aimed at paving the way for the euro, helped turn a soaring fiscal deficit (6.3% in 2003) into a surplus of 1.5% in 2007. As in the area administered by Turkish Cypriots, water shortages are a perennial problem; a few desalination plants are now on line. After 10 years of drought, the country received substantial rainfall from 2001-04 alleviating immediate concerns. Rainfall in 2005 and 2006, however, was well below average, making water rationing a necessity in 2007.

Economy of the area administered by Turkish Cypriots:

Economy - overview: The Turkish Cypriot economy has roughly 30% of the per capita GDP of the south, and economic growth tends to be volatile, given the north's relative isolation, bloated public sector, reliance on the Turkish lira, and small market size. Agriculture and services, together, employ more than half of the work force. The Turkish Cypriot economy grew around 10.6% in 2006, fueled by growth in the construction and education sectors, as well as increased employment of Turkish Cypriots in the area under government control. GDP declined about 2.0% in 2007. The

Turkish Cypriots are heavily dependent on transfers from the Turkish Government. Ankara directly finances around one-third of the "TRNC's" budget. Aid from Turkey has exceeded \$400 million annually in recent years. GDP (purchasing power parity): \$1.865 billion (2006 est.) GDP - real growth rate: -2% (2007 est.) Issues

Disputes - international:

hostilities in 1974 divided the island into two de facto autonomous entities, the internationally recognized Cypriot Government and a Turkish-Cypriot community (north Cyprus); the 1,000-strong UN Peacekeeping Force in Cyprus (UNFICYP) has served in Cyprus since 1964 and maintains the buffer zone between north and south; on 1 May 2004, Cyprus entered the European Union still divided, with the EU's body of legislation and standards (acquis communautaire) suspended in the north; Turkey protests Cypriot Government creating hydrocarbon blocks and maritime boundary with Lebanon in March 2007

Refugees and internally displaced persons:

IDPs: 210,000 (both Turkish and Greek Cypriots; many displaced for over 30 years)
(2007)

Trafficking in persons:

current situation: Cyprus is primarily a destination country for a large number of women trafficked from Eastern and Central Europe, the Philippines, and the Dominican Republic for the purpose of sexual exploitation; traffickers continued to fraudulently recruit victims for work as dancers in cabarets and nightclubs on short-term "artiste" visas, for work in pubs and bars on employment visas, or for illegal work on tourist or student visas tier rating: Tier 2 Watch List - Cyprus is on the Tier 2 Watch List for a third consecutive year for failure to show evidence of increasing efforts to combat human trafficking during 2007; although Cyprus passed a new trafficking law and opened a government trafficking shelter, these efforts are outweighed by its failure to show tangible and critically needed progress in the areas of law enforcement, victim protection, and the prevention of trafficking (2008)

Illicit drugs:

minor transit point for heroin and hashish via air routes and container traffic to Europe, especially from Lebanon and Turkey; some cocaine transits as well; despite a strengthening of anti-money-laundering legislation, remains vulnerable to money laundering; reporting of suspicious transactions in offshore sector remains weak

Introduction

Czech Republic

Background:

Following the First World War, the closely related Czechs and Slovaks of the former Austro-Hungarian Empire merged to form Czechoslovakia. During the interwar years, the new country's leaders were frequently preoccupied with meeting the demands of other ethnic minorities within the republic, most notably the Sudeten Germans and the Ruthenians (Ukrainians). After World War II, a truncated Czechoslovakia fell within the Soviet sphere of influence. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize Communist party rule and create "socialism with a human face." Anti-Soviet demonstrations the following year ushered in a period of harsh repression. With the collapse of Soviet authority in 1989, Czechoslovakia regained its freedom through a peaceful "Velvet Revolution." On 1 January 1993, the country underwent a "velvet divorce" into its two national components, the Czech Republic and Slovakia. The Czech Republic joined NATO in 1999 and the European Union in 2004.

Economy Czech Republic

Economy - overview:

The Czech Republic is one of the most stable and prosperous of the post-Communist states of Central and Eastern Europe. Growth in 2000-07 was supported by exports to the EU, primarily to Germany, and a strong recovery of foreign and domestic investment. Domestic demand is playing an ever more important role in underpinning growth as the availability of credit cards and mortgages increases. The current account deficit has declined to around 3.3% of GDP as demand for automotive and other products from the Czech Republic remains strong in the European Union. Rising inflation from higher food and energy prices are a risk to balanced economic growth. Significant increases in social spending in the run-up to June 2006 elections prevented, the government from meeting its goal of reducing its budget deficit to 3% of GDP in 2007. Negotiations on pension and additional healthcare reforms are continuing without clear prospects for agreement and implementation. Intensified restructuring among large enterprises, improvements in the financial sector, and effective use of available EU funds should strengthen output growth. The pro-business Civic Democratic Party-led government approved reforms in 2007 designed to cut spending on some social welfare benefits and reform the tax system with the aim of eventually reducing the budget deficit to 2.3% of GDP by 2010. Parliamentary approval for any additional reforms could prove difficult, however, because of the parliament's even split. The government withdrew a 2010 target date for euro adoption and instead aims to meet the eurozone criteria around 2012.

Disputes - international:

while threats of international legal action never materialized in 2007, 915,220 Austrians, with the support of the popular Freedom Party, signed a petition in January 2008, demanding that Austria block the Czech Republic's accession to the EU unless Prague closes its controversial Soviet-style nuclear plant in Temelin, bordering Austria

Illicit drugs:

transshipment point for Southwest Asian heroin and minor transit point for Latin American cocaine to Western Europe; producer of synthetic drugs for local and regional markets; susceptible to money laundering related to drug trafficking, organized crime; significant consumer of ecstasy

Introduction

Denmark

Background:

Once the seat of Viking raiders and later a major north European power, Denmark has evolved into a modern, prosperous nation that is participating in the general political and economic integration of Europe. It joined NATO in 1949 and the EEC (now the EU) in 1973. However, the country has opted out of certain elements of the European Union's Maastricht Treaty, including the European Economic and Monetary Union (EMU), European defense cooperation, and issues concerning certain justice and home affairs.

Economy Denmark

Economy - overview:

The Danish economy has in recent years undergone strong expansion fueled primarily by private consumption growth, but also supported by exports and investments. This thoroughly modern market economy features high-tech agriculture, up-to-date small-scale and corporate industry, extensive government welfare measures, comfortable living standards, a stable currency, and high dependence on foreign trade. Unemployment is low and capacity constraints are limiting growth potential. Denmark is a net exporter of food and energy and enjoys a comfortable balance of payments surplus. Government objectives include streamlining the bureaucracy and further privatization of state assets. The government has been successful in meeting, and even exceeding, the economic convergence criteria for participating in the third phase (a common European currency) of the European Economic and Monetary Union (EMU), but so far Denmark has decided not to join 15 other EU members in the euro. Nonetheless, the Danish krone remains pegged to the euro. Economic growth gained momentum in 2004 and the upturn continued through 2007. The controversy over caricatures of the Prophet Muhammad printed in a Danish newspaper in September 2005 led to boycotts of some Danish exports to the Muslim world, especially exports of dairy products, but the boycotts did not have a significant impact on the overall Danish economy. Because of high GDP per capita, welfare benefits, a low Gini index, and political stability, the Danish living standards are among the highest in the world. A major long-term issue will be the sharp decline in the ratio of workers to retirees.

Introduction

Dhekelia

Background:

By terms of the 1960 Treaty of Establishment that created the independent Republic of Cyprus, the UK retained full sovereignty and jurisdiction over two areas of almost 254 square kilometers - Akrotiri and Dhekelia. The larger of these is the Dhekelia Sovereign Base Area, which is also referred to as the Eastern Sovereign Base Area.

@Djibouti

Introduction
Djibouti

Background:

The French Territory of the Afars and the Issas became Djibouti in 1977. Hassan Gouled APTIDON installed an authoritarian one-party state and proceeded to serve as president until 1999. Unrest among the Afars minority during the 1990s led to a civil war that ended in 2001 following the conclusion of a peace accord between Afar rebels and the Issa-dominated government. In 1999, Djibouti's first multi-party presidential elections resulted in the election of Ismail Omar GUELLEH; he was re-elected to a second and final term in 2005. Djibouti occupies a strategic geographic location at the mouth of the Red Sea and serves as an important transshipment location for goods entering and leaving the east African highlands. The present leadership favors close ties to France, which maintains a significant military presence in the country, but also has strong ties with the US. Djibouti hosts the only US military base in sub-Saharan Africa and is a front-line state in the global war on terrorism.

Economy Djibouti

Economy - overview:

The economy is based on service activities connected with the country's strategic location and status as a free trade zone in the Horn of Africa. Two-thirds of Djibouti's inhabitants live in the capital city; the remainder are mostly nomadic herders. Scanty rainfall limits crop production to fruits and vegetables, and most food must be imported. Djibouti provides services as both a transit port for the region and an international transshipment and refueling center. Imports and exports from landlocked neighbor Ethiopia represent 85% of port activity at Djibouti's container terminal. Djibouti has few natural resources and little industry. The nation is, therefore, heavily dependent on foreign assistance to help support its balance of payments and to finance development projects. An unemployment rate of nearly 60% continues to be a major problem. While

inflation is not a concern, due to the fixed tie of the Djiboutian franc to the US dollar, the artificially high value of the Djiboutian franc adversely affects Djibouti's balance of payments. Per capita consumption dropped an estimated 35% between 1999 and 2006 because of recession, civil war, and a high population growth rate (including immigrants and refugees). Faced with a multitude of economic difficulties, the government has fallen in arrears on long-term external debt and has been struggling to meet the stipulations of foreign aid donors.

@Dominica

Introduction Dominica

Background:

Dominica was the last of the Caribbean islands to be colonized by Europeans due chiefly to the fierce resistance of the native Caribs. France ceded possession to Great Britain in 1763, which made the island a colony in 1805. In 1980, two years after independence, Dominica's fortunes improved when a corrupt and tyrannical administration was replaced by that of Mary Eugenia CHARLES, the first female prime minister in the Caribbean, who remained in office for 15 years. Some 3,000 Carib Indians still living on Dominica are the only pre-Columbian population remaining in the eastern Caribbean.

Economy Dominica

Economy - overview:

The Dominican economy depends on agriculture, primarily bananas, and remains highly vulnerable to climatic conditions and international economic developments. Tourism has increased as the government seeks to promote Dominica as an "ecotourism" destination. In 2003, the government began a comprehensive restructuring of the economy - including elimination of price controls, privatization of the state banana company, and tax increases - to address Dominica's economic and financial crisis of 2001-02 and to meet IMF targets. This restructuring paved the way for the current economic recovery - real growth for 2006 reached a two-decade high - and will help to reduce the debt burden, which remains at about 100% of GDP. In order to diversify the island's production base, the government is attempting to develop an offshore financial sector and is researching Dominica's capability to export geothermal energy.

Issues

Disputes - international:

Dominica is the only Caribbean state to challenge Venezuela's sovereignty claim over Aves Island and joins the other island nations in challenging whether the feature sustains human habitation, a criterion under the UN Convention on the Law of the Sea (UNCLOS), which permits Venezuela to extend its Exclusive Economic Zone (EEZ) and continental shelf claims over a large portion of the eastern Caribbean Sea

Illicit drugs:

transshipment point for narcotics bound for the US and Europe; minor cannabis producer; anti-money-laundering enforcement is weak, making the country particularly vulnerable to money laundering

Introduction
Dominican Republic

Background:

Explored and claimed by Christopher COLUMBUS on his first voyage in 1492, the island of Hispaniola became a springboard for Spanish conquest of the Caribbean and the American mainland. In 1697, Spain recognized French dominion over the western third of the island, which in 1804 became Haiti. The remainder of the island, by then known as Santo Domingo, sought to gain its own independence in 1821, but was conquered and ruled by the Haitians for 22 years; it finally attained independence as the Dominican Republic in 1844. In 1861, the Dominicans voluntarily returned to the Spanish Empire, but two years later they launched a war that restored independence in 1865. A legacy of unsettled, mostly non-representative rule followed, capped by the dictatorship of Rafael Leonidas TRUJILLO from 1930-61. Juan BOSCH was elected president in 1962, but was deposed in a military coup in 1963. In 1965, the United States led an intervention in the midst of a civil war sparked by an uprising to restore BOSCH. In 1966, Joaquin BALAGUER defeated BOSCH in an election to become president. BALAGUER maintained a tight grip on power for most of the next 30 years when international reaction to flawed elections forced him to curtail his term in 1996. Since then, regular competitive elections have been held in which opposition candidates have won the presidency. Former President (1996-2000) Leonel FERNANDEZ Reyna won election to a second term in 2004 following a constitutional amendment allowing presidents to serve more than one term.

Economy
Dominican Republic

Economy - overview:

The Dominican Republic has enjoyed strong GDP growth since 2005, with double digit growth in 2006. In 2007, exports were bolstered by the nearly 50% increase in nickel prices; however, prices are expected to fall in 2008, contributing to a slowdown in GDP growth for the year. Although the country has long been viewed primarily as an exporter of sugar, coffee, and tobacco, in recent years the service sector has overtaken agriculture as the economy's largest employer due to growth in tourism and free trade zones. The economy is highly dependent upon the US, the source of nearly three-fourths of exports, and remittances represent about a tenth of GDP, equivalent to almost half of exports and three-quarters of tourism receipts. With the help of strict fiscal targets agreed to in the 2004 renegotiation of an IMF standby loan, President FERNANDEZ has stabilized the country's financial situation, lowering inflation to less than 6%. A fiscal expansion is expected for 2008 prior to the elections in May and for Tropical Storm Noel reconstruction. Although the economy is growing at a respectable

rate, high unemployment and underemployment remains an important challenge. The country suffers from marked income inequality; the poorest half of the population receives less than one-fifth of GNP, while the richest 10% enjoys nearly 40% of national income. The Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in March 2007, which should boost investment and exports and reduce losses to the Asian garment industry.

Introduction
Ecuador

Background:

What is now Ecuador formed part of the northern Inca Empire until the Spanish conquest in 1533. Quito became a seat of Spanish colonial government in 1563 and part of the Viceroyalty of New Granada in 1717. The territories of the Viceroyalty - New Granada (Colombia), Venezuela, and Quito - gained their independence between 1819 and 1822 and formed a federation known as Gran Colombia. When Quito withdrew in 1830, the traditional name was changed in favor of the "Republic of the Equator." Between 1904 and 1942, Ecuador lost territories in a series of conflicts with its neighbors. A border war with Peru that flared in 1995 was resolved in 1999. Although Ecuador marked 25 years of civilian governance in 2004, the period has been marred by political instability. Protests in Quito have contributed to the mid-term ouster of Ecuador's last three democratically elected Presidents. In 2007, a Constituent Assembly was elected to draft a new constitution; Ecuador's twentieth since gaining independence.

Economy
Ecuador

Economy - overview:

Ecuador is substantially dependent on its petroleum resources, which have accounted for more than half of the country's export earnings and one-fourth of public sector revenues in recent years. In 1999/2000, Ecuador suffered a severe economic crisis, with GDP contracted by more than 6%, with a significant increase in poverty. The banking system also collapsed, and Ecuador defaulted on its external debt later that year. In March 2000, Congress approved a series of structural reforms that also provided for the adoption of the US dollar as legal tender. Dollarization stabilized the economy, and positive growth returned in the years that followed, helped by high oil prices, remittances, and increased non-traditional exports. From 2002-06 the economy grew 5.5%, the highest five-year average in 25 years. The poverty rate declined but remained high at 38% in 2006. In 2006 the government of Alfredo PALACIO (2005-07) seized the assets of Occidental Petroleum for alleged contract violations and imposed a windfall revenue tax on foreign oil companies, leading to the suspension of free trade negotiations with the US. These measures, combined with chronic underinvestment in the state oil company, Petroecuador, led to a drop in petroleum production in 2007.

PALACIO's successor, Rafael CORREA, raised the specter of debt default - but Ecuador has paid its debt on time. He also decreed a higher windfall revenue tax on private oil companies, then sought to renegotiate their contracts to overcome the debilitating effect of the tax. This generated economic uncertainty; private investment has dropped and economic growth has slowed significantly.

Introduction
Egypt

Background:

The regularity and richness of the annual Nile River flood, coupled with semi-isolation provided by deserts to the east and west, allowed for the development of one of the world's great civilizations. A unified kingdom arose circa 3200 B.C., and a series of dynasties ruled in Egypt for the next three millennia. The last native dynasty fell to the Persians in 341 B.C., who in turn were replaced by the Greeks, Romans, and Byzantines. It was the Arabs who introduced Islam and the Arabic language in the 7th century and who ruled for the next six centuries. A local military caste, the Mamluks

took control about 1250 and continued to govern after the conquest of Egypt by the Ottoman Turks in 1517. Following the completion of the Suez Canal in 1869, Egypt became an important world transportation hub, but also fell heavily into debt. Ostensibly to protect its investments, Britain seized control of Egypt's government in 1882, but nominal allegiance to the Ottoman Empire continued until 1914. Partially independent from the UK in 1922, Egypt acquired full sovereignty with the overthrow of the British-backed monarchy in 1952. The completion of the Aswan High Dam in 1971 and the resultant Lake Nasser have altered the time-honored place of the Nile River in the agriculture and ecology of Egypt. A rapidly growing population (the largest in the Arab world), limited arable land, and dependence on the Nile all continue to overtax resources and stress society. The government has struggled to meet the demands of Egypt's growing population through economic reform and massive investment in communications and physical infrastructure.

Economy Egypt

Economy - overview:

Occupying the northeast corner of the African continent, Egypt is bisected by the highly fertile Nile valley, where most economic activity takes place. In the last 30 years, the government has reformed the highly centralized economy it inherited from President Gamel Abdel NASSER. In 2005, Prime Minister Ahmed NAZIF's government reduced personal and corporate tax rates, reduced energy subsidies, and privatized several enterprises. The stock market boomed, and GDP grew about 5% per year in 2005-06, and topped 7% in 2007. Despite these achievements, the government has failed to raise living standards for the average Egyptian, and has had to continue providing subsidies for basic necessities. The subsidies have contributed to a sizeable budget deficit - roughly 7.5% of GDP in 2007 - and represent a significant drain on the economy. Foreign direct investment has increased significantly in the past two years, but the NAZIF government will need to continue its aggressive pursuit of reforms in order to sustain the spike in investment and growth and begin to improve economic conditions for the broader population. Egypt's export sectors - particularly natural gas - have bright prospects.

Issues

Disputes - international:

while Sudan retains claim to the Hala'ib Triangle north of the 1899 Treaty boundary along the 22nd Parallel, both states withdrew their military presence in the 1990s and Egypt has invested in and effectively administers the area; Egypt no longer shows its administration of the Bir Tawil trapezoid in Sudan on its maps; Gazan breaches in the security wall with Egypt in January 2008 highlight difficulties in monitoring the Sinai border

Refugees and internally displaced persons:

refugees (country of origin): 60,000 - 80,000 (Iraq); 70,198 (Palestinian Territories); 12,157 (Sudan) (2007)

Trafficking in persons:

current situation: Egypt is a transit country for women trafficked from Eastern European countries to Israel for sexual exploitation, and is a source for children trafficked within the country for commercial sexual exploitation and domestic servitude, although the extent to which children are trafficked internally is unknown; children were also recruited for domestic and agricultural work; some of these children face conditions of involuntary servitude, such as restrictions on movement, non-payment of wages, threats, and physical or sexual abuse tier rating: Tier 2 Watch List - Egypt is on the Tier 2 Watch List for the third year in a row because it did not provide evidence of increasing efforts to investigate and prosecute traffickers; however, in July 2007, the government established the "National Coordinating Committee to Combat and Prevent Trafficking in Persons," which improved inter-governmental coordination on anti-trafficking initiatives; Egypt made no discernible efforts to punish trafficking crimes in 2007 and the Egyptian penal code does not prohibit all forms of trafficking; Egypt did not increase its services to trafficking victims during the reporting period (2008)

Illicit drugs:

transit point for cannabis, heroin, and opium moving to Europe, Israel, and North Africa; transit stop for Nigerian drug couriers; concern as money laundering site due to lax enforcement of financial regulations

Introduction El Salvador

Background:

El Salvador achieved independence from Spain in 1821 and from the Central American Federation in 1839. A 12-year civil war, which cost about 75,000 lives, was brought to a close in 1992 when the government and leftist rebels signed a treaty that provided for military and political reforms.

Economy El Salvador

Economy - overview:

The smallest country in Central America, El Salvador has the third largest economy, but growth has been modest in recent years. Robust growth in non-traditional exports have offset declines in the maquila exports, while remittances and external aid offset the trade deficit from high oil prices and strong import demand for consumer and intermediate goods. El Salvador leads the region in remittances per capita with inflows equivalent to nearly all export income. Implementation in 2006 of the Central America-Dominican Republic Free Trade Agreement (CAFTA), which El Salvador was the first to ratify, has strengthened an already positive export trend. With the adoption of the US dollar as its currency in 2001, El Salvador lost control over monetary policy and must concentrate on maintaining a disciplined fiscal policy. The current government has pursued economic diversification, with some success in promoting textile production, international port services, and tourism through tax incentives. It is committed to opening the economy to trade and investment, and has embarked on a wave of privatizations extending to telecom, electricity distribution, banking, and pension funds. In late 2006, the government and the Millennium Challenge Corporation signed a five-year, \$461 million compact to stimulate economic growth and reduce poverty in the country's northern region through investments in education, public services, enterprise development, and transportation infrastructure.

@Equatorial Guinea

Introduction
Equatorial Guinea

Background:

Equatorial Guinea gained independence in 1968 after 190 years of Spanish rule. This tiny country, composed of a mainland portion plus five inhabited islands, is one of the smallest on the African continent. President Teodoro OBIANG NGUEMA MBASOGO has ruled the country since 1979 when he seized power in a coup. Although nominally a constitutional democracy since 1991, the 1996 and 2002 presidential elections - as well as the 1999 and 2004 legislative elections - were widely seen as flawed. The president exerts almost total control over the political system and has discouraged political opposition. Equatorial Guinea has experienced rapid economic growth due to the discovery of large offshore oil reserves, and in the last decade has become Sub-Saharan Africa's third largest oil exporter. Despite the country's economic windfall from

oil production resulting in a massive increase in government revenue in recent years, there have been few improvements in the population's living standards.

Economy Equatorial Guinea

Economy - overview:

The discovery and exploitation of large oil reserves have contributed to dramatic economic growth in recent years. Forestry, farming, and fishing are also major components of GDP. Subsistence farming predominates. Although pre-independence Equatorial Guinea counted on cocoa production for hard currency earnings, the neglect of the rural economy under successive regimes has diminished potential for agriculture-led growth (the government has stated its intention to reinvest some oil revenue into agriculture). A number of aid programs sponsored by the World Bank and the IMF have been cut off since 1993, because of corruption and mismanagement. No longer eligible for concessional financing because of large oil revenues, the government has been trying to agree on a "shadow" fiscal management program with the World Bank and IMF. Government officials and their family members own most businesses. Undeveloped natural resources include titanium, iron ore, manganese, uranium, and alluvial gold. Growth remained strong in 2007, led by oil.

Issues

Disputes - international:

in 2002, ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but a dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River and imprecisely defined maritime coordinates in the ICJ decision delay final delimitation; UN urges Equatorial Guinea and Gabon to resolve the sovereignty dispute over Gabon-occupied Mbane and lesser islands and to create a maritime boundary in the hydrocarbon-rich Corisco Bay

Trafficking in persons:

current situation: Equatorial Guinea is primarily a destination country for children trafficked for the purpose of forced labor and possibly for the purpose of sexual exploitation; children have been trafficked from nearby countries for domestic servitude, market labor, ambulant vending, and possibly sexual exploitation; women may also be trafficked to Equatorial Guinea from Cameroon, Benin, other neighboring countries, and China for sexual exploitation tier rating: Tier 2 Watch List - Equatorial Guinea is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to eliminate trafficking, particularly in the areas of prosecuting and convicting trafficking offenders and failing to formalize mechanisms to provide assistance to victims; although the government made some effort to enforce laws against child labor exploitation, it failed to report any trafficking prosecutions or convictions in 2007; the government continued to lack shelters or formal procedures for providing care to victims (2008)

@Eritrea

Introduction
Eritrea

Background:

Eritrea was awarded to Ethiopia in 1952 as part of a federation. Ethiopia's annexation of Eritrea as a province 10 years later sparked a 30-year struggle for independence that ended in 1991 with Eritrean rebels defeating governmental forces; independence was overwhelmingly approved in a 1993 referendum. A two-and-a-half-year border war with Ethiopia that erupted in 1998 ended under UN auspices in December 2000. Eritrea currently hosts a UN peacekeeping operation that is monitoring a 25 km-wide Temporary Security Zone (TSZ) on the border with Ethiopia. An international commission, organized to resolve the border dispute, posted its findings in 2002. However, both parties have been unable to reach agreement on implementing the decision. On 30 November 2007, the Eritrea-Ethiopia Boundary Commission remotely demarcated the border by coordinates and dissolved itself, leaving Ethiopia still occupying several tracts of disputed territory, including the town of Badme. Eritrea accepted the EEBC's "virtual demarcation" decision and called on Ethiopia to remove its troops from the TSZ which it states is Eritrean territory. Ethiopia has not accepted the virtual demarcation decision.

Economy Eritrea

Economy - overview:

Since independence from Ethiopia in 1993, Eritrea has faced the economic problems of a small, desperately poor country, accentuated by the recent implementation of restrictive economic policies. Eritrea has a command economy under the control of the sole political party, the People's Front for Democracy and Justice (PFDJ). Like the economies of many African nations, the economy is largely based on subsistence agriculture, with 80% of the population involved in farming and herding. The

Ethiopian-Eritrea war in 1998-2000 severely hurt Eritrea's economy. GDP growth fell to zero in 1999 and to -12.1% in 2000. The May 2000 Ethiopian offensive into northern Eritrea caused some \$600 million in property damage and loss, including losses of \$225 million in livestock and 55,000 homes. The attack prevented planting of crops in Eritrea's most productive region, causing food production to drop by 62%. Even during the war, Eritrea developed its transportation infrastructure, asphaltting new roads, improving its ports, and repairing war-damaged roads and bridges. Since the war ended, the government has maintained a firm grip on the economy, expanding the use of the military and party-owned businesses to complete Eritrea's development agenda. The government strictly controls the use of foreign currency, limiting access and availability. Few private enterprises remain in Eritrea. Eritrea's economy is heavily dependent on taxes paid by members of the diaspora. Erratic rainfall and the delayed demobilization of agriculturalists from the military continue to interfere with agricultural production, and Eritrea's recent harvests have not been able to meet the food needs of the country. The government continues to place its hope for additional revenue on the development of several international mining projects. Despite difficulties for international companies in working with the Eritrean government, a Canadian mining company signed a contract with the GSE in 2007 and plans to begin mineral extraction in 2010. Eritrea also anticipates opening a free trade zone at the port of Massawa in 2008. Eritrea's economic future depends upon its ability to master social problems such as illiteracy, unemployment, and low skills, and more importantly, on the government's willingness to support a true market economy.

Introduction
Estonia

Background:

After centuries of Danish, Swedish, German, and Russian rule, Estonia attained independence in 1918. Forcibly incorporated into the USSR in 1940 - an action never recognized by the US - it regained its freedom in 1991, with the collapse of the Soviet Union. Since the last Russian troops left in 1994, Estonia has been free to promote economic and political ties with Western Europe. It joined both NATO and the EU in the spring of 2004.

Economy
Estonia

Economy - overview:

Estonia, a 2004 European Union entrant, has a modern market-based economy and one of the highest per capita income levels in Central Europe. The economy benefits from strong electronics and telecommunications sectors and strong trade ties with Finland, Sweden, and Germany. The current government has pursued relatively sound fiscal policies, resulting in balanced budgets and low public debt. In 2007, however, a large current account deficit and rising inflation put pressure on Estonia's currency, which is pegged to the euro, highlighting the need for growth in export-generating industries.

Disputes - international:

Russia recalled its signature to the 1996 technical border agreement with Estonia in 2005, rather than concede to Estonia's appending prepared a unilateral declaration referencing Soviet occupation and territorial losses; Russia demands better accommodation of Russian-speaking population in Estonia; Estonian citizen groups continue to press for realignment of the boundary based on the 1920 Tartu Peace Treaty that would bring the now divided ethnic Setu people and parts of the Narva region within Estonia; as a member state that forms part of the EU's external border, Estonia must implement the strict Schengen border rules with Russia

Illicit drugs:

growing producer of synthetic drugs; increasingly important transshipment zone for cannabis, cocaine, opiates, and synthetic drugs since joining the European Union and the Schengen Accord; potential money laundering related to organized crime and drug trafficking is a concern, as is possible use of the gambling sector to launder funds; major use of opiates and ecstasy

Introduction
Ethiopia

Background:

Unique among African countries, the ancient Ethiopian monarchy maintained its freedom from colonial rule with the exception of the 1936-41 Italian occupation during World War II. In 1974, a military junta, the Derg, deposed Emperor Haile SELASSIE (who had ruled since 1930) and established a socialist state. Torn by bloody coups, uprisings, wide-scale drought, and massive refugee problems, the regime was finally toppled in 1991 by a coalition of rebel forces, the Ethiopian People's Revolutionary Democratic Front (EPRDF). A constitution was adopted in 1994, and Ethiopia's first multiparty elections were held in 1995. A border war with Eritrea late in the 1990s ended with a peace treaty in December 2000. The Eritrea-Ethiopia Border Commission in November 2007 remotely demarcated the border by geographical coordinates, but final demarcation of the boundary on the ground is currently on hold because of Ethiopian objections to an international commission's finding requiring it to surrender territory considered sensitive to Ethiopia.

Economy Ethiopia

Economy - overview:

Ethiopia's poverty-stricken economy is based on agriculture, accounting for almost half of GDP, 60% of exports, and 80% of total employment. The agricultural sector suffers from frequent drought and poor cultivation practices. Coffee is critical to the Ethiopian economy with exports of some \$350 million in 2006, but historically low prices have seen many farmers switching to qat to supplement income. The war with Eritrea in 1998-2000 and recurrent drought have buffeted the economy, in particular coffee production. In November 2001, Ethiopia qualified for debt relief from the Highly Indebted Poor Countries (HIPC) initiative, and in December 2005 the IMF voted to forgive Ethiopia's debt to the body. Under Ethiopia's constitution, the state owns all land and provides long-term leases to the tenants; the system continues to hamper growth in the industrial sector as entrepreneurs are unable to use land as collateral for loans. Drought struck again late in 2002, leading to a 3.3% decline in GDP in 2003. Normal weather patterns helped agricultural and GDP growth recover during 2004-07.

Issues

Disputes - international:

Eritrea and Ethiopia agreed to abide by the 2002 Eritrea-Ethiopia Boundary Commission's (EEBC) delimitation decision, but neither party responded to the revised line detailed in the November 2006 EEBC Demarcation Statement; UN Peacekeeping Mission to Ethiopia and Eritrea (UNMEE), which has monitored the 25-km-wide Temporary Security Zone in Eritrea since 2000, is extended for six months in 2007 despite Eritrean restrictions on its operations and reduced force of 17,000; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; "Somaliland" secessionists provide port facilities in Berbera and trade ties to landlocked Ethiopia; civil unrest in eastern Sudan has hampered efforts to demarcate the porous boundary with Ethiopia

Refugees and internally displaced persons:

refugees (country of origin): 66,980 (Sudan); 16,576 (Somalia); 13,078 (Eritrea)
IDPs: 200,000 (border war with Eritrea from 1998-2000, ethnic clashes in Gambela, and ongoing Ethiopian military counterinsurgency in Somali region; most IDPs are in Tigray and Gambela Provinces) (2007)

Illicit drugs:

transit hub for heroin originating in Southwest and Southeast Asia and destined for Europe, as well as cocaine destined for markets in southern Africa; cultivates qat (khat) for local use and regional export, principally to Djibouti and Somalia (legal in all three countries); the lack of a well-developed financial system limits the country's utility as a money laundering center

@European Union

Introduction European Union

Preliminary statement:

The evolution of the European Union (EU) from a regional economic agreement among six neighboring states in 1951 to today's supranational organization of 27 countries across the European continent stands as an unprecedented phenomenon in the annals of history. Dynastic unions for territorial consolidation were long the norm in Europe. On a few occasions even country-level unions were arranged - the Polish-Lithuanian Commonwealth and the Austro-Hungarian Empire were examples - but for such a large number of nation-states to cede some of their sovereignty to an overarching entity is truly unique. Although the EU is not a federation in the strict sense, it is far more than a free-trade association such as ASEAN, NAFTA, or Mercosur, and it has many of the attributes associated with independent nations: its own flag, anthem, founding date, and currency, as well as an incipient common foreign and security policy in its dealings with other nations. In the future, many of these nation-like characteristics are likely to be expanded. Thus, inclusion of basic intelligence on the EU has been deemed appropriate as a new, separate entity in The World Factbook. However, because of the EU's special status, this description is placed after the regular country entries.

Background:

Following the two devastating World Wars of the first half of the 20th century, a number of European leaders in the late 1940s became convinced that the only way to establish a lasting peace was to unite the two chief belligerent nations - France and Germany - both economically and politically. In 1950, the French Foreign Minister Robert SCHUMAN proposed an eventual union of all Europe, the first step of which would be the integration of the coal and steel industries of Western Europe. The following year the European Coal and Steel Community (ECSC) was set up when six members, Belgium, France, West Germany, Italy, Luxembourg, and the Netherlands, signed the Treaty of Paris. The ECSC was so successful that within a few years the decision was made to integrate other parts of the countries' economies. In 1957, the Treaties of Rome created the European Economic Community (EEC) and the European Atomic Energy Community (Euratom), and the six member states undertook to

eliminate trade barriers among themselves by forming a common market. In 1967, the institutions of all three communities were formally merged into the European Community (EC), creating a single Commission, a single Council of Ministers, and the European Parliament. Members of the European Parliament were initially selected by national parliaments, but in 1979 the first direct elections were undertaken and they have been held every five years since. In 1973, the first enlargement of the EC took place with the addition of Denmark, Ireland, and the United Kingdom. The 1980s saw further membership expansion with Greece joining in 1981 and Spain and Portugal in 1986. The 1992 Treaty of Maastricht laid the basis for further forms of cooperation in foreign and defense policy, in judicial and internal affairs, and in the creation of an economic and monetary union - including a common currency. This further integration created the European Union (EU). In 1995, Austria, Finland, and Sweden joined the EU, raising the membership total to 15. A new currency, the euro, was launched in world money markets on 1 January 1999; it became the unit of exchange for all of the EU states except the United Kingdom, Sweden, and Denmark. In 2002, citizens of the 12 euro-area countries began using the euro banknotes and coins. Ten new countries joined the EU in 2004 - Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia - and in 2007 Bulgaria and Romania joined, bringing the current membership to 27. In order to ensure that the EU can continue to function efficiently with an expanded membership, the Treaty of Nice (in force as of 1 February 2003) set forth rules streamlining the size and procedures of EU institutions. An effort to establish an EU constitution, begun in October 2004, failed to attain unanimous ratification. A new effort, undertaken in June 2007, calls for the creation of an Intergovernmental Conference to form a political agreement, known as the Reform Treaty, which is to serve as a constitution. Unlike the constitution, however, the Reform Treaty would amend existing treaties rather than replace them.

a hybrid intergovernmental and supranational organization

Capital:

name: Brussels (Belgium), Strasbourg (France), Luxembourg geographic coordinates: 50 50 N, 4 20 E time difference: UTC+1 (6 hours ahead of Washington, DC during Standard Time) daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October note: the Council of the European Union meets in Brussels, Belgium, the European Parliament meets in Brussels and Strasbourg, France, and the Court of Justice of the European Communities meets in Luxembourg

Member states:

27 countries: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, UK; note - Canary Islands (Spain), Azores and Madeira (Portugal), French Guiana, Guadeloupe, Martinique, and Reunion (France) are sometimes listed separately even though they are legally a part of Spain, Portugal, and France; candidate countries: Croatia, Macedonia, Turkey

Independence:

7 February 1992 (Maastricht Treaty signed establishing the EU); 1 November 1993 (Maastricht Treaty entered into force)

National holiday:

Europe Day 9 May (1950); note - a Union-wide holiday, the day that Robert SCHUMAN proposed the creation of the European Coal and Steel Community to achieve an organized Europe

Constitution:

based on a series of treaties: the Treaty of Paris, which set up the European Coal and Steel Community (ECSC) in 1951; the Treaties of Rome, which set up the European Economic Community (EEC) and the European Atomic Energy Community (Euratom) in 1957; the Single European Act in 1986; the Treaty on European Union (Maastricht) in 1992; the Treaty of Amsterdam in 1997; and the Treaty of Nice in 2003; note - a new draft Constitutional Treaty, signed on 29 October 2004 in Rome, gave member states two years for ratification either by parliamentary vote or national referendum before it was scheduled to take effect on 1 November 2006; defeat in French and Dutch referenda in May-June 2005 dealt a severe setback to the ratification process; in June 2007, the European Council agreed on a clear and concise mandate for an Intergovernmental Conference to form a political agreement and put it into legal form; this agreement, known as the Reform Treaty, would have served as a constitution and was presented to the European Council in October 2007 for individual country ratification; it was rejected by Irish voters in June 2008, again stalling the ratification process

Legal system:

comparable to the legal systems of member states; first supranational law system

Suffrage:

18 years of age; universal

Executive branch:

chief of union: President of the European Commission Jose Manuel DURAO BARROSO (since 22 November 2004) cabinet: European Commission (composed of 27 members, one from each member country; each commissioner responsible for one or more policy areas) elections: the president of the European Commission is designated by member governments and is confirmed by the European Parliament; working from member state recommendations, the Commission president then assembles a "college"

of Commission members; the European Parliament confirms the entire Commission for a five-year term; the last confirmation process was held 18 November 2004 (next to be held in 2009) election results: European Parliament approved the European Commission by an approval vote of 449 to 149 with 82 abstentions note: the European Council brings together heads of state and government and the president of the European Commission and meets at least four times a year; its aim is to provide the impetus for the major political issues relating to European integration and to issue general policy guidelines

Legislative branch:

two legislative bodies consisting of the Council of the European Union (27 member-state ministers having 345 votes; the number of votes is roughly proportional to member-states' population; note - the Council is the main decision-making body of the EU) and the European Parliament (785 seats, as of 1 January 2007; seats allocated among member states by proportion to population; members elected by direct universal suffrage for a five-year term) elections: last held 10-13 June 2004 (next to be held June 2009) election results: percent of vote - NA; seats by party - EPP-ED 268, PES 202, ALDE 88, Greens/EFA 42, EUL/NGL 41, IND/DEM 36, UEN 27, independents 28; note - seats by party as of 1 December 2007 - EPP-ED 275, PES 217, ALDE 104, UEN 44, Greens/EFA 42, EUL/NGL 41, IND/DEM 24, independents 34, 4 unaccounted for

Judicial branch:

Court of Justice of the European Communities (ensures that the treaties are interpreted and applied uniformly throughout the EU; resolve constitutional issues among the EU institutions) - 27 justices (one from each member state) appointed for a six-year term; note - for the sake of efficiency, the court can sit with 13 justices known as the "Grand Chamber"; Court of First Instance - 27 justices appointed for a six-year term

Economy
European Union

Economy - overview:

Internally, the EU is attempting to lower trade barriers, adopt a common currency, and move toward convergence of living standards. Internationally, the EU aims to bolster Europe's trade position and its political and economic power. Because of the great differences in per capita income among member states (from \$7,000 to \$69,000) and historic national animosities, the EU faces difficulties in devising and enforcing common policies. For example, since 2003 Germany and France have flouted the member states' treaty obligation to prevent their national budgets from running more than a 3% deficit. In 2004 and 2007, the EU admitted 10 and two countries, respectively, that are, in general, less advanced technologically and economically than the other 15. Eleven established EU member states introduced the euro as their common currency on 1 January 1999 (Greece did so two years later), but the UK, Sweden, and Denmark chose not to participate. Of the 12 most recent member states, only Slovenia (1 January 2007) and Cyprus and Malta (1 January 2008) have adopted the euro; the remaining nine are legally required to adopt the currency upon meeting EU's fiscal and monetary convergence criteria.

European Union

Military - note:

the five-nation Eurocorps - created in 1992 by France, Germany, Belgium, Spain, and Luxembourg - has deployed troops and police on peacekeeping missions to Bosnia-Herzegovina, Macedonia, and the Democratic Republic of the Congo and assumed command of the ISAF in Afghanistan in August 2004; Eurocorps directly commands the 5,000-man Franco-German Brigade, the Multinational Command Support Brigade, and EUFOR in Bosnia and Herzegovina; in November 2004, the EU Council of Ministers formally committed to creating 13 1,500-man battle groups by the end of 2007, to respond to international crises on a rotating basis; 22 of the EU's 25 nations have agreed to supply troops; France, Italy, and the UK formed the first of three battle groups in 2005; Norway, Sweden, Estonia, and Finland established the Nordic Battle Group effective 1 January 2008; nine other groups are to be formed; a rapid-reaction naval EU Maritime Task Group was stood up in March 2007 (2007)

Disputes - international:

as a political union, the EU has no border disputes with neighboring countries, but Estonia has no land boundary agreements with Russia, Slovenia disputes its land and maritime boundaries with Croatia, and Spain has territorial and maritime disputes with Morocco and with the UK over Gibraltar; the EU has set up a Schengen area - consisting of 22 EU member states that have signed the convention implementing the Schengen agreements or "acquis" (1985 and 1990) on the free movement of persons and the harmonization of border controls in Europe; these agreements became incorporated into EU law with the implementation of the 1997 Treaty of Amsterdam on 1 May 1999; in addition, non-EU states Iceland and Norway (as part of the Nordic Union) have been included in the Schengen area since 1996 (full members in 2001), and Switzerland since 2008 bringing the total current membership to 25; the UK (since 2000) and Ireland (since 2002) take part in only some aspects of the Schengen area, especially with respect to police and criminal matters; nine of the 12 new member states that joined the EU since 2004 joined Schengen on 21 December 2007; of the three remaining EU states, Cyprus is expected to join by 2009, while Romania and Bulgaria continue to enhance their border security systems

@Falkland Islands (Islas Malvinas)

Introduction
Falkland Islands (Islas Malvinas)

Background:

Although first sighted by an English navigator in 1592, the first landing (English) did not occur until almost a century later in 1690, and the first settlement (French) was not established until 1764. The colony was turned over to Spain two years later and the islands have since been the subject of a territorial dispute, first between Britain and Spain, then between Britain and Argentina. The UK asserted its claim to the islands by establishing a naval garrison there in 1833. Argentina invaded the islands on 2 April 1982. The British responded with an expeditionary force that landed seven weeks later and after fierce fighting forced an Argentine surrender on 14 June 1982.

Economy

Falkland Islands (Islas Malvinas)

Economy - overview:

The economy was formerly based on agriculture, mainly sheep farming, but today fishing contributes the bulk of economic activity. In 1987, the government began selling fishing licenses to foreign trawlers operating within the Falkland Islands' exclusive fishing zone. These license fees total more than \$40 million per year, which help support the island's health, education, and welfare system. Squid accounts for 75% of the fish taken. Dairy farming supports domestic consumption; crops furnish winter fodder. Exports feature shipments of high-grade wool to the UK and the sale of postage stamps and coins. The islands are now self-financing except for defense. The British Geological Survey announced a 200-mile oil exploration zone around the islands in 1993, and early seismic surveys suggest substantial reserves capable of producing 500,000 barrels per day; to date, no exploitable site has been identified. An agreement between Argentina and the UK in 1995 seeks to defuse licensing and sovereignty conflicts that would dampen foreign interest in exploiting potential oil reserves. Tourism, especially eco-tourism, is increasing rapidly, with about 30,000 visitors in 2001. Another large source of income is interest paid on money the government has in the bank. The British military presence also provides a sizeable economic boost.

Economy
Faroe Islands

Economy - overview:

The Faroese economy is dependent on fishing, which makes the economy vulnerable to price swings. Since 2003 the Faroese economy has picked up as a result of higher prices for fish and for housing. Unemployment is minimal and government finances are relatively sound. Oil finds close to the Islands give hope for economically recoverable deposits, which could eventually lay the basis for a more diversified economy and lessen dependence on Danish economic assistance. Aided by a substantial annual subsidy (about 15% of GDP) from Denmark, the Faroese have a standard of living not far below the Danes and other Scandinavians.

@Fiji

Introduction
Fiji

Background:

Fiji became independent in 1970, after nearly a century as a British colony. Democratic rule was interrupted by two military coups in 1987, caused by concern over a government perceived as dominated by the Indian community (descendants of contract laborers brought to the islands by the British in the 19th century). The coups and a 1990 constitution that cemented native Melanesian control of Fiji, led to heavy Indian emigration; the population loss resulted in economic difficulties, but ensured that Melanesians became the majority. A new constitution enacted in 1997 was more equitable. Free and peaceful elections in 1999 resulted in a government led by an Indo-Fijian, but a civilian-led coup in May 2000 ushered in a prolonged period of political

turmoil. Parliamentary elections held in August 2001 provided Fiji with a democratically elected government led by Prime Minister Laisenia QARASE. Re-elected in May 2006, QARASE was ousted in a December 2006 military coup led by Commodore Voreqe BAINIMARAMA, who initially appointed himself acting president. In January 2007, BAINIMARAMA was appointed interim prime minister.

Economy Fiji

Economy - overview:

Fiji, endowed with forest, mineral, and fish resources, is one of the most developed of the Pacific island economies, though still with a large subsistence sector. Sugar exports, remittances from Fijians working abroad, and a growing tourist industry - with 400,000 to 500,000 tourists annually - are the major sources of foreign exchange. Fiji's sugar has special access to European Union markets, but will be harmed by the EU's decision to cut sugar subsidies. Sugar processing makes up one-third of industrial activity but is not efficient. Fiji's tourism industry was damaged by the December 2006 coup and is facing an uncertain recovery time. The coup has created a difficult business climate. Tourist arrivals for 2007 are estimated to be down almost 6%, with substantial job losses in the service sector. In July 2007 the Reserve Bank of Fiji announced the

economy was expected to contract by 3.1% in 2007. Fiji's current account deficit reached 23% of GDP in 2006. The EU has suspended all aid until the interim government takes steps toward new elections. Long-term problems include low investment, uncertain land ownership rights, and the government's inability to manage its budget. Overseas remittances from Fijians working in Kuwait and Iraq have decreased significantly.

Introduction
Finland

Background:

Finland was a province and then a grand duchy under Sweden from the 12th to the 19th centuries, and an autonomous grand duchy of Russia after 1809. It won its complete independence in 1917. During World War II, it was able to successfully defend its freedom and resist invasions by the Soviet Union - albeit with some loss of territory. In the subsequent half century, the Finns made a remarkable transformation from a farm/forest economy to a diversified modern industrial economy; per capita income is now among the highest in Western Europe. A member of the European Union since 1995, Finland was the only Nordic state to join the euro system at its initiation in January 1999.

Economy Finland

Economy - overview:

Finland has a highly industrialized, largely free-market economy with per capita output roughly that of the UK, France, Germany, and Italy. Its key economic sector is manufacturing - principally the wood, metals, engineering, telecommunications, and electronics industries. Trade is important; exports equal nearly two-fifths of GDP. Finland excels in high-tech exports, e.g., mobile phones. Except for timber and several minerals, Finland depends on imports of raw materials, energy, and some components for manufactured goods. Because of the climate, agricultural development is limited to maintaining self-sufficiency in basic products. Forestry, an important export earner, provides a secondary occupation for the rural population. High unemployment remains

a persistent problem. In 2007 Russia announced plans to impose high tariffs on raw timber exported to Finland. The Finnish pulp and paper industry will be threatened if these duties are put into place in 2008 and 2009, and the matter is now being handled by the European Union.

Introduction
France

Background:

Although ultimately a victor in World Wars I and II, France suffered extensive losses in its empire, wealth, manpower, and rank as a dominant nation-state. Nevertheless, France today is one of the most modern countries in the world and is a leader among European nations. Since 1958, it has constructed a hybrid presidential-parliamentary governing system resistant to the instabilities experienced in earlier more purely parliamentary administrations. In recent years, its reconciliation and cooperation with Germany have proved central to the economic integration of Europe, including the introduction of a common exchange currency, the euro, in January 1999. At present, France is at the forefront of efforts to develop the EU's military capabilities to supplement progress toward an EU foreign policy.

Economy France

Economy - overview:

France is in the midst of transition from a well-to-do modern economy that has featured extensive government ownership and intervention to one that relies more on market mechanisms. The government has partially or fully privatized many large companies, banks, and insurers, and has ceded stakes in such leading firms as Air France, France Telecom, Renault, and Thales. It maintains a strong presence in some sectors, particularly power, public transport, and defense industries. The telecommunications sector is gradually being opened to competition. France's leaders remain committed to a capitalism in which they maintain social equity by means of laws, tax policies, and social spending that reduce income disparity and the impact of free markets on public health and welfare. Widespread opposition to labor reform has in recent years hampered the government's ability to revitalize the economy. In 2007, the government launched divisive labor reform efforts that will continue into 2008. France's tax burden remains one of the highest in Europe (nearly 50% of GDP in 2005). France brought the budget deficit within the eurozone's 3%-of-GDP limit for the first time in 2007 and has reduced unemployment to roughly 8%. With at least 75 million foreign tourists per year, France is the most visited country in the world and maintains the third largest income in the world from tourism.

Introduction
French Polynesia

Background:

The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were suspended in January 1996. In recent years, French Polynesia's autonomy has been considerably expanded.

Economy
French Polynesia

Economy - overview:

Since 1962, when France stationed military personnel in the region, French Polynesia has changed from a subsistence agricultural economy to one in which a high proportion of the work force is either employed by the military or supports the tourist industry. With the halt of French nuclear testing in 1996, the military contribution to the economy fell sharply. Tourism accounts for about one-fourth of GDP and is a primary source of hard currency earnings. Other sources of income are pearl farming and deep-sea commercial fishing. The small manufacturing sector primarily processes agricultural

products. The territory benefits substantially from development agreements with France aimed principally at creating new businesses and strengthening social services.

@French Southern and Antarctic Lands

Introduction

French Southern and Antarctic Lands

Background:

In February 2007, the Iles Eparses became an integral part of the French Southern and Antarctic Lands (TAAF). The Southern Lands are now divided into five administrative districts, two of which are archipelagos, Iles Crozet and Iles Kerguelen; the third is a district composed of two volcanic islands, Ile Saint-Paul and Ile Amsterdam; the fourth, Iles Eparses, consists of five scattered tropical islands around Madagascar. They contain no permanent inhabitants and are visited only by researchers studying the native fauna, scientists at the various scientific stations, fishermen, and military personnel. The fifth district is the Antarctic portion, which consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840. Ile Amsterdam: Discovered but not named in 1522 by the Spanish, the island subsequently received the appellation of Nieuw Amsterdam from a Dutchman; it was claimed by France in 1843. A short-lived attempt at cattle farming began in 1871. A French meteorological station established on the island in 1949 is still in use. Ile Saint Paul: Claimed by France since 1893, the island was a fishing industry center from 1843 to 1914. In 1928, a spiny lobster cannery was established, but when the company went bankrupt in 1931, seven workers were abandoned. Only two survived until 1934 when rescue finally arrived. Iles Crozet: A large archipelago formed from the Crozet Plateau, Iles Crozet is divided into two main groups: L'Occidental (the West), which includes Ile aux Cochons, Ilots des Apotres, Ile des Pingouins, and the reefs Brisants de l'Heroine; and L'Oriental (the east), which includes Ile d'Est and Ile de la Possession (the largest island of the Crozets). Discovered and claimed by France in 1772, the islands were used for seal hunting and as a base for whaling. Originally administered as a dependency of Madagascar, they became part of the TAAF in 1955. Iles Kerguelen: This island group, discovered in 1772, is made up of one large island (Ile Kerguelen) and about 300 smaller islands. A permanent group of 50 to 100 scientists resides at the main base at Port-aux-Francais. Adelie Land: The only non-insular district of the TAAF is the Antarctic claim known as "Adelie Land." The US Government does not recognize it as a French dependency. Bassas da India: A French possession since 1897, this atoll is a volcanic rock surrounded by reefs and is awash at high tide. Europa Island: This heavily wooded island has been a French possession since 1897; it is the site of a small

military garrison that staffs a weather station. Glorioso Islands: A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated coral islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse. Juan de Nova Island: Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station. Tromelin Island: First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

Geography

French Southern and Antarctic Lands

Location:

southeast and east of Africa, islands in the southern Indian Ocean, some near Madagascar and others about equidistant between Africa, Antarctica, and Australia; note - French Southern and Antarctic Lands include Ile Amsterdam, Ile Saint-Paul, Iles Crozet, Iles Kerguelen, Bassas da India, Europa Island, Glorioso Islands, Juan de Nova Island, and Tromelin Island in the southern Indian Ocean, along with the French-claimed sector of Antarctica, "Adelie Land"; the US does not recognize the French claim to "Adelie Land"

@Gabon

Introduction
Gabon

Background:

Only two autocratic presidents have ruled Gabon since independence from France in 1960. The current president of Gabon, El Hadj Omar BONGO Ondimba - one of the longest-serving heads of state in the world - has dominated the country's political scene for four decades. President BONGO introduced a nominal multiparty system and a new constitution in the early 1990s. However, allegations of electoral fraud during local elections in 2002-03 and the presidential elections in 2005 have exposed the weaknesses of formal political structures in Gabon. Gabon's political opposition remains weak, divided, and financially dependent on the current regime. Despite political conditions, a small population, abundant natural resources, and considerable foreign support have helped make Gabon one of the more prosperous and stable African countries.

Economy Gabon

Economy - overview:

Gabon enjoys a per capita income four times that of most of sub-Saharan African nations. but because of high income inequality, a large proportion of the population remains poor. Gabon depended on timber and manganese until oil was discovered offshore in the early 1970s. The oil sector now accounts for 50% of GDP. Gabon continues to face fluctuating prices for its oil, timber, and manganese exports. Despite the abundance of natural wealth, poor fiscal management hobbles the economy. The devaluation of the CFA franc - its currency - by 50% in January 1994 sparked a one-time inflationary surge, to 35%; the rate dropped to 6% in 1996. The IMF provided a one-year standby arrangement in 1994-95, a three-year Enhanced Financing Facility (EFF) at near commercial rates beginning in late 1995, and stand-by credit of \$119 million in October 2000. Those agreements mandated progress in privatization and fiscal discipline. France provided additional financial support in January 1997 after Gabon met IMF targets for mid-1996. In 1997, an IMF mission to Gabon criticized the government for overspending on off-budget items, overborrowing from the central bank, and slipping on its schedule for privatization and administrative reform. The rebound of oil prices since 1999 have helped growth, but drops in production have hampered Gabon from fully realizing potential gains, and will continue to temper the gains for most of this decade. In December 2000, Gabon signed a new agreement with the Paris Club to reschedule its official debt. A follow-up bilateral repayment agreement with the US was signed in December 2001. Gabon signed a 14-month Stand-By Arrangement with the IMF in May 2004, and received Paris Club debt rescheduling later that year. Short-term progress depends on an upbeat world economy and fiscal and other adjustments in line with IMF policies.

@Gambia, The

Introduction
Gambia, The

Background:

The Gambia gained its independence from the UK in 1965. Geographically surrounded by Senegal, it formed a short-lived federation of Senegambia between 1982 and 1989. In 1991 the two nations signed a friendship and cooperation treaty, but tensions have flared up intermittently since then. Yahya A. J. J. JAMMEH led a military coup in 1994 that overthrew the president and banned political activity. A new constitution and presidential elections in 1996, followed by parliamentary balloting in 1997, completed a nominal return to civilian rule. JAMMEH has been elected president in all subsequent elections, including most recently in late 2006.

Economy Gambia, The

Economy - overview:

The Gambia has no confirmed mineral or natural resource deposits and has a limited agricultural base. About 75% of the population depends on crops and livestock for its livelihood. Small-scale manufacturing activity features the processing of peanuts, fish, and hides. Reexport trade normally constitutes a major segment of economic activity, but a 1999 government-imposed preshipment inspection plan, and instability of the Gambian dalasi (currency) have drawn some of the reexport trade away from The Gambia. The Gambia's natural beauty and proximity to Europe has made it one of the

larger markets for tourism in West Africa. The government's 1998 seizure of the private peanut firm Alimenta eliminated the largest purchaser of Gambian groundnuts. Despite an announced program to begin privatizing key parastatals, no plans have been made public that would indicate that the government intends to follow through on its promises. Unemployment and underemployment rates remain extremely high; short-run economic progress depends on sustained bilateral and multilateral aid, on responsible government economic management, on continued technical assistance from the IMF and bilateral donors, and on expected growth in the construction sector.

@Gaza Strip

Introduction
Gaza Strip

Background:

The September 1993 Israel-PLO Declaration of Principles on Interim Self-Government Arrangements provided for a transitional period of Palestinian self-rule in the West Bank and Gaza Strip. Under a series of agreements signed between May 1994 and September 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for Palestinian-populated areas of the West Bank and Gaza. Negotiations to determine the permanent status of the West Bank and Gaza stalled following the outbreak of an intifada in September 2000, as Israeli forces reoccupied most Palestinian-controlled areas. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. The proposed date for a permanent status agreement was postponed indefinitely due to violence and accusations that both sides had not followed through on their commitments. Following Palestinian leader Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel unilaterally withdrew all its settlers and soldiers and dismantled its military facilities in the Gaza Strip and withdrew settlers and redeployed soldiers from four small northern West Bank settlements. Nonetheless, Israel controls maritime, airspace, and most access to the Gaza Strip. A November 2005 PA-Israeli agreement authorized the reopening of the Rafah border crossing between the Gaza Strip and Egypt under joint PA and Egyptian control. In January 2006, the Islamic Resistance Movement, HAMAS, won control of the Palestinian Legislative Council (PLC). The international community refused to accept the HAMAS-led government because it did not recognize Israel, would not renounce violence, and refused to honor previous peace agreements between Israel and the PA. HAMAS took control of the PA government in March 2006, but President ABBAS had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift economic sanctions on Palestinians. The PLC was unable to convene throughout most of 2006 as a result of Israel's detention of many HAMAS PLC members and Israeli-imposed travel restrictions on other PLC members. Violent clashes took place between Fatah and HAMAS supporters in the Gaza Strip in 2006 and early 2007, resulting in numerous Palestinian deaths and injuries. ABBAS and HAMAS Political Bureau Chief MISHAL in February 2007 signed the Mecca Agreement in Saudi Arabia that resulted in the formation of a Palestinian National Unity Government (NUG) headed by HAMAS member Ismail HANIYA. However, fighting continued in the Gaza Strip, and in June, HAMAS militants succeeded in a violent takeover of all

military and governmental institutions in the Gaza Strip. ABBAS dismissed the NUG and through a series of Presidential decrees formed a PA government in the West Bank led by independent Salam FAYYAD. HAMAS rejected the NUG's dismissal and has called for resuming talks with Fatah, but ABBAS has ruled out negotiations until HAMAS agrees to a return of PA control over the Gaza Strip and recognizes the FAYYAD-led government. FAYYAD and his PA government initiated a series of security and economic reforms to improve conditions in the West Bank. ABBAS participated in talks with Israel's Prime Minister OLMERT and secured the release of some Palestinian prisoners and previously withheld customs revenue. During a November 2007 international meeting in Annapolis Maryland, ABBAS and OLMERT agreed to resume peace negotiations with the goal of reaching a final peace settlement by the end of 2008.

Economy
Gaza Strip

Economy - overview:

High population density, limited land access, and strict internal and external security controls have kept economic conditions in the Gaza Strip - the smaller of the two areas under the Palestinian Authority (PA)- even more degraded than in the West Bank. The beginning of the second intifada in September 2000 sparked an economic downturn, largely the result of Israeli closure policies; these policies, which were imposed to address security concerns in Israel, disrupted labor and trade access to and from the Gaza Strip. In 2001, and even more severely in 2003, Israeli military measures in PA areas resulted in the destruction of capital, the disruption of administrative structures, and widespread business closures. The Israeli withdrawal from the Gaza Strip in September 2005 offered some medium-term opportunities for economic growth, but continued Israeli-imposed crossings closures, which became more restrictive after Hamas violently took over the territory in June 2007, have resulted in widespread private sector layoffs and shortages of most goods.

Introduction
Georgia

Background:

The region of present-day Georgia contained the ancient kingdoms of Colchis and Kartli-Iberia. The area came under Roman influence in the first centuries A.D. and

Christianity became the state religion in the 330s. Domination by Persians, Arabs, and Turks was followed by a Georgian golden age (11th-13th centuries) that was cut short by the Mongol invasion of 1236. Subsequently, the Ottoman and Persian empires competed for influence in the region. Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918-1921) following the Russian revolution, it was forcibly incorporated into the USSR until the Soviet Union dissolved in 1991. An attempt by the incumbent Georgian government to manipulate national legislative elections in November 2003 touched off widespread protests that led to the resignation of Eduard SHEVARDNADZE, president since 1995. New elections in early 2004 swept Mikheil SAAKASHVILI into power along with his National Movement party. Progress on market reforms and democratization has been made in the years since independence, but this progress has been complicated by Russian assistance and support to the breakaway regions of Abkhazia and South Ossetia. Georgian military action in South Ossetia in early August 2008 led to a Russian military response that not only occupied the breakaway areas, but large portions of Georgia proper as well. Russian troops pulled back from most occupied Georgian territory, but in late August 2008 Russia unilaterally recognized the independence of Abkhazia and South Ossetia. This action was strongly condemned by most of the world's nations and international organizations.

Economy Georgia

Economy - overview:

Georgia's economy has sustained robust GDP growth of close to 10% in 2006 and 12% in 2007, based on strong inflows of foreign investment and robust government spending. However, a widening trade deficit and higher inflation are emerging risks to the economy. Areas of recent improvement include increasing foreign direct investment as well as growth in the construction, banking services and mining sectors. Georgia's main economic activities include the cultivation of agricultural products such as grapes, citrus fruits, and hazelnuts; mining of manganese and copper; and output of a small industrial sector producing alcoholic and nonalcoholic beverages, metals, machinery, aircraft and chemicals. The country imports nearly all its needed supplies of natural gas and oil products. It has sizeable hydropower capacity, a growing component of its energy supplies. Despite the severe damage the economy suffered due to civil strife in the 1990s, Georgia, with the help of the IMF and World Bank, has made substantial economic gains since 2000, achieving positive GDP growth and curtailing inflation. Georgia's GDP growth neared 10% in 2006 and 2007 despite restrictions on commerce with Russia. Areas of recent improvement include increased foreign direct investment as well as growth in the construction, banking services, and mining sectors. In addition, the reinvigorated privatization process has met with success. However, a widening trade deficit and higher inflation are emerging risks to the economy. Georgia has suffered from a chronic failure to collect tax revenues; however, the new government is making progress and has reformed the tax code, improved tax administration, increased tax enforcement, and cracked down on corruption. Government revenues have increased nearly four fold since 2003. Due to improvements in customs and financial (tax) enforcement, smuggling is a declining problem. Georgia has overcome the chronic energy shortages of the past by renovating hydropower plants and by bringing newly available natural gas supplies from Azerbaijan. It also has an increased ability to pay for more expensive gas imports from Russia. The country is pinning its hopes for long-term growth on a determined effort to reduce regulation, taxes and corruption in order to attract foreign investment. The construction on the Baku-T'bilisi-Ceyhan oil pipeline,

the Baku-T'bilisi-Erzerum gas pipeline, and the Kars-Akhalkalaki Railroad are part of a strategy to capitalize on Georgia's strategic location between Europe and Asia and develop its role as a transit point for gas, oil and other goods.

Introduction
Germany

Background:

As Europe's largest economy and second most populous nation, Germany is a key member of the continent's economic, political, and defense organizations. European power struggles immersed Germany in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC, which became the EU, and NATO, while the Communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then, Germany has expended considerable funds to bring

Eastern productivity and wages up to Western standards. In January 1999, Germany and 10 other EU countries introduced a common European exchange currency, the euro.

Economy Germany

Economy - overview:

Germany's affluent and technologically powerful economy - the fifth largest in the world in PPP terms - showed considerable improvement in 2007 with 2.6% growth. After a long period of stagnation with an average growth rate of 0.7% between 2001-05 and chronically high unemployment, stronger growth led to a considerable fall in unemployment to about 8% near the end of 2007. Among the most important reasons for Germany's high unemployment during the past decade were macroeconomic stagnation, the declining level of investment in plant and equipment, company restructuring, flat domestic consumption, structural rigidities in the labor market, lack of competition in the service sector, and high interest rates. The modernization and integration of the eastern German economy continues to be a costly long-term process, with annual transfers from west to east amounting to roughly \$80 billion. The former government of Chancellor Gerhard SCHROEDER launched a comprehensive set of reforms of labor market and welfare-related institutions. The current government of Chancellor Angela MERKEL has initiated other reform measures, such as a gradual increase in the mandatory retirement age from 65 to 67 and measures to increase female participation in the labor market. Germany's aging population, combined with high chronic unemployment, has pushed social security outlays to a level exceeding contributions, but higher government revenues from the cyclical upturn in 2006-07 and a 3% rise in the value-added tax pushed Germany's budget deficit well below the EU's 3% debt limit. Corporate restructuring and growing capital markets are setting the foundations that could help Germany meet the long-term challenges of European economic integration and globalization, although some economists continue to argue

the need for change in inflexible labor and services markets. Growth may fall below 2% in 2008 as the strong euro, high oil prices, tighter credit markets, and slowing growth abroad take their toll.

Introduction
Ghana

Background:

Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in 1957 became the first sub-Saharan country in colonial Africa to gain its independence. Ghana endured a long series of coups before Lt. Jerry RAWLINGS took power in 1981 and banned political parties. After approving a new constitution and restoring multiparty politics in 1992, RAWLINGS won presidential elections in 1992 and 1996, but was constitutionally prevented from running for a third term in 2000. John KUFUOR succeeded him and was reelected in 2004. Kufuor is constitutionally barred from running for a third term in upcoming Presidential elections, which are scheduled for December 2008.

Economy Ghana

Economy - overview:

Well endowed with natural resources, Ghana has roughly twice the per capita output of the poorest countries in West Africa. Even so, Ghana remains heavily dependent on international financial and technical assistance. Gold and cocoa production, and

individual remittances, are major sources of foreign exchange. The domestic economy continues to revolve around agriculture, which accounts for about 35% of GDP and employs about 55% of the work force, mainly small landholders. Ghana opted for debt relief under the Heavily Indebted Poor Country (HIPC) program in 2002, and is also benefiting from the Multilateral Debt Relief Initiative that took effect in 2006. Thematic priorities under its current Growth and Poverty Reduction Strategy, which also provides the framework for development partner assistance, are: macroeconomic stability; private sector competitiveness; human resource development; and good governance and civic responsibility. Sound macro-economic management along with high prices for gold and cocoa helped sustain GDP growth in 2007. Ghana signed a Millennium Challenge Corporation (MCC) Compact in 2006, which aims to assist in transforming Ghana's agricultural sector.

Introduction
Gibraltar

Background:

Strategically important, Gibraltar was reluctantly ceded to Great Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a referendum held in 1967, Gibraltarians voted overwhelmingly to remain a British dependency. The subsequent granting of autonomy in 1969 by the UK led to Spain closing the border and severing all communication links. A series of talks were held by the UK and Spain between 1997 and 2002 on establishing temporary joint sovereignty over Gibraltar. In response to these talks, the Gibraltar Government called a referendum in late 2002 in which the majority of citizens voted overwhelmingly against any sharing of sovereignty with Spain. Since the referendum, tripartite talks on other issues have been held with Spain, the UK, and Gibraltar, and in September 2006 a three-way agreement was signed. Spain agreed to remove restrictions on air movements, to speed up customs procedures, to implement international telephone dialing, and to allow mobile roaming agreements. Britain agreed to pay increased pensions to Spaniards who had been employed in Gibraltar before the border closed. Spain will be allowed to open a cultural institute from which the Spanish flag will fly. A new noncolonial constitution

came into effect in 2007, but the UK retains responsibility for defense, foreign relations, internal security, and financial stability.

Economy Gibraltar

Economy - overview:

Self-sufficient Gibraltar benefits from an extensive shipping trade, offshore banking, and its position as an international conference center. The British military presence has been sharply reduced and now contributes about 7% to the local economy, compared with 60% in 1984. The financial sector, tourism (almost 5 million visitors in 1998), shipping services fees, and duties on consumer goods also generate revenue. The financial sector, the shipping sector, and tourism each contribute 25%-30% of GDP. Telecommunications accounts for another 10%. In recent years, Gibraltar has seen major structural change from a public to a private sector economy, but changes in government spending still have a major impact on the level of employment.

Introduction
Greece

Background:

Greece achieved independence from the Ottoman Empire in 1829. During the second half of the 19th century and the first half of the 20th century, it gradually added neighboring islands and territories, most with Greek-speaking populations. In World War II, Greece was first invaded by Italy (1940) and subsequently occupied by Germany (1941-44); fighting endured in a protracted civil war between supporters of the king and Communist rebels. Following the latter's defeat in 1949, Greece joined NATO in 1952. A military dictatorship, which in 1967 suspended many political liberties and forced the king to flee the country, lasted seven years. The 1974 democratic elections and a referendum created a parliamentary republic and abolished the monarchy. In 1981, Greece joined the EC (now the EU); it became the 12th member of the European Economic and Monetary Union in 2001.

Economy
Greece

Economy - overview:

Greece has a capitalist economy with the public sector accounting for about 40% of GDP and with per capita GDP at least 75% of the leading euro-zone economies. Tourism provides 15% of GDP. Immigrants make up nearly one-fifth of the work force, mainly in agricultural and unskilled jobs. Greece is a major beneficiary of EU aid, equal to about 3.3% of annual GDP. The Greek economy grew by nearly 4.0% per year between 2003 and 2007, due partly to infrastructural spending related to the 2004 Athens Olympic Games, and in part to an increased availability of credit, which has sustained record levels of consumer spending. Greece violated the EU's Growth and Stability Pact budget deficit criteria of no more than 3% of GDP from 2001 to 2006, but finally met that criteria in 2007. Public debt, inflation, and unemployment are above the euro-zone average, but are falling. The Greek Government continues to grapple with cutting government spending, reducing the size of the public sector, and reforming the labor and pension systems, in the face of often vocal opposition from the country's powerful labor unions and the general public. The economy remains an important domestic political issue in Greece and, while the ruling New Democracy government

has had some success in improving economic growth and reducing the budget deficit, Athens faces long-term challenges in its effort to continue its economic reforms, especially social security reform and privatization.

Introduction Greenland

Background:

Greenland, the world's largest island, is about 81% ice-capped. Vikings reached the island in the 10th century from Iceland; Danish colonization began in the 18th century, and Greenland was made an integral part of Denmark in 1953. It joined the European Community (now the EU) with Denmark in 1973, but withdrew in 1985 over a dispute centered on stringent fishing quotas. Greenland was granted self-government in 1979 by the Danish parliament; the law went into effect the following year. Denmark continues to exercise control of Greenland's foreign affairs in consultation with Greenland's Home Rule Government.

Economy
Greenland

Economy - overview:

The economy remains critically dependent on exports of fish and a substantial subsidy from the Danish Government, which supplies about half of government

revenues. The public sector, including publicly owned enterprises and the municipalities, plays the dominant role in the economy. Several interesting hydrocarbon and mineral exploration activities are ongoing. Press reports in early 2007 indicated that two international aluminum companies were considering building smelters in Greenland to take advantage of local hydropower potential. Tourism is the only sector offering any near-term potential, and even this is limited due to a short season and high costs. Air Greenland began summer-season direct flights to the US east coast in May 2007, potentially opening a major new tourism market.

Introduction

Grenada

Background:

Carib Indians inhabited Grenada when COLUMBUS discovered the island in 1498, but it remained uncolonized for more than a century. The French settled Grenada in the 17th century, established sugar estates, and imported large numbers of African slaves. Britain took the island in 1762 and vigorously expanded sugar production. In the 19th century, cacao eventually surpassed sugar as the main export crop; in the 20th century, nutmeg became the leading export. In 1967, Britain gave Grenada autonomy over its internal affairs. Full independence was attained in 1974, making Grenada one of the smallest independent countries in the Western Hemisphere. Grenada was seized by a Marxist military council on 19 October 1983. Six days later the island was invaded by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstituted the following year and have continued since that time. Hurricane Ivan struck Grenada in September of 2004 causing severe damage.

Economy
Grenada

Economy - overview:

Grenada relies on tourism as its main source of foreign exchange, especially since the construction of an international airport in 1985. Strong performances in construction and manufacturing, together with the development of an offshore financial industry, have also contributed to growth in national output. Grenada has rebounded from the devastating effects of Hurricanes Ivan (2004) and Emily (2005), but is now saddled with the debt burden from the rebuilding process. The agricultural sector, particularly nutmeg and cocoa cultivation, has gradually recovered, and the tourism sector has seen substantial increases in foreign direct investment as the regional share of the tourism market increases.

Introduction Guatemala

Background:

The Mayan civilization flourished in Guatemala and surrounding regions during the first millennium A.D. After almost three centuries as a Spanish colony, Guatemala won its independence in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments, as well as a 36-year guerrilla war. In 1996, the government signed a peace agreement formally ending the conflict, which had left more than 100,000 people dead and had created, by some estimates, some 1 million refugees.

Economy Guatemala

Economy - overview:

Guatemala is the most populous of the Central American countries with a GDP per capita roughly one-half that of Argentina, Brazil, and Chile. The agricultural sector accounts for about one-tenth of GDP, two-fifths of exports, and half of the labor force. Coffee, sugar, and bananas are the main products, with sugar exports benefiting from increased global demand for ethanol. The 1996 signing of peace accords, which ended 36 years of civil war, removed a major obstacle to foreign investment, and Guatemala since then has pursued important reforms and macroeconomic stabilization. On 1 July 2006, the Central American Free Trade Agreement (CAFTA) entered into force between the US and Guatemala and has since spurred increased investment in the export sector. The distribution of income remains highly unequal with about 56% of the population below the poverty line. Other ongoing challenges include increasing government revenues, negotiating further assistance from international donors, upgrading both government and private financial operations, curtailing drug trafficking and rampant crime, and narrowing the trade deficit. Given Guatemala's large expatriate community in the United States, it is the top remittance recipient in Central America, with inflows serving as a primary source of foreign income equivalent to nearly two-thirds of exports.

Introduction
Guernsey

Background:

Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German troops in World War II. Guernsey is a British crown dependency, but is not part of the UK. However, the UK Government is constitutionally responsible for its defense and international representation.

Economy

Guernsey

Economy - overview:

Financial services - banking, fund management, insurance - account for about 23% of employment and about 55% of total income in this tiny, prosperous Channel Island economy. Tourism, manufacturing, and horticulture, mainly tomatoes and cut flowers, have been declining. Financial services, construction, retail, and the public sector have been growing. Light tax and death duties make Guernsey a popular tax haven. The evolving economic integration of the EU nations is changing the environment under which Guernsey operates.

Introduction
Guinea

Background:

Guinea has had only two presidents since gaining its independence from France in 1958. Lansana CONTE came to power in 1984 when the military seized the government after the death of the first president, Sekou TOURE. Guinea did not hold democratic elections until 1993 when Gen. CONTE (head of the military government) was elected

president of the civilian government. He was reelected in 1998 and again in 2003, though all the polls have been marred by irregularities. Guinea has maintained its internal stability despite spillover effects from conflict in Sierra Leone and Liberia. As those countries have rebuilt, Guinea's own vulnerability to political and economic crisis has increased. Declining economic conditions and popular dissatisfaction with corruption and bad governance prompted two massive strikes in 2006; a third nationwide strike in early 2007 sparked violent protests in many Guinean cities and prompted two weeks of martial law. To appease the unions and end the unrest, CONTE named a new prime minister in March 2007.

Economy Guinea

Economy - overview:

Guinea possesses major mineral, hydropower, and agricultural resources, yet remains an underdeveloped nation. The country has almost half of the world's bauxite reserves and is the second-largest bauxite producer. The mining sector accounts for over 70% of exports. Long-run improvements in government fiscal arrangements, literacy, and the legal framework are needed if the country is to move out of poverty. Investor confidence has been sapped by rampant corruption, a lack of electricity and other infrastructure, a

lack of skilled workers, and the political uncertainty due to the failing health of President Lansana CONTE. Guinea is trying to reengage with the IMF and World Bank, which cut off most assistance in 2003, and is working closely with technical advisors from the U.S. Treasury Department, the World Bank and IMF, seeking to return to a fully funded program. Growth rose slightly in 2006-07, primarily due to increases in global demand and commodity prices on world markets, but the standard of living fell. The Guinea franc depreciated sharply as the prices for basic necessities like food and fuel rose beyond the reach of most Guineans. Dissatisfaction with economic conditions prompted nationwide strikes in February and June 2006.

Introduction
Guinea-Bissau

Background:

Since independence from Portugal in 1974, Guinea-Bissau has experienced considerable political and military upheaval. In 1980, a military coup established authoritarian dictator Joao Bernardo 'Nino' VIEIRA as president. Despite setting a path to a market economy and multiparty system, VIEIRA's regime was characterized by the suppression of political opposition and the purging of political rivals. Several coup attempts through the 1980s and early 1990s failed to unseat him. In 1994 VIEIRA was elected president in the country's first free elections. A military mutiny and resulting civil war in 1998 eventually led to VIEIRA's ouster in May 1999. In February 2000, a transitional government turned over power to opposition leader Kumba YALA, after he was elected president in transparent polling. In September 2003, after only three years in office, YALA was ousted by the military in a bloodless coup, and businessman Henrique ROSA was sworn in as interim president. In 2005, former President VIEIRA was re-elected president pledging to pursue economic development and national reconciliation.

Economy Guinea-Bissau

Economy - overview:

One of the five poorest countries in the world, Guinea-Bissau depends mainly on farming and fishing. Cashew crops have increased remarkably in recent years, and the country now ranks sixth in cashew production. Guinea-Bissau exports fish and seafood along with small amounts of peanuts, palm kernels, and timber. Rice is the major crop and staple food. However, intermittent fighting between Senegalese-backed government troops and a military junta destroyed much of the country's infrastructure and caused widespread damage to the economy in 1998; the civil war led to a 28% drop in GDP that year, with partial recovery in 1999-2002. Before the war, trade reform and price liberalization were the most successful part of the country's structural adjustment program under IMF sponsorship. The tightening of monetary policy and the development of the private sector had also begun to reinvigorate the economy. Because of high costs, the development of petroleum, phosphate, and other mineral resources is not a near-term prospect. Offshore oil prospecting is underway in several sectors but has not yet led to commercially viable crude deposits. The inequality of income distribution is one of the most extreme in the world. The government and international donors continue to work out plans to forward economic development from a lamentably low base. In December 2003, the World Bank, IMF, and UNDP were forced to step in to provide emergency budgetary support in the amount of \$107 million for 2004, representing over 80% of the total national budget. Government drift and indecision, however, resulted in continued low growth in 2002-06. Higher raw material prices boosted growth to 3.7% in 2007.

Introduction

Guyana

Background:

Originally a Dutch colony in the 17th century, by 1815 Guyana had become a British possession. The abolition of slavery led to black settlement of urban areas and the importation of indentured servants from India to work the sugar plantations. This ethnocultural divide has persisted and has led to turbulent politics. Guyana achieved independence from the UK in 1966, and since then it has been ruled mostly by socialist-oriented governments. In 1992, Cheddi JAGAN was elected president in what is considered the country's first free and fair election since independence. After his death five years later, his wife, Janet JAGAN, became president but resigned in 1999 due to poor health. Her successor, Bharrat JAGDEO, was reelected in 2001 and again in 2006.

Economy

Guyana

Economy - overview:

The Guyanese economy exhibited moderate economic growth in 2001-07, based on expansion in the agricultural and mining sectors, a more favorable atmosphere for business initiatives, a more realistic exchange rate, fairly low inflation, and the continued support of international organizations. Economic recovery since the 2005 flood-related contraction has been buoyed by increases in remittances and foreign direct investment. Chronic problems include a shortage of skilled labor and a deficient infrastructure. The government is juggling a sizable external debt against the urgent need for expanded public investment. In March 2007, the Inter-American Development Bank, Guyana's principal donor, canceled Guyana's nearly \$470 million debt, equivalent to nearly 48% of GDP. The bauxite mining sector should benefit in the near term from restructuring and partial privatization, and the state-owned sugar industry will conduct efficiency increasing modernizations. Export earnings from agriculture and mining have fallen sharply, while the import bill has risen, driven by higher energy prices. Guyana's entrance into the Caricom Single Market and Economy (CSME) in January 2006 will broaden the country's export market, primarily in the raw materials sector.

Issues

Disputes - international:

all of the area west of the Essequibo River is claimed by Venezuela preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before UNCLOS that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks arbitration under provisions of the UN Convention on the Law of the Sea (UNCLOS) to resolve the long-standing dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Trafficking in persons:

current situation: Guyana is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; most trafficking appears to take place in remote mining camps in the country's interior; some women and girls are trafficked from northern Brazil; reporting from other nations suggests Guyanese women and girls are trafficked for sexual exploitation to neighboring countries and Guyanese men and boys are subject to labor exploitation in construction and agriculture; trafficking victims from Suriname, Brazil, and Venezuela transit Guyana en route to Caribbean destinations tier rating: Tier 2 Watch List - for a second consecutive year, Guyana is on the Tier 2 Watch List for failing to provide evidence of increasing efforts to combat trafficking, particularly in the area of law enforcement actions against trafficking offenders; the government has yet to produce an anti-trafficking conviction under the comprehensive Combating of Trafficking in Persons Act, which became law in 2005; the government operates no

shelters for trafficking victims, but did include limited funding for anti-trafficking NGOs in its 2008 budget; the government did not make any effort to reduce demand for commercial sex acts during 2007 (2008)

Illicit drugs:

transshipment point for narcotics from South America - primarily Venezuela - to Europe and the US; producer of cannabis; rising money laundering related to drug trafficking and human smuggling

Introduction
Haiti

Background:

The native Taino Amerindians - who inhabited the island of Hispaniola when it was discovered by COLUMBUS in 1492 - were virtually annihilated by Spanish settlers within 25 years. In the early 17th century, the French established a presence on Hispaniola, and in 1697, Spain ceded to the French the western third of the island, which later became Haiti. The French colony, based on forestry and sugar-related industries, became one of the wealthiest in the Caribbean, but only through the heavy importation of African slaves and considerable environmental degradation. In the late 18th century, Haiti's nearly half million slaves revolted under Toussaint L'OUVERTURE. After a prolonged struggle, Haiti became the first black republic to declare its independence in 1804. The poorest country in the Western Hemisphere, Haiti has been plagued by

political violence for most of its history. After an armed rebellion led to the forced resignation and exile of President Jean-Bertrand ARISTIDE in February 2004, an interim government took office to organize new elections under the auspices of the United Nations Stabilization Mission in Haiti (MINUSTAH). Continued violence and technical delays prompted repeated postponements, but Haiti finally did inaugurate a democratically elected president and parliament in May of 2006.

Economy
Haiti

Economy - overview:

Haiti is the poorest country in the Western Hemisphere, with 80% of the population living under the poverty line and 54% in abject poverty. Two-thirds of all Haitians depend on the agricultural sector, mainly small-scale subsistence farming, and remain vulnerable to damage from frequent natural disasters, exacerbated by the country's widespread deforestation. A macroeconomic program developed in 2005 with the help of the International Monetary Fund helped the economy grow 3.5% in 2007, the highest growth rate since 1999. US economic engagement under the Haitian Hemispheric Opportunity through Partnership Encouragement (HOPE) Act, passed in December 2006, has boosted the garment and automotive parts exports and investment by providing tariff-free access to the US. Haiti suffers from high inflation, a lack of investment because of insecurity and limited infrastructure, and a severe trade deficit. In 2005, Haiti paid its arrears to the World Bank, paving the way for reengagement with the Bank. The government relies on formal international economic assistance for fiscal sustainability. Remittances are the primary source of foreign exchange, equaling nearly a quarter of GDP and more than twice the earnings from exports.

@Holy See (Vatican City)

Introduction
Holy See (Vatican City)

Background:

Popes in their secular role ruled portions of the Italian peninsula for more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Holy See and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include religious freedom, international development, the environment, the Middle East, China, the decline of religion in

Europe, terrorism, interreligious dialogue and reconciliation, and the application of church doctrine in an era of rapid change and globalization. About one billion people worldwide profess the Catholic faith.

@Honduras

Introduction
Honduras

Background:

Once part of Spain's vast empire in the New World, Honduras became an independent nation in 1821. After two and a half decades of mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a

haven for anti-Sandinista contras fighting the Marxist Nicaraguan Government and an ally to Salvadoran Government forces fighting leftist guerrillas. The country was devastated by Hurricane Mitch in 1998, which killed about 5,600 people and caused approximately \$2 billion in damage.

Economy Honduras

Economy - overview:

Honduras, the second poorest country in Central America and one of the poorest countries in the Western Hemisphere, with an extraordinarily unequal distribution of income and massive unemployment, is banking on expanded trade under the US-Central America Free Trade Agreement (CAFTA) and on debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Despite improvements in tax collections, the government's fiscal deficit is growing due to increases in current expenditures and financial losses from the state energy and telephone companies. Honduras is the fastest growing remittance destination in the region with inflows representing over a quarter of GDP, equivalent to nearly three-quarters of exports. The economy relies heavily on a narrow range of exports, notably bananas and coffee, making it vulnerable to natural disasters and shifts in commodity prices, however, investments in the maquila and non-traditional export sectors are slowly diversifying the economy. Growth remains dependent on the economy of the US, its largest trading partner, and on reduction of the high crime rate, as a means of attracting and maintaining investment.

Introduction
Hong Kong

Background:

Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December 1984, Hong Kong became the Hong Kong Special Administrative Region (SAR) of China on 1 July 1997. In this agreement, China promised that, under its "one country, two systems" formula, China's socialist economic system would not be imposed on Hong Kong and that Hong Kong would enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

Economy
Hong Kong

Economy - overview:

Hong Kong has a free market economy highly dependent on international trade. In 2006, the total value of goods and services trade, including the sizable share of reexports, was equivalent to 400% of GDP. The territory has become increasingly integrated with mainland China over the past few years through trade, tourism, and financial links. The mainland has long been Hong Kong's largest trading partner, accounting for 46% of Hong Kong's total trade by value in 2006. As a result of China's easing of travel restrictions, the number of mainland tourists to the territory has surged from 4.5 million in 2001 to 13.6 million in 2006, when they outnumbered visitors from all other countries combined. Hong Kong has also established itself as the premier stock market for Chinese firms seeking to list abroad. Bolstered by several successful initial public offerings in early 2007, by September 2007 mainland companies accounted for one-third of the firms listed on the Hong Kong Stock Exchange, and more than half of the Exchange's market capitalization. During the past decade, as Hong Kong's manufacturing industry moved to the mainland, its service industry has grown rapidly and now accounts for 91% of the territory's GDP. Hong Kong's natural resources are limited, and food and raw materials must be imported. GDP growth averaged a strong 5% from 1989 to 2007, despite the economy suffering two recessions during the Asian financial crisis in 1997-98 and the global downturn in 2001-02. Hong Kong continues to link its currency closely to the US dollar, maintaining an arrangement established in 1983.

Introduction
Hungary

Background:

Hungary became a Christian kingdom in A.D. 1000 and for many centuries served as a bulwark against Ottoman Turkish expansion in Europe. The kingdom eventually became part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under Communist rule following World War II. In 1956, a revolt and an announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. Under the leadership of Janos KADAR in 1968, Hungary began liberalizing its economy, introducing so-called "Goulash Communism." Hungary held its first multiparty elections in 1990 and initiated a free market economy. It joined NATO in 1999 and the EU in 2004.

Economy Hungary

Economy - overview:

Hungary has made the transition from a centrally planned to a market economy, with a per capita income nearly two-thirds that of the EU-25 average. The private sector accounts for more than 80% of GDP. Foreign ownership of and investment in Hungarian firms are widespread, with cumulative foreign direct investment totaling more than \$60 billion since 1989. Hungary issues investment-grade sovereign debt. International observers, however, have expressed concerns over Hungary's fiscal and current account deficits. In 2007, Hungary eliminated a trade deficit that had persisted for several years. Inflation declined from 14% in 1998 to a low of 3.7% in 2006, but

jumped to 7.8% in 2007. Unemployment has persisted above 6%. Hungary's labor force participation rate of 57% is one of the lowest in the Organization for Economic Cooperation and Development (OECD). Germany is by far Hungary's largest economic partner. Policy challenges include cutting the public sector deficit to 4% of GDP by 2008, from about 6% in 2007. The government's austerity program of tax hikes and subsidy cuts has reduced Hungary's large budget deficit, but the reforms have dampened domestic consumption, slowing GDP growth to about 2% in 2007. The government will need to pass additional reforms to ensure the long-term stability of public finances. The government plans to eventually lower its public sector deficit to below 3% of GDP to adopt the euro.

Introduction
Iceland

Background:

Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Limited home rule from Denmark was granted in 1874 and complete independence

attained in 1944. Literacy, longevity, income, and social cohesion are first-rate by world standards.

Economy Iceland

Economy - overview:

Iceland's Scandinavian-type economy is basically capitalistic, yet with an extensive welfare system (including generous housing subsidies), low unemployment, and remarkably even distribution of income. In the absence of other natural resources (except for abundant geothermal power), the economy depends heavily on the fishing industry, which provides 70% of export earnings and employs 6% of the work force. The economy remains sensitive to declining fish stocks as well as to fluctuations in world prices for its main exports: fish and fish products, aluminum, and ferrosilicon. Substantial foreign investment in the aluminum and hydropower sectors has boosted economic growth which, nevertheless, has been volatile and characterized by recurrent imbalances. Government policies include reducing the current account deficit, limiting foreign borrowing, containing inflation, revising agricultural and fishing policies, and diversifying the economy. The government remains opposed to EU membership, primarily because of Icelanders' concern about losing control over their fishing resources. Iceland's economy has been diversifying into manufacturing and service industries in the last decade, and new developments in software production, biotechnology, and financial services are taking place. The tourism sector is also expanding, with the recent trends in ecotourism and whale watching. The 2006 closure of the US military base at Keflavik had very little impact on the national economy; Iceland's low unemployment rate aided former base employees in finding alternate employment.

Introduction
India

Background:

Aryan tribes from the northwest infiltrated onto the Indian subcontinent about 1500 B.C.; their merger with the earlier Dravidian inhabitants created the classical Indian culture. The Maurya Empire of the 4th and 3rd centuries B.C. - which reached its zenith under ASHOKA - united much of South Asia. The Golden Age ushered in by the Gupta dynasty (4th to 6th centuries A.D.) saw a flowering of Indian science, art, and culture. Arab incursions starting in the 8th century and Turkic in the 12th were followed by those of European traders, beginning in the late 15th century. By the 19th century,

Britain had assumed political control of virtually all Indian lands. Indian armed forces in the British army played a vital role in both World Wars. Nonviolent resistance to British colonialism led by Mohandas GANDHI and Jawaharlal NEHRU brought independence in 1947. The subcontinent was divided into the secular state of India and the smaller Muslim state of Pakistan. A third war between the two countries in 1971 resulted in East Pakistan becoming the separate nation of Bangladesh. India's nuclear weapons testing in 1998 caused Pakistan to conduct its own tests that same year. The dispute between the countries over the state of Kashmir is ongoing, but discussions and confidence-building measures have led to decreased tensions since 2002. Despite impressive gains in economic investment and output, India faces pressing problems such as significant overpopulation, environmental degradation, extensive poverty, and ethnic and religious strife.

Economy India

Economy - overview:

India's diverse economy encompasses traditional village farming, modern agriculture, handicrafts, a wide range of modern industries, and a multitude of services. Services are the major source of economic growth, accounting for more than half of India's output with less than one third of its labor force. About three-fifths of the work force is in agriculture, leading the United Progressive Alliance (UPA) government to articulate an economic reform program that includes developing basic infrastructure to improve the lives of the rural poor and boost economic performance. The government has reduced controls on foreign trade and investment. Higher limits on foreign direct investment were permitted in a few key sectors, such as telecommunications. However, tariff spikes in sensitive categories, including agriculture, and incremental progress on economic reforms still hinder foreign access to India's vast and growing market. Privatization of government-owned industries remains stalled and continues to generate political debate; populist pressure from within the UPA government and from its Left Front allies continues to restrain needed initiatives. The economy has posted an average growth rate of more than 7% in the decade since 1997, reducing poverty by about 10 percentage points. India achieved 8.5% GDP growth in 2006, and again in 2007, significantly expanding production of manufactures. India is capitalizing on its large numbers of well-educated people skilled in the English language to become a major exporter of software services and software workers. Economic expansion has helped New Delhi continue to make progress in reducing its federal fiscal deficit. However, strong growth combined with easy consumer credit and a real estate boom fueled inflation concerns in 2006 and 2007, leading to a series of central bank interest rate hikes that have slowed credit growth and eased inflation concerns. The huge and growing population is the fundamental social, economic, and environmental problem.

Issues

Disputes - international:

since China and India launched a security and foreign policy dialogue in 2005, consolidated discussions related to the dispute over most of their rugged, militarized boundary, regional nuclear proliferation, Indian claims that China transferred missiles to Pakistan, and other matters continue; various talks and confidence-building measures have cautiously begun to defuse tensions over Kashmir, particularly since the October 2005 earthquake in the region; Kashmir nevertheless remains the site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); India and Pakistan have maintained the 2004 cease fire in Kashmir and initiated discussions on defusing the armed stand-off in the Siachen glacier region; Pakistan protests India's fencing the highly militarized Line of Control and construction of the Baglihar Dam on the Chenab River in Jammu and Kashmir, which is part of the larger dispute on water sharing of the Indus River and its tributaries; UN Military Observer Group in India and Pakistan (UNMOGIP) has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan seek technical resolution of the disputed boundary in Sir Creek estuary at the mouth of the Rann of Kutch in the Arabian Sea; Pakistani maps continue to show its Junagadh claim in Indian Gujarat State; discussions with Bangladesh remain stalled to delimit a small section of river boundary, to exchange territory for 51 Bangladeshi exclaves in India and 111 Indian exclaves in Bangladesh, to allocate divided villages, and to stop illegal cross-border trade, migration, violence, and transit of terrorists through the porous border; Bangladesh protests India's attempts to fence off high-traffic sections of the border; dispute with Bangladesh over New Moore/South Talpatty/Purbasha Island in the Bay of Bengal deters maritime boundary delimitation; India seeks cooperation from Bhutan and Burma to keep Indian Nagaland and Assam separatists from hiding in remote areas along the borders; Joint Border Committee with Nepal continues to examine contested boundary sections, including the 400 square kilometer dispute over the source of the Kalapani River; India maintains a strict border regime to keep out Maoist insurgents and control illegal cross-border activities from Nepal

Refugees and internally displaced persons:

refugees (country of origin): 77,200 (Tibet/China); 69,609 (Sri Lanka); 9,472 (Afghanistan) IDPs: at least 600,000 (about half are Kashmiri Pandits from Jammu and Kashmir) (2007)

Trafficking in persons:

current situation: India is a source, destination, and transit country for men, women, and children trafficked for the purposes of forced labor and commercial sexual exploitation; internal forced labor may constitute India's largest trafficking problem; men, women, and children are held in debt bondage and face forced labor working in brick kilns, rice mills, agriculture, and embroidery factories; women and girls are trafficked within the country for the purposes of commercial sexual exploitation and forced marriage; children are subjected to forced labor as factory workers, domestic servants, beggars, and agriculture workers, and have been used as armed combatants by some terrorist and insurgent groups; India is also a destination for women and girls from Nepal and Bangladesh trafficked for the purpose of commercial sexual exploitation; Indian women are trafficked to the Middle East for commercial sexual exploitation; men and women from Bangladesh and Nepal are trafficked through India for forced labor and commercial sexual exploitation in the Middle East tier rating: Tier 2 Watch List - India is on the Tier 2 Watch List for a fifth consecutive year for its failure to provide evidence of increasing efforts to combat human trafficking in 2007; despite the reported extent of the trafficking crisis in India, government authorities made uneven efforts to prosecute traffickers and protect trafficking victims; government authorities continued to rescue victims of commercial sexual exploitation and forced child labor and child armed combatants, and began to show progress in law enforcement against these forms of trafficking; a critical challenge overall is the lack of punishment for traffickers, effectively resulting in impunity for acts of human trafficking; India has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs:

world's largest producer of licit opium for the pharmaceutical trade, but an undetermined quantity of opium is diverted to illicit international drug markets; transit point for illicit narcotics produced in neighboring countries and throughout Southwest Asia; illicit producer of methaqualone; vulnerable to narcotics money laundering through the hawala system; licit ketamine and precursor production

Introduction
Indian Ocean

Background:

The Indian Ocean is the third largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south latitude.

Geography
Indian Ocean

Location:

body of water between Africa, the Southern Ocean, Asia, and Australia

Geographic coordinates:
20 00 S, 80 00 E

Map references:

Political Map of the World

Area:

total: 68.556 million sq km
note: includes Andaman Sea, Arabian Sea, Bay of Bengal, Flores Sea, Great Australian Bight, Gulf of Aden, Gulf of Oman, Java Sea, Mozambique Channel, Persian Gulf, Red Sea, Savu Sea, Strait of Malacca, Timor Sea, and other tributary water bodies

Area - comparative:

about 5.5 times the size of the US

Coastline:

66,526 km

Climate:

northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Terrain:

surface dominated by counterclockwise gyre (broad, circular system of currents) in the southern Indian Ocean; unique reversal of surface currents in the northern Indian Ocean; low atmospheric pressure over southwest Asia from hot, rising, summer air results in the southwest monsoon and southwest-to-northeast winds and currents, while high pressure over northern Asia from cold, falling, winter air results in the northeast monsoon and northeast-to-southwest winds and currents; ocean floor is dominated by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Elevation extremes:

lowest point: Java Trench -7,258 m highest point: sea level 0 m

Natural resources:

oil and gas fields, fish, shrimp, sand and gravel aggregates, placer deposits, polymetallic nodules

Natural hazards:

occasional icebergs pose navigational hazard in southern reaches

Environment - current issues:

endangered marine species include the dugong, seals, turtles, and whales; oil pollution in the Arabian Sea, Persian Gulf, and Red Sea

Geography - note:

major chokepoints include Bab el Mandeb, Strait of Hormuz, Strait of Malacca, southern access to the Suez Canal, and the Lombok Strait

Economy
Indian Ocean

Economy - overview:

The Indian Ocean provides major sea routes connecting the Middle East, Africa, and East Asia with Europe and the Americas. It carries a particularly heavy traffic of petroleum and petroleum products from the oilfields of the Persian Gulf and Indonesia. Its fish are of great and growing importance to the bordering countries for domestic consumption and export. Fishing fleets from Russia, Japan, South Korea, and Taiwan also exploit the Indian Ocean, mainly for shrimp and tuna. Large reserves of hydrocarbons are being tapped in the offshore areas of Saudi Arabia, Iran, India, and western Australia. An estimated 40% of the world's offshore oil production comes from the Indian Ocean. Beach sands rich in heavy minerals and offshore placer deposits are actively exploited by bordering countries, particularly India, South Africa, Indonesia, Sri Lanka, and Thailand.

Introduction Indonesia

Background:

The Dutch began to colonize Indonesia in the early 17th century; the islands were occupied by Japan from 1942 to 1945. Indonesia declared its independence after Japan's surrender, but it required four years of intermittent negotiations, recurring hostilities, and UN mediation before the Netherlands agreed to relinquish its colony. Indonesia is the world's largest archipelagic state and home to the world's largest Muslim population. Current issues include: alleviating poverty, preventing terrorism, consolidating democracy after four decades of authoritarianism, implementing financial sector reforms, stemming corruption, holding the military and police accountable for human rights violations, and controlling avian influenza. In 2005, Indonesia reached a historic peace agreement with armed separatists in Aceh, which led to democratic elections in December 2006. Indonesia continues to face a low intensity separatist movement in Papua.

Economy Indonesia

Economy - overview:

Indonesia, a vast polyglot nation, has been undergoing significant economic reforms under President YUDHOYONO. Indonesia's debt-to-GDP ratio has been declining steadily, its foreign exchange reserves are at an all-time high of over \$50 billion, and its stock market has been one of the three best performers in the world in 2006 and 2007, as global investors sought out higher returns in emerging markets. The government has introduced significant reforms in the financial sector, including tax and customs reforms, the introduction of Treasury bills, and improved capital market supervision. Indonesia's new investment law, passed in March 2007, seeks to address

some of the concerns of foreign and domestic investors. Indonesia still struggles with poverty and unemployment, inadequate infrastructure, corruption, a complex regulatory environment, and unequal resource distribution among regions. Indonesia has been slow to privatize over 100 state-owned enterprises, several of which have monopolies in key sectors. The non-bank financial sector, including pension funds and insurance, remains weak. Capital markets are underdeveloped. The high global price of oil in 2007 increased the cost of domestic fuel and electricity subsidies, and are contributing to concerns about higher food prices. Located on the Pacific "Ring of Fire" Indonesia remains vulnerable to volcanic and tectonic disasters. Significant progress has been made in rebuilding Aceh after the devastating December 2004 tsunami, and the province now shows more economic activity than before the disaster. Unfortunately, Indonesia suffered new disasters in 2006 and early 2007 including: a major earthquake near Yogyakarta, an industrial accident in Sidoarjo, East Java that created a "mud volcano," a tsunami in South Java, and major flooding in Jakarta, all of which caused additional damages in the billions of dollars. Donors are assisting Indonesia with its disaster mitigation and early warning efforts.

Issues

Disputes - international:

Indonesia has a stated foreign policy objective of establishing stable fixed land and maritime boundaries with all of its neighbors; Timor-Leste-Indonesia Boundary Committee has resolved all but a small portion of the land boundary, but discussions on maritime boundaries are stalemated over sovereignty of the uninhabited coral island of Pulau Batek/Fatu Sinai in the north and alignment with Australian claims in the south; many refugees from Timor-Leste who left in 2003 still reside in Indonesia and refuse

repatriation; a 1997 treaty between Indonesia and Australia settled some parts of their maritime boundary but outstanding issues remain; ICJ's award of Sipadan and Ligitan islands to Malaysia in 2002 left the sovereignty of Unarang rock and the maritime boundary in the Ambalat oil block in the Celebes Sea in dispute; the ICJ decision has prompted Indonesia to assert claims to and to establish a presence on its smaller outer islands; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; Indonesian secessionists, squatters, and illegal migrants create repatriation problems for Papua New Guinea; piracy remains a problem in the Malacca Strait; maritime delimitation talks continue with Palau; Indonesian groups challenge Australia's claim to Ashmore Reef; Australia has closed parts of the Ashmore and Cartier Reserve to Indonesian traditional fishing and placed restrictions on certain catches

Refugees and internally displaced persons:

Introduction

Iran

Background:

Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling monarchy was overthrown and the shah was forced into exile. Conservative clerical forces established a theocratic system of government with ultimate political authority vested in a learned religious scholar referred to commonly as the Supreme Leader who, according to the constitution, is accountable only to the Assembly of Experts. US-Iranian relations have been strained since a group of Iranian students seized the US Embassy in Tehran on 4 November 1979 and held it until 20 January 1981. During 1980-88, Iran fought a bloody, indecisive war with Iraq that eventually expanded into the Persian Gulf and led to clashes between US Navy and Iranian military forces between 1987 and 1988. Iran has been designated a state sponsor of terrorism for its activities in Lebanon and elsewhere in the world and remains subject to US and UN economic sanctions and export controls because of its continued involvement in terrorism and conventional weapons proliferation. Following the election of reformer Hojjat ol-Eslam Mohammad KHATAMI as president in 1997 and similarly a reformer Majles (parliament) in 2000, a campaign to foster political reform in response to popular dissatisfaction was initiated. The movement floundered as conservative politicians, through the control of unelected institutions, prevented reform measures from being enacted and increased repressive measures. Starting with nationwide municipal elections in 2003 and continuing through Majles elections in 2004, conservatives reestablished control over Iran's elected government institutions, which culminated with the August 2005 inauguration of hardliner Mahmud AHMADI-NEJAD as president. In December 2006 and March 2007, the international community passed resolutions 1737 and 1747 respectively after Iran failed to comply with UN demands to halt the enrichment of uranium or to agree to full IAEA oversight of its nuclear program. In October 2007, Iranian entities were also subject to US sanctions under EO 13382 designations for proliferation activities and EO 13224 designations for providing material support to the Taliban and other terrorist organizations.
